STUDENT FEES

Administration Building Burns To Ground Von Wysmann Declares State Of Martial Law

Administration building at height of last night's blaze.

Last night, in a spectacular fire which brought four engine companies to the scene, the Administration Building burned to the ground. Fire Department officials called the administration "a total loss" and will conduct an investigation into how the blaze started.

Shortly after the fire, S.G. President Kurt Von Wysmann declared a state of national emergency and martial law, called out units of the ROTC to enforce a newly-imposed South Campus curfew, suspended the publication of *Observation Post*, officially banned the Independent Party, and suspended all future elections for Student Council.

"No more meetings of Student Council will be called," he added, waving a lighted match to and fro, "until this emergency is past. Meanwhile I have taken quick and decisive action under Section 72, Article 426a of the Student Government Constitution."

Leaders of the Independent Party could not be reached for comment. "I'd expected that," chuckled Von Wysmann.

Rumors indicated that President Gallagher will make an "important and appropriate announcement" in Lewisohn Stadium. It is said that President Gallagher will turn over all his

powers to Von Wysmann at a special coronation ceremony. Von Wysmann stated that all classes will be cancelled and the cafeteria closed between 12 and 2 P.M., "so that all loyal students can attend without coercion." Attendance will be taken. "Don't miss it," stated Kurt flatly, "... or else."

Speaking at a massive student torchlight rally in Jasper Oval, just minutes before the fire began, Von Wysmann denounced "those left-wing communist-oriented fringe groups which have already insidiously infiltrated our campus. We know who The Boys are," he added, "and we know their tactics. All 100% Americans stand united to oppose them." Confidential sources within the North Campus-First Party have indicated that the charters of such suspect radical groups as the Young Conservative Club and House Plan Association will shortly be revoked. Von Wysmann is presently conferring with Atty. Gen. Katzenbach about the matter.

At the rally, Von Wysmann also warned that the events of the next few days would "determine the fate of Americanism and free-tuition for the next thousand years!"

KURT von WYSMANN

He also spoke glowingly about the newly-planned campus improvements soon to be constructed under his administration. These projects include a North-South Campus highway, and a series of special camps to be built with Schiff Fund monies. "And we're going to concentrate on those camps as soon as possible," said Von Wysmann.

Ballagher 1-A As SS Hits Campuses

Special to Ecch News (RIP)

General Lewis B. Hearse, national director of S.S., has ordained that college men would be drafted in the near future. One of the first victims of this new proclamation is Dr. Guell Ballagher, President of the College. Dr. Albert Bowwow, Chancellor of the City University, has not changed his status, despite recent rumors to the contrary.

All well informed sources, with the exception of Dr. Ballagher, remarked that the President has been reclassified as "1-A" because of his participation in the free tuition preach-ins. As expected, Dr. Ballagher had no official comment. His unofficial remarks, are, as usual, unprintable.

General Hearse, better known to his cohorts as "King Lewis," or "Lewis XIV," has justified his action by saying: "I have a great deal of sympathy for these, er... folks; I am only following my law of the land." When asked to specify what law of the land he was following, King Lewis took from his trousers a little black book with red-fringed pages. "These laws were invented by our forefathers for our salvation," he said, and he held up the *New, Improved, Latest Edition of the True Man's Guide to Guilely Guiding the Misguided* (D.A.R.: Straight-from-God Publication). "I love the sound of that title," King Lewis added, "For years I have been repeating it to myself, until now, I am so thoroughly inundated in its deeply profound

(Continued on Page 3)

Flash Flood Hits Newspaper Office

A flash flood yesterday ravaged the office of PU, the College's most colorful (red, pink, etc.) newspaper, destroying most of the contents of the office and several of the less important members.

The cause of the holocaust was not known, according to College officials, but was supported by an overwhelming majority of the students. Immediately formed on South Campus was the *Special Committee Researching On This Unfortunate Mishap* (S.C.R.O.T.-U.M.). The North Campus reaction was the rise of the *Fanatic Advocates of Rightiest Tactics*.

