STUDENT FEES

Fed. Govt. Denies New Draft Rumor

By JON SPINNER

The part-time student, the student on academic probation, and the graduate student are still (so far as the Federal Government is concerned) to be rated "2S". Other reports notwithstanding, the newest rumor (that the aforementioned students were to be drafted) has proved to be unfounded.

Many officials at the city, state, and federal levels have stated that there has been no change in the draft situation concerning the student since early summer of 1965. As far as the Federal Selective Service Office is concerned, the local boards still control the selection of students.

Colonel Jensen, liaison officer for the National Headquarters of the Selective Service, stated that no directive has been issued or being issued at this time. He added that "the local boards have been tightening up, but this has been going on since early summer. They are not as liberal as a few months ago, but only if they have any questions about a student do they get in touch with National Headquarters." He further stated that "it is up to the local board to decide the draft status of the graduate student."

This reliance on the local board or the draft status of the student

was supported by the Maryland State Director of Selective Service, Brigadier General Stanwood, who said that "we receive from the colleges form 409A, and all they indicate is that a student is attending classes full time. They don't tell us if he is on probation or attending part-time." As for a directive changing the present situation, the General said that "I don't know anything about it."

The New York City Selective Service Headquarters also backed up the Federal Board. Colonel Albert of the N.Y.C. board said that "no directive is out yet. The only way I've heard of it, is the same way you have; through the newspapers, and they've indicated it would come out some time in the immediate future." Asked if present policy applies to all students, regardless of academic standing, he said that "this holds for all students."

S.G. Elections

This semester's Student Council elections were originally scheduled to be held last week. However, due to the turmoil created by the proposal of a "paper tuition" and the need for immediate action upon the Bowker and Gallagher proposals, it was necessary to postpone the elections.

Elections will be held on Wednesday, Thursday, and Friday, December 1, 2, and 3. The following Council offices are open: Class of '66 — 2 seats; Class of '67 — 1 seat; Class of '68 — 1 seat; Class of '69 — 1 seat; Councilman-at-large — 3 seats. The deadline for filing notification of candidacy is Nov. 29. No petition is necessary; just submit name, class, average, and office sought. Use the S.G. President's mailbox in 152 Finley.

Job Trends Holding Firm

A small turnout of graduating engineers at job interviews is making this year one of the most successful for those who are attending.

This term there have been more interviewers with job openings than graduates applying for jobs. The reason for this, though not clear, may be that many students are considering graduate school rather than work due to the draft situation.

Almost all groups are doing excellently, with Chem. Es leading the hiring trend and Biology majors last. Engineers are doing better than science students, although physics majors are also highly sought after.

Companies from many areas have sent their representatives to the campus, with an increase in consumer goods companies coming over last year. The defense industry has seen a resurgence in hiring, possibly due to the Vietnamese War. The increased hiring in consumer industries is attributed to the general boom in the economy.

Many companies are offering to obtain draft deferments for employees as an added inducement to accepting positions with them. Interviewers have also stated that they are willing to hire and train draft-eligible students in the hope that if drafted they will return to the company after their tour of duty. This represents a change of attitude from past years. In the liberal arts field employers are still requiring students to discharge their military obligation before seeking a job.

Mr. Larry Cooley, Assistant Director of the Placement Office, stated that he expects the hiring trend to hold firm for June and August graduates, despite the greater number of job applicants expected next term.

Bowker Quits Post 3 Others Follow, Blast B. of H.E.

The Chancellor of the City University, the President of Brooklyn and Hunter Colleges, and Dean of Studies of the City University announced Saturday night that they were quitting their posts.

The resignations were the result of a dispute with the Board of Higher Education, and climaxed the events of the last two weeks, concerning free tuition.

Dr. Albert H. Bowker, Chancellor, told the Board he was quitting because the "Board of Trustees has manifested a lack of confidence in him" and stated that he feels "His real usefulness to the University is at an end." Dr. Bowker asked that his resignation be effective immediately.

Dr. John J. Meng and Dr. Harry D. Gideonse, Presidents of Brooklyn and Hunter Colleges, respectively, said they would remain in their posts through August 31, 1966, the end of the current academic year. Both offered the Board of Higher Education's demand for 'fealty' as the reason.

