Senior class activities for the rest of the semester, as announced by class president Harry Pollack, will be highly irregular due to the following three affairs: Class Night, the college prize, and a final exam. Class Night, the class's social event, will be held on May 5. Casting for the show begins on April 15. Interested seniors can apply at the Senior Center.

The Farewell Ball, to be semi-formal, is scheduled for either June 12 or 13 in a downtown hotel, chosen as yet. Only upperclassmen seniors may attend.

The Numeral Lights, an informal musical entertainment, will be held on June 14 at the Quadrangle.

President Buell G. Gallagher has refused free television time to the college until the conclusion of the dismissal of Nat Holmes.

The Queens College Student Congress held an all-day session on April 16 at the Great Hall to consider the Council's right to pass legislation and to adopt a code of ethics in conjunction with the Council Committee on Student Publications. If the code is accepted by the College's Faculty Senate and the Council, the code will be implemented.

Roy Weber, Business Manager of The Crown commenting on the code said, "although we believe newspapers should have a code, we do not believe the Faculty Senate or Student Council should regulate the newspapers. Their approval of such a code would be a form of regulation."

In an editorial on the issue The Crown asserted, "We cannot freely agree to banish publication of our newspaper."

The Queens College Student Congress passed the motion after the Crown printed an advertisement for the Labor Youth and Students League, urging students to join on the Attorney General's 'advisory list. After the Student-Faculty Committee on Student Publications affirmed Council's right to pass the resolution, student groups presented a Declaratory Resolution for a referendum on the issue.

Debating Team Finishes Third

The College Debating Team captured third place at the Hofstra intercollegiate debate tournament, Saturday, March 27. Competing against twenty-eight schools, they won five out of the eight debates they participated in, the topic being: "Resolved, that the US adopt a policy of free trade.

Dartmouth College took first place, while St. John's College and Marywood tied for second.

The College's negative team of Morton David and Alvin Greenberg won all of their first round debates and the affirmative team of Abe Cohen and Joe Blecker won two out of four.

The team also defeated the visiting debates and the affirmative team of Abe Cohen and Joe Blecker won two out of four.

The team also defeated the visiting debate team from Rochester in both affirmative and negative debates, the topic being: "Resolved, that the US adopt a policy of free trade.

Other major items include $80,000,000 for increased enrollment in six new regional centers; $80,000,000 for increased enrollment in 114 new municipal centers. CCNY, Brooklyn, Queens and Hunter; $41,000,000 to expand the airport and transportation system; $30,000,000 for a new Community College Center, enlargement of the custodial labor force; $100,000,000 for the National College of Education, $20,000,000 for the Manhattanville additions. Also, provided for in the bill is an appropriation for the maintenance of the Manhattanville campus.

Mayor Robert F. Wagner, in his proposed budget for fiscal 1955, has placed an appropriation for the maintenance of the Manhattanville campus.

In his budget message to the New York City Board of Estimate, Mr. Wagner called for increased state aid to the municipal colleges. The mayor cursed the state administration for failing to "assume its rightful responsibilities in the field of higher education and the City of New York just as it does for residents of so many other counties outside of the City of New York."

The mayor declared that he has provided for in the mayor's request for the BHE is one and a half million dollars for salary increases of $400 per year for the teaching staff.

More Information

Students who wish to attend the Labor Youth and Students League debate tournaments, which are in New York City, may meet in the first year of the League. For further information as well as feathers and buttons from the University of Wisconsin, call 

Students Start Drive Against McCarthyism

By MELINDA FABER

Students in various colleges throughout the country have begun wearing green feathers as a symbol of their protest against Senator Joseph McCarthy.

The movement arose as the University of Michigan's attempt to be swallowed up the "Robin Hood" by one of the Indiana Textbook Commission because it allegedly favored Communist principles. The green feather was first adopted by student of the University of Illinois as a symbol of their "loyalty" to the Men of Robin Hood. It has spread to other campuses including the universities of Wisconsin, Illinois, and Michigan.

In Michigan, the movement started spontaneously when several groups of students discovered that they were all opposed to the increasing spirit of McCarthyism in the schools and sent for information as well as feathers and buttons from the University of Indiana.

 problems...

There will be a panel discussion tomorrow evening in the student center. The faculty panel dealing with problems the beginning teachers meet in the first year of service teaching. All students engaged in this Spring semester are invited to attend.

Mayor Robert F. Wagner, in his proposed budget for fiscal 1955, has placed an appropriation for the maintenance of the Manhattanville campus.
In this issue, you will find a post-sized version of OP, which we call our Magazine Section. It is the first Magazine Section ever to be published by a City College newspaper, but we hope it will not be the last. We hope to come out with similar issues at times when occasion demands and finances and energy permit.

Despite its puny size, the topic with which this section deals is immense. Academic Freedom, to which the College is devoting a special week starting tomorrow, is difficult to define.

