'Times' Mag To Run Story By OP Editor

This Sunday's New York Times magazine will devote an account of present day life in Budapest, Hungary, written by Andrew Metzler, a City College student. Recently returned from a CNN-sponsored tour of the Soviet Union and several of its satellites, he will be photographing accompanying the article, taken by a French photographer. Metzler is Editor in chief of the
Observation Post.

On Air

He announced his intention to supply college-issued funds to the College magazine to the tour by the sale of articles to various publications. Metzler will report further on his experiences, in Communist countries, when he is interviewed this Tuesday at 5:00 PM on the "Campus Press Conference" over WNYC Radio.

The interview will be conducted by Moderator Gabriel Pressman, former of the New York World Telegram and Sun and currently a lecturer in American Studies at the City College Press Conference. The panel whose members are drawn from the ranks of students and past members of college newspapers, is a regular member of the Campus Press Conference although its outside work on the Radio is a liveness event which we call automation.

Sarnoff Predicts Future In Baruch School Address

Brigadier General David Sarnoff, who is Chairman of the Board of Radio Corporation of America, predicted that many areas of electronics by 1961.

Speaking before the students Monday General Sarnoff, who is Chairman of the Board of Radio Corporation of America, predicted that many areas of electronics by 1961. He stated that "Seven years from now half of the electronic business will be devoted to devices that do not now exist," and added that "We are witnessing the dawn of a new era, which we call automation."

This new era will create a "great many new jobs which will replace those which are made obsolete because of increased mechanization."

General Sarnoff praised the electronic industry and listed its many areas, including television, phonograph, tape recorders, radar, and the atom and hydrogen bombs.

He predicted, in addition to widespread automation, television, great advances against disease through the use of electrons and television microscopes, home-sized atomic electrical generators and many other devices.

H. Klopstock Predicts Future By OP Editor

The unchartered All-College Committee on Academic Freedom, Dean James S. Peace (Student Affairs), is expected to be given at 12:15 PM in Hillel on Monday. The interview will be conduct- ed by a student of the Hillel's celebration of a Tercen- nary Program commemorating the 300th anniversary of the Jewish arrival in America.

Last Tuesday, in line with the Amsterdam Avenue at 39th Street, the student body was given an account of present day life in Budapest, Hungary, written by Andrew Metzler, a City College student. Recently returned from a CNN-sponsored tour of the Soviet Union and several of its satellites, he will be photographing accompanying the article, taken by a French photographer. Metzler is Editor in chief of the Observation Post.

Opening Doors
After six years of closed sessions, the Student Faculty Fee Committee voted Monday to open its meetings to the student body. We welcome this decision as an acceptance of the democratic method.

For years, the pseudo-secrecy that surrounded the meetings of the Fee Committee has aroused suspicion and distrust about the way student money was distributed. The Fee Committee decision to meet open will help clear the air surrounding these decisions.

Observation Post notes that the Fee Committee decision followed by two weeks a similar move by the Student Faculty Committee on Student Affairs. This indicates a general trend toward the students' "right to know" that was previously denied by these committees.

Although open meetings may not completely solve the problems of insufficient student participation in College affairs, they do take a definitive step in the right direction. Further steps long overdue, we turn our attention to the Committee of Five.

Closing Game
On Saturday City College's undefeated soccer team will play its final home contest of the 1954 season, the site is Lewisohn Stadium; game time is 1:30 PM, and admission, as usual, is free.

For the first time in the history of the sport at the College the soccermen are seriously bidding for a high national ranking. They have rolled over five Metropolitan Conference foes, in succession, and hold the national ranking. They have rolled over six opponents, including two of the nation's top teams, and have yet to win by less than two goals. In the two games in which they have been defeated, the City College team has scored three goals, the most recent being a 3-0 victory over the University of Pennsylvania at Old Stadium last Saturday.

The paradox is that giving blood is not an obligation but rather a privilege. When you give blood, you can draw an unlimited amount of blood for yourself or for members of your family when the need arises, and you can never tell when you will need it.

The Bloodmobile will be at the College Thursday and Friday, November 18 and 19. You can sign up now in the many registration booths throughout the school. Don't hesitate—your one pint could be the life of someone in your family may hang in the balance.
Epee Fencers Tie With NYU
But Take First On Touches

The City College "A" and "B" epee teams of the fencing squad tied with NYU for first place in the Amateur Fencers League Novice Epee Team Competition, held at the Fencers Club last Saturday.