Dr. Harry L. Levy, Dean of Studies of the City University asked the Board for "immediate reassignment" to his former position as Professor of Classics at Hunter College. He gave no rea-

son for his action.

All the resignations were made in a letter dated November 19, but were not delivered to Gustave G. Rosenberg, Chairman of the Board until Saturday evening.

The resignations stem from the controversy which erupted when the Administrative Council of the City University, composed of the Presidents of the four City Colleges and Chancellor Bowker, announced a plan to finance the City University through a \$400 "paper" tuition.

Because of the violent reaction to their proposal, the Council withdrew it on November 15, and substituted the plan read by Dr. Buell G. Gallagher, President of City College, at the open hearing held here last week. The new plan insures free tuition in principle as well as in fact.

At a special meeting of the Board of Higher Education held last week, the Board condemned the action of the Council in making its proposals without consulting the Board.

S.G. Backs Weitzman On Anti-Tuition Fight

Student Council last Thursday unanimously endorsed S.G. President Carl Weitzman's handling of the Tuition Crisis in the form of the President's report. Council also endorsed the following Executive Committee proposals:

- I. The establishment of an emergency Student - Faculty - Alumni - Administration Committee to prepare a report on "Financing the City University and State Higher Education."
- II. The establishment (by the Mayor) of an Administrative Finance Committee to consult the Board of Higher Education.
- III. A campaign for Federal Aid.
- IV. State-wide restoration of free tuition through the following proposals:
 - a. Restoration of mandated authority for the City University
 - b. Broadened borrowing authority for the City.
 - c. Parity aid from the State.
- V. a. Establishment of a State Association of Public Universities to lobby for State-wide Free Tuition.
- b. A convention in March to pressure the State Legislature to pass an equitable formula.
- c. Establishment of Student-Faculty groups (financed by increased Student Fees) to travel about the state to explain the need for

S. G. President Carl Weitzman

Free Higher Education and the ways to go about securing it.

Last week President Gallagher, along with Chancellor Bowker, made a paper tuition proposal for the purpose of financing the City University. Pres. Gallagher, after discussion with students convinced the Administrative Council to change its proposal. The resultant proposal, the so-called

E & A Day Planned By Tech Council

By LEONRD SOLOMON

An Engineering and Architecture Day, coordinated by Tech Council, will be held next term.

Under the committee leadership of Jack Koplowitz, vice-president of Tech Council, the committee has quietly begun its work. A successful E and A Day is a massive undertaking. Interesting exhibits must be planned; the services of various students, teachers, and technicians must be obtained to run the various machinery; high

One way this problem might be solved is by hiring professional publicists. This, as well as many other problems, was discussed in a student-faculty meeting on Thursday, November 18th, which was the first of many such meetings which have been planned.

Film Plan Up in Air

Publicity in general has been considered by Tech Council recently. When the Council first convened this term, one activity

Tech Building E-A Day Site

schools must be notified of the event.

In the past, the biggest problem has seemed to be publicity. Simple notification of all the high schools in the city has not been enough to encourage a really large turnout of interested people.

of high priority was the production of a film about the School of Engineering and Architecture.

Under the committee chairmanship of Isaac Shafraan, work has been done towards the realization of this goal. Mr. Shafraan invited

Someone Always Pays

Thousands of students breathed a sigh of relief last week when President Gallagher announced that he was dropping the proposal to institute a \$400 "paper tuition" at the College.

Yet, for a small minority of students, the issue of free tuition had no relevance last week, nor did they gain anything by President Gallagher's change of heart. These students are in the fifth year of architecture, and they must pay tuition.

The reasoning of the Board of Higher Education is, that architecture students receive a Bachelors of Science degree in architecture at the end of four years, and any work done afterwards is graduate work and therefore subject to tuition charges.

What the Board fails to realize is that to an Architect a Bachelor of Science degree is useless. Architects must obtain a Bachelor of Architecture degree requiring 167 credits to be eligible for licensing. Of these 167 credits 25 are paid for by the student. This is decidedly unfair, considering that engineers receive 148 credits free of charge.