With almost no place to run, the fleeing survivors were forced to compromise their principles and seek refuge in the *TECH NEWS* office. Ho Chi Mills, News Editor of PU, was barely able to drag himself through the door and with his last breath exclaimed, "Get our men out of Vietnam!" Receiving little more than a cold stare from Jose Spinster, Co-Editor of *TECH NEWS*, he quickly changed his tactics and croaked, "Bomb Hanoi, not to mention Peking!" "Peking?" inquired Spinster, slowly coming out of his usual fog. "I told you not to mention Peking!" gasped Mills, who was still being generally ignored. He lost consciousness soon afterwards while trying to conduct a teach-in on the flood.

The flood was quickly brought

Neighbor of PU helping to bail out.

under control by the Worms Guards, despite the jeers and protests of a large group of North Campus students. They applauded wildly each time the Guards' bucket brigade to the Men's Room broke down.

When permission was needed for the PU refugees to reside in the *TECH NEWS* office, Co-Editor Milque Creamer and faculty advisor Dr. Piggy could not be reached. They were reported to have been seen running in the direction of the Harlem River carrying several boxes of wrenches and assorted plumbers' tools.

The City College Accepting No Freshmen Next Year

The Admissions office announced today that there will be no incoming Freshmen Engineers this fall. Due to the refusal of many engineering seniors to complete their required courses, mainly P.E. 4, there will be no room for the aspiring Techmen.

When asked if the draft quotas had any effect on the seniors' wish to stay in school, Dean of Admissions Noroom said, "No, I think these are just a bunch of boys who love City College and want to remain here a while longer."

Dr. Gullagher, President of the College stated, "This is a very advantageous trend for the School of Engineering and Architecture. Too many students were zipping through the courses too rapidly by carrying 24 or 25 credits a term. They had no time to relax and fully develop in the College atmosphere. Why it was not un-

DEAN NOROOM

common for an architect to graduate in three years or less. It is unfortunate that students will be denied admission in the fall, but perhaps they are lucky. The City University is going to pieces anyway."

Jack Kopulates, Drech Council President, felt that the decision to eliminate freshmen was a good one. "Freshmen never know their way around campus or nothin'." When it was explained that this was only a temporary measure, Kopulates replied "Schuckydarn."

Harry Greek, President of the Louse Plan Association, said he regretted the loss of the class of 1970. "We should be happy that this happened now and not last year," Hary emphasized. "We can do without '70 Houses better than we can do without '69."

Money, Money, Money!

Hey People, this is the real thing! That's right, we're actually giving away money! Twenty-five smackeros, shekels, cool green, hot coin, mint jazz! And we're giving it to YOU!

You want to know all about it, huh? Can't wait to get your hot little hands on the stuff? Well, you'll have to work a bit, but you're not afraid of a little work,

are you? After all, it's better than Viet Nam!

It's very simple. See that thing on the top of the paper? That's called a nameplate. N-A-M-E P-L-A-T-E. See, you know something about a newspaper now. Aren't you proud? I'll bet your mommy and daddy are proud. Look, even your girl friend is proud! Now, now guys back to

work, and stop showing off your proud to your girl friends.

Now that nameplate up there is pretty old and pretty blah, like vegetables without Accent. So what want you to do, boys and girls, is make a new nameplate up for your rich old Uncle Tech News.

Now I know you're confused

Tech Drivel

TECH NEWS does it again! After reading Rachel Ostrowitz's article about the multitude of female engineers at City College, Rocky Cool, undergrad president and four letter man at Harvard Engineering, is giving up his \$5,000-a-year scholarship and expense account to attend our hallowed halls. When contacted for comment, the "Radcliffe Ravager" was quoted as saying, "Lemme at 'em!" among other unprintable statements. Stepping into the vacant office of the presidency is Adrian Quean. With visions of running the all-boys school flitting (how appropriate) through his head, Adrian fainted at the suggestion that he follow Rocky's example.

