Roth and Roman to Testify; 'Asa' to Deliver Evidence

Wright, BHE Get Plea 'Remove Knickerbocker'

Council Reaffirms Its Pro-reinstatement Stand

WEDNESDAY, MARCH 7, 1951

By FRED BORETZ

Al Roth and Ed Warner of CCNY and NYU's Connie Schiff went before the Grand Jury last week as two new persons entered the current basketball investigation.

Meyer "Asa" Alexander of Brooklyn, a close friend of Eddie Gail, who worked up voluntarily last year's NIT, said yesterday he had been approached by an undercover officer of the Manhattan District Attorney and asked to help bring the basketball players before the Grand Jury.

"I know a lot about this. What I have to say will involve big names; big people such as you never dreamed would be mixed up in this," he said.

To Help Eddie

Alexander said he made the denunciation in a tape. The Grand Jury, though not affiliated with LIU, Alexander used to refer to the case of the three Jewish students who went into the army last week, now to be available to serve as star witnesses at the trial of five men charged with attempting to fix two Manhattan games.

In another action yesterday, B. Williams, assistant District Attorney, said that Junius Kellogg, Manhattan College basketball player who went into the army last week, will be available to serve as star witness at the trial of five men charged with attempting to fix two Manhattan games.

On Thursday at 12:30 in Docenus Room 216 Ms. Gail will present her statement to the Grand Jury. The hearing is being held to determine if there is enough evidence to warrant a trial for the basketball players.

Joe Galiber, re-elected last year's Grand Slam team, will speak in favor of reinstatement at the meeting. Joe is currently working in the office of the Bronx District Attorney and is known for his strong support of reinstatement. He will be joined by others who have been working with the team.

June Draft to Be Nothing Like 1942

Current developments in Washington and precedent set in World War II make it likely that City College will become a haven staffed with boy volunteers. According to reliable sources, the College will face a situation comparable to that of the last war when the great bulk of the male enrollment was in military service. This is due to the fact that a similar situation does not exist. In World War II we had a total mobilization with an armed force of eleven million men. Now, however, the armed services maximum quota has been set at approximately three and one-half million men.

This important fact must be borne in mind as we try to examine this case. In 1942, all students who began the school year were deferred to the armed forces. In 1951, all students who begin the school year will be deferred until the conclusion of their senior year. Coupled with this, we have the fact that our student body was and still is composed of many young men below voting age.