The Department of Architecture must revamp its curriculum and create a five-year program leading to a Bachelor of Architecture degree, with no B.S. and no tuition.

Accreditization — When?

The Architecture Department of City College is not accredited by the State. This means that graduates must wait a year or two longer than graduates of an accredited school before they are allowed to take the New York State Licensing Examination.

Last month a meeting was held between architecture students and Dean William Allen (Engineering and Architecture). The meeting was "the culmination of gripes the architects have been submitting over two years." At that time, students complained about the non-accredited standing of the department.

A month has gone by and no move towards accreditation has taken place. No new action in answer to any of the complaints has taken place.

Professor Rappolt, Chairman of the Architecture Department is an engineer, not an architect. This is one reason, though not the only, for the Department's present standing.

Professor Rappolt must move quickly towards accreditation, or step down. It is, and has been his main responsibility to achieve this goal for as long as he has been chairman, and he has not fulfilled this responsibility.

The students of the Architecture Department have made it evident that they will not stand idly by for the status quo. Improvements must be forthcoming.

Inquiring Technographer

By PHIL BURTON

QUESTION: The present policy of the registrar's office is to certify all full-time students as draft deferable, even if they are on probation. In view of the recent Washington directive allowing the drafting of probation and part-time students, do you think that the policy of the College should be changed to give information on probationary students to the Selective Service Board?

WHERE ASKED: On campus. Ellen Haliczzer, Pol. Sci., 401. If a student is placed on probation by the College, this information should be made available to draft board officials. Most colleges do not put students on probation unless their work over a relatively long time is very poor. A student of this type is obviously not interested in education and his motives for being in college are questionable. He is certainly taking up space that could be used by a student whose interests are sincere.

This type of person is hiding behind the guise of "student." Perhaps an army uniform would be a more fitting uniform.

Haliczer Raymond

Raymond The Bagel Man. Yes, it is my opinion that the school will give the Selective Service Board information on who is on probation in order to replace them with students having higher averages. In this way, the school will maintain its academic standing.

Anita Nochman, Bio-Chem. 103. I feel that the students on probation should not be drafted. If these students were drafted the school would have taken for granted that they would not improve, that there was no hope for them. Therefore they would not be given the chance they deserve.

Nochman Farber

Paul Farber, Chem. Eng., 505. I do not think that all students should be drafted. Most students, such as engineers and science majors, are taking courses vital to the defense of our nation's security. Others, such as liberal arts majors, do not perform useful functions for the national defense. These, especially the peace-marchers, and ban-the-bombers, should be drafted if on probation.

Joel Shecter, Elec. Eng., 507. No, the college should keep its present policy because a student on probation is still a matriculated, full time student. The probationary status is not evidence that the student will not succeed in his college career. This status indicates that the person has for a short period of time, fallen below acceptable academic standards. There can be many reasons for this performance, and it may be only a temporary status lasting for only a term.

(Continued on Page 4)

(By the author of "Rally Round the Flag, Boys!", "Dobie Gillis," etc.)

YOU, TOO, CAN BE INFERIOR

The second gravest problem confronting college students today is inferiority feelings. (The first gravest problem is, of course, the recent outbreak of moulting among sorority house canaries.) Let us today look into the causes of inferiority feelings and their possible cures.

Psychologists divide inferiority feelings into three principal categories:

1. Physical inferiority.
2. Mental inferiority.
3. Financial inferiority.

(A few say there is also a fourth category: ichthyological inferiority—a feeling that other people have prettier fish—but I believe this is common only along the coasts and in the Great Lakes area.)

Let us start with the feeling of physical inferiority, perhaps the easiest to understand. Naturally we are inclined to feel inferior to the brawny football captain or the beautiful homecoming queen. But we should not. Look at all the people, neither brawny nor beautiful, who have made their marks in the world. Look at Napoleon. Look at Socrates. Look at Caesar. Look at Lassie.