Dubious congratulations to a brother engineering school, south of the Mason-Dixon line. After suffering much abuse at the expense of their name, The Nashville Undergraduate Technical School (NUTS), decided that it was time for a change. Best of luck to the newly named Tennessee Institute of Technological Studies.

Speaking of southern engineering schools, not to mention strange names — strange names? (You really didn't think I was going to go through that whole thing again, did you?) Anyway, in the southwest, there is a hot rivalry going on. At San Jose (pronounced SAN HO-ZAY), the claim is being made that they hold the record for the most lost surveying transits in the desert sands. However, the engineers at La Jolla (pronounced EL PASO), contend that the record is rightfully theirs. An editorial in the La Jolla PATO states the case for that institution. They base their claim on the fact that San Jose is a co-ed institution, and naturally, there is "more reason to go out to the desert sands to get lost." The transits, they say, "are a mere pretext." On the other hand, (we find five fingers), "the La Jolla boys are dead serious when they go out in the desert together." We urge you to take this statement at face value, and draw your own conclusions.

Here's the latest news from the Sam Houston Institute of Technology on their decision to secede from the Union. According to Student Government president, Davis Jefferson, the action will be undertaken if the present "unbearable conditions" are not corrected. These conditions refer to: 1) spending a whole hour in astronomy class discussing the "Northern Lights," 2) use of "Grant" projectors and screens; 3) referring to the student center building as the Student "Union;" and 4) using the "Linkin' Principle" in chemical engineering. The actual secession will depend on whether these conditions are remedied. Until then, just to keep momentum, the students will stage demonstrations at the Alamo, Huey Long's birthplace, and three former cotton plantations. Governor Walliss of Alabama will deliver a speech, "The Effect of a Liberal Education on Southern Manhood" (or "Why My Wife is Running for My Job Next Year").

Story Of The Living Bra

Living clothing has been available for several years, and although its many advantages are well known, very little is understood about its reproductive habits, life cycle, social customs and taboos. After extensive research, we are proud to present the following report.

The living bra, or mammarius animatus, is native to India, and is a distant relative of the African coconut palm. Feeding exclusively on milk, it is found only on the great plains of southern India. The young bras, cup shaped from birth (usually A or B) hop aimlessly about for the first few weeks after birth, then settle down to the difficult task of finding food.

The young bras will accept milkweed or coconut milk when hungry, but prefer animal milk. Quite agile, they can quickly attach themselves to any stray animals in their vicinity.

Each of the two cups of the bra (it is bi-cupped) is equipped with a small suction device located on the inner concave surface of the beast. Surrounded by thin, sharp teeth, this construction allows the bra to attach to the mammary glands of its intended victim, or host. Or hostess. This is a symbiotic relationship, the bra providing support and the host, su-

A Living Bra

stenance.

After about three years of life the bra begins to change form. This is called the change of life. In less than twenty seconds, its body elongates and fills in, while many internal changes take place. In its new form, the animal is called a living girdle, or embra-

cius animatus. The mature bra, or girdle, is no longer a symbiote. In its early (bra) stage, it stored away a much food as necessary, and now

(Continued on Page 4)

Beavers, Arise!

During one of our infrequent journeys southward into Columbia land, we stumbled into a top secret meeting of Columbia and Cornell University powers. While we sat unobserved for a time (each delegation obviously thought we were from the other school), we learned of a plot that threatens the very existence of the City College.

Columbia University, which owns Rockefeller Center and other property in Midtown Manhattan, proposed to Cornell, which owns much land in downtown Manhattan, that they will turn over all their property south of Fifty-ninth Street, if Cornell assists them in obtaining all the land on Manhattan Island north of Ninety-sixth Street, so that Columbia might expand its campus.

If this dastardly plot is allowed to succeed, City College will be a vassal to the nefarious and homogeneous pseudo-Lions of Columbia. We protest this gross attempt to steal our campus right from under our feet. We refuse to become the newest dormitory and Girls' gym of the Columbia fascists.

