Fresh from a rest at 'a ranch' in California, President Robinson returns to the 'battlefield' of City College to continue his 'umbrella attacks'. While prominent liberal educators would not touch Hearst with a ten-foot pole, 'our' president has become his brother war-monger, red-baiter and free-speech censor. Witness Robinson's article in Hearst's New York American, calling for the expulsion of all students who would deviate from his fascist norms.

'Our' president has proven time and again his position in regard to war. He has encouraged R.O.T.C. He has expelled militant student fighters against war and fascism.

In 'welcoming' 'our' president back, we give him this immediate warning. Let him keep his hands off the April 12th International Student strike against war and fascism! When students of City College mass on the campus on April 12th, they will then be fighting for their lives by refusing to fight for the interests of Hearst, DuPont, etc. Surely 'Robbie' cannot object to that! 31 students and 2 instructors of City College were killed in the last war. This must not happen again!

Demand the abolition of R.O.T.C. F.E.R.A. funds, not battleships! Oust President Robinson! Reinstate 21 anti-fascist students! Down with imperialist war and fascism! For the defense of the Soviet Union!