What I mean is you can't always tell what's inside a package by looking at the outside. (Sometimes, of course, you can. Take Personna Stainless Steel Blades, for example. Just one glance at that jolly blue and white package—so bright and pert, so neat but not gaudy—and you know it has to contain blades of absolute perfection. And you are

"...when it came to tying granny knots."

right! Personna gives you so many shaves per blade it takes a math major to count them. And they are *luxury* shaves—smoother, comfortable, kinder to the kisser. Moreover, Personna comes both in Double Edge and Injector style. And as if this weren't enough, Personna is now offering you a chance to grab a fistful of \$100 bills from a \$100,000 bowl! The Personna Stainless Steel Sweepstakes is off and running, and you're all eligible to enter. Visit your friendly Personna dealer today to get details and an entry blank.)

But I digress. Let us turn now to the second category—mental inferiority. A lot of people think they are dumber than other people. This is not so. It must be remembered that there are *different* kinds of intelligence. Take, for instance, the classic case of the Sigafos brothers, Claude and Sturbridge, students at a prominent Western university (Dartmouth). It was always assumed that Claude was the more intelligent just because he knew more than Sturbridge about the arts, the sciences, the social sciences, the humanities, and like that. Sturbridge, on the other hand, was ten times smarter than Claude when it came to tying granny knots. But no matter; everybody looked down on "Stupid Sturbridge," as they called him, and looked up to "Clever Claude," as they called him. But who do you think turned out to be the smart one when their granny almost got loose and ran away? You guessed it—good old Stupid Sturbridge.

We arrive now at the final category, financial inferiority. One way to deal with this condition is to increase your income. You can, for example, become a fence. Or you can pose for a life class, if your college is well heated.

But a better way to handle financial inferiority is to accept it philosophically. Look on the bright side of poverty. True, others may have more money than you have, but look at all the things you have that they *don't*—debts, for instance, and hunger cramps.

Always remember, dear friends, that poverty is no disgrace. It is an error, but it is no disgrace.

* * *

GRADUATING SENIORS OF 1966 TAKE THE CITY COLLEGE PLACEMENT OFFICE YOUR JOB-SEEKING HEADQUARTERS FOR JUNE AND AUGUST 1966 GRADUATES

Engineering & Science —

December 9, 1965 — Townsend Harris Auditorium — 12 Noon
ing Session (All degrees) —

December 14, 1965 — Finley 217 — 6:00 P.M.

Arts — December 16, 1965 — Finley 217 — 12 Noon

It is suggested that seniors who intend to continue with full-
studies or who expect to enter military service upon graduation
find the experience helpful in their career planning. Please be
red that companies visiting campus are quite willing to talk
in those seniors who are not necessarily seeking immediate em-
ment.

In order to participate in the Placement Program for Graduating
ors **YOU MUST ATTEND** the appropriate **EMPLOYMENT
ENTATION.**

Gallagher On Tuition — The Essential Points

By TOM KRAUSS

The following is a summary of the essential points cov-
ed by Dr. Gallagher last Monday when he presented the
Administrative Council's revised program on tuition policy.
of this writing, the new proposal is still under considera-
by the BHE — the sole policy-making body of CU.

During his speech, Dr. Gal-
er dramatically tore up the
roversal "paper tuition" pro-
al, and firmly declared his full
port of free tuition in name
well as in fact. The new plan,
ased by unanimous consent
he Council, received a warm
come by most of the 1500
ple in Great Hall.

Dr. Gallagher said that the old
yker proposal would have
ntained adequate funds for
struction to prepare for the
cipated 1968 student popula-
bulge. He explained that the
n was dropped because it had
n grossly misrepresented to
public and could no longer
made acceptable. The plan
ould have saved time by func-
ing within the existing legis-
tion.

The new proposal was present-
to the BHE last Monday, and
ould require new legislation and
operation between the city and
e governments. It recom-
ends:

continued city maintainance of
free tuition in the six Com-
munity Colleges;

state support of "... the Se-
nior Colleges, graduate work,
teacher education, and central
services;"

use of state and city funds to
"... support both the State
University and the City Uni-
versity through state revenues
on a basis of parity and
equity ... ;"

use of city tax funds to
"... maintain the no-tuition
status of City residents by pay-
ing \$400 for each undergradu-
ate matriculant in the Senior
Colleges ... ;"

issuance of 40-year bonds to
fund the \$400 million con-
struction program for CU out-
side of New York City's debt
limit.