Arise ye prisoners of computerization! Proletariat of City College unite, you have nothing to lose but your slide rules! Today, Friday, April 1st, between the hours of 11:30 A.M. and 1:30 P.M. (when you're not allowed to do your homework in Shepard Cafeteria) rally, gather, organize, unite, assemble, come on down to the Quadrangle! We will march on the fascist, Birchist, rightist, reactionary, capitalist, Columbia University sprawl below us! Sic temper tyrannus!

Confessions Of An Engineer

Here's the story, man. Like, when I was a freshman, see, I hadda' major in somethin'. I saw this nice building with exccalators, and I said "Jim, this building's for me." So I was an engineer.

My first term I had a meeting with an adviser. He wanted to know like, what I would be takin' and when. I told him "Man, like I don't know. I just wanna take it nice an' slow, and mebbe graduate in five, six years." "OK" he told me, and wrote down the stuff what I should take.

Anyway, man, I went through my first year takin' stuff like social studies, speeck, health ed., chem, math. I was jus' waitin' for the time when I would be in that buildin' with those exccalators.

I usta' have social studies in Downer. One day I made a wrong turn, an' ended up in a place with tables and food and gurls and gurls. Man, you should've seen the gurls — big ones, short ones, blondes, brunettes — man, that was some scene. I toke one look at those gurls, and lemme tell ya, I didn't go to no social studies — I sat down next to some beautiful chick and just dug her for an hour. Man, that was a helluva lot betta' than those exccalators.

Next time I had social studies, I looked for this place again — I couldn't find it, but I found me somethin' better — this lawn, like

with people on it. I looked around and there it was — like 80 million gurls. I walked around a bit, jus' looking over the merchandise — and, damn, if there were 80 million gurls, there were 90 million gurls. I kept walkin' around, and I found myself in back of this building. There were 'bout three people there, jus' sittin' around smokin' funny shaped cigarettes. One o' them was smokin' a pipe with funny smellin' tobacco. I went up to him and asked him "waddya smokin' dere?" "Mix-ture of 79," he called back.

Anyway, like I really went for this lawn, and the people on it. It was a really nice scene. It made these exccalators look real bad. So I went up to my adviser, and told him, "Man, I don't wanna go to school no more." And they gave me what they called a "Love of Absence" type thing. So there I was — out of school and jus' hangin' around that lawn. I needed somethin' to do, cause I needed some bread, so I got me a job rakin' leaves on the lawn. Lemme tell ya', guy, those exccalators are nuthin' compared to this.

Tech Council Dialogue

By MISS INFO MAYSHUN OTT

Jack Kopulates (Pres.): The meeting of Tech Council will now come to order.

Lip Kisser (V. Pres.): Order? I'll have a tuna on rye, a piece of cheese cake, and a coke.

Kelvin K. Kemistry (AICHE): I'll have some moldy salami on stale white with rancid cole slaw on the side, but please don't give me any of that North Campus coffee.

Jack Kopulates (Pres.): Police, I mean please let's keep this meeting off the topic of sanitary engineering.

Ken Flakeoffman (Rec. Sec.): Does meeting have two e's or two t's?

Jack Kopulates (Pres.): On the (Continued on Page 3)

Photo Club will demonstrate new techniques for developing in the darkroom without red safelights.

Anarchist Discussion Society refuses to meet.

g Bra

Over The Gates

The University of Miami announced the addition of an underwater basket weaving course. The board of trustees said eight credit course will be required for all B.A. candidates. Student reaction was generally unfavorable. Lance Scuba, Miami U. sophomore, complained "Most of us are here for a good time. We didn't pay all that tuition to have to work." Sissy Fur, a coed, remarked, "I didn't spend four years in high school for nothin'."

A study conducted at New York University found that student values have changed little in recent years. Most undergrads still respect "purple muscle shirts and two-toned Conneville convertibles as the mark of success." Asked about this as a goal in life several N.Y.U. students replied, "I'm not spending four years in college for nothin'."