The City College "A" and "B" epee teams of the fencing squad tied with NYU for first place in the Amateur Fencers League Novice Epee Team Competition, held at the Fencers Club last Saturday.

Although it was an official tie, the totals of touches gave first place to the CCNY "B" team. NYU's "A" team and the Beaver "A" team followed.

The winning Beavers were led by Charles Piper, just out of the service and a member of the full team which captured the Little Iron Man Trophy two years, Joel Wolfe, and Norman Goldman.

For the greater part of the competition the CCNY "A" team was in the lead. This aggregation included Ancle Malden, Jonas Ullens, and Martin Westfahl. However, in the final match with NYU they lost, 3-4, causing the eventual tie.

Double Trouble

Double trouble is the keynote of Dramson's production of Jean Anouilh's musical comedy, "Ring Round the Moon." The play, which will be presented this Friday and Saturday night at 8:30, is the story of a family who lost a fortune 25 years ago and is still trying to get it back. The play is a humorous look at the love and hate of the family, with a lot of laughs and a lot of tears.

Holman Starts 34th Season With Cagers

Nat Holman has come home. The man who has frequently been referred to as "Mr. Basketball" by sportswriters and his fellow colleagues throughout the country, held his first practice session of the 1954-55 hoop season, on Monday afternoon, in the Main Gym. The occasion marked the beginning of his thirty-fourth year as the College's head coach and his return after a two-year absence from the College.

More than thirty candidates were on hand for the opening practice which was greeted by a flock of reporters and photographers. The occasion was also marked by prominent stories on the sports pages of several metropolitan newspapers.

The New York Post headline story on the story was "Holman Returns—Without Fanfare."

Depositor Can Overdraw On Bank Account

On November 18 and 19, students will be able to start a unique bank account, from which, after a small deposit, they can overdraw for thirty days without fear of prosecution.

This remarkable institution is the Red Cross Blood Bank, open to all students and teachers between the ages of eighteen and sixty.

The advantages to depositors are two-fold. First, it permits a depositor to withdraw immediately, as many pints of blood as is necessary, whether for himself or members of his immediate family. Secondly, a pint of blood would regularly cost between twenty-five to fifty dollars a pint depending upon the distance from the hospital. The blood donor withdraws is absolutely free of charge.

At booths, situated opposite Knittle Lounge, Lincoln Corridor and the Army Hall foyer, depositors can sign up. Students under twenty-one must have a parent's consent slip. The booths will supply these forms and any additional information.

A light diet is suggested for the four hours preceding the donation. Butter, cream, fried foods, fatty meats, cakes and pies, should not be eaten.

Winning donors will be treated to a free meal after the donation.

WINSTON... the easy-drawing filter cigarette!
HOBOKEN, NJ, Nov. 3—If there were any racing fans at the rainswept Stevens Institute of Technology field today they might classify the College's undefeated soccer team as expert "mudders." Contending with rain and freezing weather, mixed with heavy winds, the Beavers picked up their sixth victory of the season, 4-2, in a non-league game. Changing around the script a bit, Morris "Crunch" Hocherman proved to be the hero this time. Last year's high scorer took the play away from the more-publicized duo of Johnny Koutsantanou and Wolfgang Wostl, and scored three goals. Koutsantanou, who was off on a shooting throughout the contest, settled for scoreless ninth part of the season to tie for the team lead with 11.

"Morris Hochman 'Hat Trick'"
The CNNY record set by Freddy Goldthrich in 1948. The Beavers scored twice in each of the first two periods to leave the field with a 4-0 halftime lead. The Stevens defense tightened in the second half, however, and the Engineers scored twice once on a penalty shot.

"Defense Bulwark"
Eddie Trunk

The Beavers were everything a championship club should be in the first half. They were the relentless aggressors, keeping the Beavers off balance throughout. The play was concentrated almost entirely in Stevens territory. Lavender goalie Wally Meisen making only two saves, both easy chances.

"The Bulwark of the Defense"

After Koutsantanou and Wostl missed easy chances in the opening minutes of play, Koutsantanou, the all-American from Cyprus, registered the first Beaver goal at 19:38 of the first quarter. He scored with the help of brilliant passes from Rudi Gedamke, Wostl, and Hocherman. Less than a minute later, at 20:05, Hocherman bounced in anchorman Wostl, and Hocherman. Less than a minute later, at 20:05, Hocherman bounced in anchorman

"The Offense"

Hocherman went in neck-and-neck past Meisen's goals. Koutsantanou, who was off in the first half, engineered the team's final goal of the season, 4-2, in a non-league game. Chang