The Administrative Council be-
ves that these proposals
... would increase the State
port of the Senior Colleges
d graduate work from about
million to about \$71 million,
d reduce the City's contribu-
n to such units from about
million to about \$20 mil-
n ... This would "... per-
t much needed expansion in
e six Community Colleges."

Although CCNY teachers are
ong the best paid in the nation,
Gallagher stated that the per
pita cost of the College is ex-
tremely low. A federal program

(Continued on Page 4)

Senior Class Plans Wintersession Trip

By PEGGY WINSTON

Once again the Senior Class is sponsoring an Intercession
Weekend Trip. The three-day vacation at the Laurels Hotel
on Sackett Lake in Monticello is the first officially sponsored
intercession holiday in two years.

Last year no trip could be
scheduled because it was impos-
sible to override faculty objec-
tions. The primary difficulty,
which was also a problem in
planning this year's Senior Week-
end, was that the administration
felt a school-sponsored trip should
have some educational value.
Representatives of the Senior
Class, working with members of
the faculty, have found a way to
comply with this stipulation. Ar-
rangements have been made for
after-dinner speakers to discuss
topics of interest to the students.
It is quite possible that Sargent
Shriver will be there to talk
about the Peace Corps.

Of course, the idea of the Se-
nior Class Weekend is for the
students (of any class) to have

fun together. Upon arrival (bus
transportation will be provided),
students will be assigned rooms
and given time to settle down be-
fore the cocktail party and din-
ner. After dinner there will be
top-notch professional entertain-
ment.

The next day will be devoted
to all the indoor and outdoor ac-
tivities for which the Hotel has
ample facilities. There will be
ice-skating, sledding, toboggan-
ing and ice-boating. The Hotel
has ski slopes for beginners as
well as experts, and instruction
will also be available. It is best
to make reservations in advance
for rental of any ski equipment.
Indoors there are a swimming
pool, gym, and golf range, so

time won't hang heavy on any-
one's hands. On the third day, in
the afternoon, buses will pick up
the students to take them home.

The cost of the Senior Class
Weekend (including transporta-
tion, gratuities, cocktail party,
five meals, two nights, and use of
all except ski facilities) is \$36.
The trip is sponsored by, but by
no means limited to the Senior
Class. Reservations will be taken
starting this week in the Senior
Class Office, room 217 in Finley
Center.

If communications were good enough
you could stay in the sack all day

Moving your body around
is highly inefficient.

If communications were perfect,
you would never have to.
Of course, you would still
have to get exercise.
But that's your problem.

We want to make it easier for you
to contact people, learn,
get information, attend lectures,
and hold meetings.

We developed Picturephone*
service so you can see as well as talk
when you call. And be seen, too.
We introduced Tele-Lecture service
(two-way amplified phone calls)
to let you hear lecturers
in distant locations. And so you
could ask them questions
no matter how far away they were.

Right now, many students can dial
from their dormitories to a
language lab. Soon a student
will be able to dial into a
computer thousands of miles away
to get information for his courses.

Depending on the nature
of the information, he might get
his answer back audibly,
printed on a teletypewriter,
as a video image,
or a facsimile print.

Some of these services
are available now.
Others are being tested.

For the next week or so,
better get a move on.

Joel Dreyfuss, Arch., 509. The drafting of part-time students, I feel, is a form of economic discrimination, for many students in this category have to work and the more affluent will be deferred. Probationary students are often students without motivation and I doubt the value of their service to the army. The school should give all required information since not to do so would be to break a law.

Shechter

Dreyfuss

Paul Biderman, Poli. Sci., 501. I personally believe that the College should not release information on the students' academic status. Whether or not a student is performing highly in college is irrelevant to the major issue of whether they should be inducted. He is nonetheless a college student, and nonetheless in training for a bachelor's degree. The college has defined the academic limits of remaining in school; those limits define and should define one's draft status as well.