We do not present this issue as the last word on Academic Freedom. To do so would take far more pages than we have filed. What we have attempted to do is to illus-
Filmer's Lost Weekend Used in Shooting Talkie

After the last class on Friday is it rumored that many CCNY students leave all thought of school behind as they hasten to go to India and do films for UNESCO. Northwest, not so the pupils of Films 17, who often spend both their weekends and holidays on location. shooting scenes for their current production.

At present the class is exposing film at the request of the Speech Department on a movie concerned with the problem of children who do not afford to be this wasteful. The idea for a seismological station first originated with President Harry N. Wright, about ten years ago. It materialized a few years later, supplied with needed funds in a gift by Professor Joseph C. Babor (Chemistry).

The seismograph, a delicate instrument, measures the tiny vibrations in the earth's crust and thus determines the presence of earthquakes. The distance of the quake is determined by the use of an exact chronometer which goes wrong only by fractions of a second per day. Such an instrument requires the utmost precision and, says Prof. O'Connell, our station is one of the best and most modern in the country.

Only about a dozen or so colleges in the United States have active seismological stations and there are only two working stations in the New York area.

The success of seismological research depends greatly upon cooperation between the various stations, and upon a department, which organizes the material. This department is the United States Coast and Geodetic Society, a governmental agency in Washington, which acts as a central body the results were considered.

The recording instrument, a seismograph, is part of the College's Babor Seismograph Station, located in the College's Babor Seismograph Station, and the Babor Station sends a seismogram report to Washington each day. The present planning has it that the seismograph will be moved by about that date.

"Chrome Clad" STEEL TAPES are preferred by engineers

When you go out on the job, you want the most durable steel measuring tapes you can get!—Lufkin "Chrome Clad." The jet black markings won't wear off for they are bonded to the line and protected by multiple electroplatings that further build up the fine tape steel from which the line is made. The resulting line is heavier, stronger, and most rust and corrosion-resistant. It is easier to read, easiest to clean, and won't surface crack, chip, or peel. Only Lufkin tapes are available with "Chrome Clad."

Kucklinca Set For Top Year

Mike Kucklinca, one of the scrappiest second basemen in the Met Conference, found himself shifted to shortstop as Larry Cutler returned to the team this season. Nevertheless, he is looking optimistically toward his best year—both on the field and at the plate.

After a dismal start last season, in which he went one-for-nine, the 5-foot-8-inch speedster went on a hitting spree that netted him an average of .380. He also led the Conference in runs scored and tied for the team leadership in stolen bases.

The possessor of a good “eye” for pitches, Mike has been moved to the lead-off man. Normally a punch-hitter, he can place hits to all fields and get a quick jump away from the plate, something that few righthanders can do. Teamed with Cutler, a superb fielder, he should be part of the best double-play duo batters can do. Teamed with Cutler, a superb fielder, he should be part of the best double-play duo batters can do. Teamed with Cutler, a superb fielder, he should be part of the best double-play duo.

Beaver Weightlifters Place Second

In National Intercollegiate Match

A powerful team from Ohio State University, sparked by Olympic Champion Pete George, romped to victory in the second annual National Intercollegiate Weightlifting Championships last Saturday night at McBurney Y in Manhattan. The City College Barbell Club finished second. The winners scored 35 points and the Beavers netted 22.

Old records were shattered and new ones set throughout the night. The grueling competition continued for over five hours. Alvin Brock, New York State Heavyweight Champion and captain of the College's weightlifting group, established a new record with a 285-pound press. His total of 409 in the press, snatch, and clean & jerk which are the three Olympic lifts was high enough to win the heavyweight class. City College's other Champion, 185-pounder James Kern, totaled 345 to take this division.

In the 148-lb. class, superb lifting was turned in by Bobbie White, George Washington University's star lifter. Climaxed by an impressive 275-lb. clean & jerk, his 660 total outdistanced all competition in the class. But it was the lifting in the 148-lb. class which provided the hundreds of thrill in both the audience with most of the thrills.

It was a foregone conclusion that Ohio State's Pete George would have too much difficulty retaining his title.

Today's CHESTERFIELD is the Best Cigarette Ever Made!

“Chesterfields for Me!”

Robert Kinningsi, Notre Dame '56

The cigarette tested and approved by 30 years of scientific tobacco research.

“Chesterfields for Me!”

Deborah Kerr, Star of the Broadway Hit “Tea and Sympathy”

The cigarette with a proven good record with smokers. Here is the record. Bi-monthly examinations of a group of smokers show no adverse effects to nose, throat and sinuses from smoking Chesterfield.

“Chesterfields for Me!”

Jon Nathan, University of Oklahoma '54

The cigarette that gives you proof of highest quality—low nicotine. For the taste and mildness you want—smoke America's most popular 2-way cigarette.