A news item from F&V (Fruits and Vegetables) indicates that 80% of the students have changed their major from fruits to vegetables, primarily potatoes. The reason for the switch seems to be a widespread student belief that "there are enough fruits in the world."

The National College Bureau has released figures on morality on the college campus. The study shows that 80% of all college girls indulge in sexual relations. The other 20%, the study said, go to City College.

The University of Washington is planning its Second Annual Smokey Expedition, a student sponsored journey to the mountains of Virginia to search for the legendary figure Smokey T. Bear. Harry Head, student leader of the expedition, said that the purpose of the search is to recruit Smokey as the new symbol for a legalized pot campaign. "With his name he'd be a natural." Head said.

The rumor that Hunter College is a Subway School was refuted by Hunter S.G. President Birch Right. He said, "It is a dirty fascist, pinko, commie, peace-creep lie! Some of us are smokin' a pipe on take buses."

Students at Oswego State have found a new way to earn spending money. They are selling vital body fluids to blood banks, sperm banks, etc. One student was quoted as saying, "With quick wrists you can make a fortune in no time."

Japanese students on the West Coast have begun plans to open a new university for oriental studies. The school is to be called U.C.R.A.

Pink Punks Out

By KAPITAL O. TETEO and Z. CUBED

In a surprising announcement, Dean Pink of the Office of Circular Guidance stated that he would be resigning his lucrative post. Replacing him will be Professor Bruce Wayne (Ph.D. Camp) a graduate of Gotham University.

In an exclusive interview, Dean Pink commenting on his resignation from circular guidance said, "I have always found my work in this office very rewarding and worthwhile, but I finally had enough of a good joke." Dean Pink has vehemently denied that he was compelled to resign after accidentally taking one of the vocational guidance tests in his office.

It has been rumored that Dean Pink is working for P.U., but he will probably accept a job in the tutoring program offered by a group of prominent Harlem children to aid City College dropouts.

Prof. Bruce Wayne brings with him an excellent set of references, including the Police Commissioner and Aunt Harriet. Students wishing to see him will have to make an appointment with his secretary, faithful Alfred. It has been hinted that Prof. Wayne is a homosexual, which should make him a very valuable liaison with the slide rule set.

This reporter questioned Prof. Wayne on a few important matters concerning the college.

"What do you think of the recent reports of muggings on St. Nicholas Terrace?" "I don't think these reports are valid. There are three types of girls which attend City College; beautiful, intelligent, and the majority. You know even criminals have minimum standards. Besides I haven't found any muggers that carry the necessary ten foot pole to perform this highly personal task."

"Is there any way to stop college cheating?" "In my long experience I have found it almost impossible to stop faculty members from committing this infraction."

"Is it true that you have hired detectives to spy on students?" "I have hired a special group of students called the Pimpley Peeping Panes. These students spy while sitting on the window sills of the Pimpley Student Center. They have been very effective: not one window has been stolen in ten years."

"Do you see any way of stopping crime in the City College?" "Yes, fifty per cent of the crime would be stopped if we eliminated the Bums guards. The other fifty per cent would stop after their corruptive influence wears off."

Prof. Bruce Wayne excused himself and left for the bathroom.

Money . . .

(Continued from Page 1)

about all this, and your head hurts because you've learned a new word today. So just go home, rest, and wake up bright and early tomorrow morning and get to work on the nameplate, and make yourself some kale, bread, bucks, greenbacks!!! Who knows, maybe your girl friend will show you her proud after you show her the money, and you can be proud together!

Council . . .

(Continued from Page 2)

agenda we have a discussion of the tutoring for the draft exemption examination for dirty, bearded liberal arts students.

Jon Spinster (Tech Noose, English Maj.): I protest; liberal arts students are not bearded. Besides some of my best friends are (sick) "engineers."

Jack Kopulates: We will now hear from the tutoring program coordinator.