Biderman

Friedman

Michael Friedman, Graduate Student English, 931. I think all students can perform a higher function in the classroom than on the battlefield. It is easy to destroy — students, at least, ought to learn to create. It would only compound the grotesque immorality of the war in Viet Nam to force our young men to exchange their books for bayonets. Part-time students have no less, and often more, desire to learn than full-time students, and better serve our country in school than out. Our time could better be spent seeking peaceful alternatives to war than seeking the most efficient means of waging it.

CLUB NOTES

THE CLUB

"The Club" is going to Washington on December 11-12 to see the CCNY-American University basketball game. The cost including transportation, hotel, tickets is \$10.75. Limited seating is available. Please sign up (cash only) on November 24 at 1:00 P.M. opposite Bittenweiser Lounge in Finley Center.

HILLEL

On Wednesday evening, November 24, Hillel will hold a dinner in celebration of the publication of *American Zionism 1884-1904* by Professor Martin Feinstein of the College's Department of Classical Languages and Hebrew. Students and faculty are invited to attend. The cost is \$1.75 per plate, students 60 cents and faculty are guests of Hillel. For reservations call AD 4-7317.

(Continued from Page 1)

Mr. Knapp, of the City College's Film Institute, to give a talk at Tech Council's Oct. 28th meeting on the film's production. At this meeting Mr. Knapp flatly stated that films were not easy to make. First of all this was to be a documentary. In this type of film one must use teaching principles. This would be slow and possibly uninteresting.

Secondly, the type of audience would have to be selected. Logically speaking, the less technical the film is, the more interesting it would be to the largest number of people. It would be hard to make a technical engineering film interesting to architect majors.

Beset with these and many other problems, Tech Council

went to work. First it was decided that the film would be designed to interest high school seniors. This would govern the vocabulary, method of presentation and length. The film would include actual classroom situations as well as various engineering and architectural accomplishments around the city.

Next, the financing of the film was discussed. A price tag of \$20 per usable minute was given. The presumed cost for a 20 min. film would then be about \$400. Tech Council was sure it could obtain this sum. However, on November 6th, the film committee met with a representative of the Film Institute to discuss, among other things, the extra costs that could be involved. For example, color film, music, and professional titles would all raise the cost.

After all this was considered and tabulated, the cost was up

S. G....

(Continued from Page 1)

"Gallagher Plan," was unveiled at the S.G. open hearing Monday. S.G. is now undertaking a critical examination of the new formula.

Council allocated \$2500 more to the already allocated \$1000 for the teacher evaluation program. The reason for this was the increased number of factors involved in computer programming processes used in correlating the results of the survey. Council also set the ground rules for future negotiations with the Faculty Council on tenure decisions.

to \$1000. On November 11th, Tech Council discussed whether it would still be desirable to make the film at this price, more than double the original estimate.

Gallagher...

(Continued from Page 3)

to train 2000 high school dropouts per year cost \$3350 per person. This is "more than twice the per capita cost of CCNY."

When asked what chances a new proposal had for passage by the Legislature, Dr. Gallagher could only say that the equity of the plan ought to commend it. He gave no official comment on Rockefeller's boro-wide school construction proposal.

Dr. Gallagher believes that in the long run, a federal program will be necessary to reduce university fees across the nation. At present, CU is not eligible for federal scholarships because it does not charge tuition. Dr. Gallagher remarked that free tuition is actually equivalent to a scholarship for each student.

Sure
we
have
desk
jobs.

Desk jobs at Cape Kennedy, helping check out the Apollo moon rocket.
Desk jobs at an air base, testing the world's most powerful jet engines.
Desk jobs in Samoa, setting up a TV network to help teach schoolchildren.
The most interesting desk jobs in the world are at General Electric.

(Have a seat.)

First, why not sit down with the man from G.E. when he visits campus. Talk with him about your goals. He'll talk with you about the hundred different avenues available at G.E. to help you reach those goals.

You may be working anywhere in the world, doing anything in the world. From marketing appliances like a new oven that cleans itself electrically... to designing a computer that's no bigger than a suitcase.

Interesting problems. Important challenges. Real rewards, in money and opportunity. They're all part of holding down a desk job at G.E. Come to General Electric, where the young men are important men.

Progress Is Our Most Important Product