Mortified Pisher (Treas.): An article that appeared in Tech Noose about tutoring was very confusing. Look, here in the first paragraph a word with more than two syllables — it's confusing. Besides they spelled my name wrong. It has two s's and no "h."

Sidney Slobsky (H.K.N.): I don't wanna tutor those guys. They should get a bullet in their gut before I do. Let them fail that ludicrous exam, I won't tutor. Jack Kopulates: You have to tutor, I forbid you to refuse, heil.

At this point the Greek letter honor societies engaged in a Pi throwing contest.

I. Savarin (ASCE): Our society will go on a field trip to the sewers of New York. Last year we went to the battle fields of Viet Nam and an enjoyable

(Continued on Page 4)

Ballagher . . .

(Continued from Page 1)

meaning that I cannot go to sleep without hearing myself say these magic words exactly three times every midnight."

In making the reclassification, Lewis XIV stated, "According to the NILETMGGGM, there are several acceptable causes which can legally be demonstrated for, such as: Women's suffrage, a 56 hour work week with a 25¢ minimum wage, the Holy Alliance, Richard Nixon, Spanish noble rule of Cuba, and Independence from England. Unfortunately for Dr. Ballagher, Free Tuition was not on the approved list. Therefore I had no choice but to punish Dr. Ballagher and to make his case a warning to others. And a word to the wise is sufficient," he added.

Dr. Ballagher's previous classification was "1-Y," a deferment for minor physical disabilities. Reliable but confidential sources have identified these disabilities as a weak spine and color blindness to red, which is found in profusion on colorful South Campus.

King Lewis added that "everyone in the younger age brackets has been used up. Besides, we could use a few intelligent people in the army."

23rd Psalm Updated

The Lord is my external-internal integrative mechanism,

I shall not be deprived of gratification of my viscerogenic hungers or my need dispositions.

He motivates me to orient myself towards a non-social object with affective significance,

He positions me in a non-decisional situation.

He maximizes my adjustment.

Although I entertain masochistic and self-destructive id impulses, I will maintain contact with reality for my superego is dominant.

His analysis and tranquilizers, they comfort me.

He assists in the resolution of my internal conflicts despite my Oedipal problem and psychopathic compulsions.

He promotes my in-group identification.

My personality is totally integrated.

Surely my prestige and status shall be enhanced as a direct function of time

And I shall remain sociologically, psychologically and economically secure forever.

Industry Today

One year ago, Bell Telephone Lab scientists announced the development of a radar unit called AN/GPS-402. This dual unit is mounted on two sets of bi-peds.

The receiving set consists of a streamlined cabinet with two sensitive tuning knobs; a coast button and a cavity of the resonating and receiving type. The transmitter's main feature is its 15 centimeter monopole which is inserted in the receiver. The set is activated by vigorous push-pull mechanism.

Since the unit's introduction one year ago, several problems have arisen.

One basic problem is that the two units have different warm-up times. In most cases the transmitter reacts to the slightest stimulus, and is ready to function instantaneously. The receiving set possessing more sensitive components, requires a longer period of time to approach the optimum temperature at which performance is most satisfactory.

Soon after the mass production of the AN/GPS-402 began, some deviations from normal behavior patterns were detected. No reason has been pinpointed for the malfunction but some transmitters proved to be more compatible with other transmitters than with receivers. Though the power of creating new parts was lost through this mode of operation, the other functions are said to be served.

While distributing these sets to various parts of the nation, the components were under great stress for long periods of time. Scientists feared the consequences of these pressures, but the sets have unexplicably developed means of releasing static energy by self activation.

The receiving sets, though slow in warming up, often become overheated while oscillating. When this happens, it is difficult to disengage the units. Continued operation under these circumstances is often harmful to the transmitter, which needs periodic lay offs to accumulate lubricant. Otherwise, its capacitors may become worn out.

In spite of its problems, Bell scientists state that no other device has been invented that can replace the AN/GPS-402. After experiencing it, operators state emphatically that they could not function without it.

Scraps

There is a merger among the newspapers "Main Events," "Observation Post" and "The Campus." The new name for the paper will be "Observations of Events on Campus."

Living Bra...

(Continued from Page 2)
has neither excretory nor digestive organs.

For this reason, the life span of the girdle is somewhat less than that which it enjoyed as a young bra. After, in many cases, only two years, the girdle begins to lose its shape and is soon discarded. It has been rumored that there is a third stage in the bra-girdle development, that of the automobile tire, but scientific investigation has shown this theory to be unfounded. As everyone knows, automobile tires grow not from where you might think, but from decayed mandrake root.

On Campus with Max Shulman

(By the author of "Rally Round the Flag, Boys!", "Dobie Gillis," etc.)

WAKE ME WHEN IT'S OVER

The trouble with early morning classes is that you're too sleepy. At late morning classes you're too hungry. At early afternoon classes you're too logy. At late afternoon classes you're too hungry again. The fact is—and we might as well face it—there is no good time of day to take a class.

What shall we do then? Abandon our colleges to the ivy? I say no! I say America did not become the hope of mankind and the world's largest producer of butterfats and tallow by running away from a fight!

If you're always too hungry or too sleepy for class, then let's hold classes when you're not too hungry or sleepy: namely, while you're eating or sleeping.

Classes while eating are a simple matter. Just have a lecturer lecture while the eaters eat. But watch out for noisy foods. I mean who can hear a lecturer lecture when everybody is crunching celery or matzo or like that? Serve quiet stuff—like anchovy paste on a doughnut, or steaming bowls of lamb fat.

Now let us turn to the problem of learning while sleeping. First, can it be done?

Yes, it can. Psychologists have proved that the brain is definitely able to assimilate information during sleep. Take, for instance, a recent experiment conducted by a leading Eastern university (Stanford). A small tape recorder was placed under the pillow of the subject, a freshman named Wrobert Wright. When Wrobert was fast asleep, the recorder was turned on. Softly, all through the night, it repeated three statements in Wrobert's slumbering ear:

1. Herbert Spencer lived to the age of 109 and is called "The Founder of English Eclectic Philosophy."
2. The banana plant is not a tree but a large perennial herb.
3. The Archduke Ferdinand was assassinated in 1914 at Sarajevo by a young nationalist named Mjilas Cvetnik, who has been called "The Trigger of World War I."

When Wrobert awoke in the morning, the psychologists said to him, "Herbert Spencer lived to the age of 109. What is he called?"

Wrobert promptly answered, "Perennial Herb."

Next they asked him, "What has Mjilas Cvetnik been called?"

Wrobert replied, "Perennial Serb."

Finally they said, "Is the banana plant a tree?"

"To be honest," said Wrobert, "I don't know too much about bananas. But if you gents want any information about razor blades, I'm your man."

"Well," said the psychologists, "can you tell us a blade that shaves closely and cleanly without nicking, pricking, scratching, scraping, scoring, gouging, grinding, flaying or flensing?"

"Yes, I can," said Wrobert. "Personna® Stainless Steel Blades. Not only does Personna give you a true luxury shave, but it gives you heaps and gobs and bushels and barrels of true luxury shaves—each one nearly as truly luxurious as the first."

"Land's sake!" said the psychologists.

"Moreover," said Wrobert, "Personna is available not only in the Double Edge style blade, but also in the Injector style blade."

"Great balls of fire!" said the psychologists.

"So why don't you rush to your dealer and get some Personnas at once?" said Wrobert.

"We will," said the psychologists, twinkling, "but there is something we have to do first."

Whereupon they awarded Wrobert an honorary L.L.B. (Lover of Luxury Blades) degree, and then, linking arms, they sang and danced and bobbed for apples till the campfire had turned to embers.

If you're looking for an honorary degree yourself, we recommend B.S. (Burma Shave®)—from the makers of Personna. It soaks rings around any other lather; it comes in regular or menthol.
