Rice, Farrell Will Open 'Freedom Week' Today

The Academic Freedom Week Hall has been included in the program this year by the Academic Freedom Committee. The committee is composed of James Y. Beller J. Galbraith, Professor H. H. Wilson (Political Science) of Princeton University, and Student Council President Barney McCaffrey.

The speakers will discuss the government of the United States. "A political independent," according to Gil Robinov, AF Week Committee Chairman, Mr. Farrell is the author of "The Adding Machine." He has been a "serious" student at the University of Michigan during the last thirty years. He is in favor of allowing Communists to teach.

Herbert Aptheker, an instructor in the Business School of Social Science, was dropped from the debate because the Speakers Committee could find no one willing to debate with him. The Jef- ferson School of Social Science is a "political independent." The first panel debate of the Week will be held tomorrow at 2 PM in Townsend Harris Auditorium and will feature New York Journal-American columnist George Sokolsky, a "conservative Republican" and President Gallagher debating negatively on the question "Should Communists Be Allowed to Teach?" They will be opposed by Sheldon Ackley, a member of the American Civil Liberties Union, and Joseph Glass, Socialist candidate for mayor of New York City twice and for United States Congress, once, in 1952, claims that he has made "over 500 speeches against Communism and communism in the last thirty years." He is in favor of allowing Communists to teach.

E-Day Coming May 7--Plan Tour, Exhibits

For the seventh straight year the School of Technology will be host to outsiders and students who have a professional interest in, or curiosity about, engineer- ing. On E (for Engineers') Day, May 7, the engineers will guide professional engineers, employment interviewers, high school seniors and Arts and Engi- neering students of the College through the labs, giving demonstra- tions and answering ques- tions.

The demonstrations will include simple devices involving television transmitters and receivers, tape recorders and other popularly featured items, as well as those of rolling mills by which sheets of materials such as paper or steel are turned out, air conditioning and other devices of the special- ists. The engineers will also show experimental techniques such as those of destructive testing, in which materials are subjected to progressively greater pressures or stresses to determine their breaking points. The engineering labs in which these demonstrations will be held are the ones that will be "among the best in the country," according to Bob Weins, Secre- tary of the Academic Freedom Week Committee.

Doxie Wilkerson Will Debate Ex-Communist Pupil on Wed.

The topic, "Subversion in the Schools," has been scheduled for the next Wednesday at 3 PM, according to Academic Freedom Week Committee.

Salk May Get Senior Award

Dr. Jonas E. Salk, discoverer of the polio vaccine, has been recommended as the recipient of a Senior Class award. This would be presented on Charter Day, May 3.

The deadline for Seniors to purchase their Package Deal is April 29. The package includes Cap and Gown plus tickets for the Senior Ball, Reunion, and Graduation.

Dr. Salk was educated at the University of Pennsylvania, where he received his B.S. degree in 1932. He received his M.D. degree at the University of Pittsburgh in 1936. He then went on to research at the University of Wisconsin, where he was a fellow in virology. In 1941, he returned to the University of Pennsylvania and began working on the polio vaccine.

Blood Drive

Student Council passed a resolution urging all students to donate blood. The resolution was passed unanimously by the Student Council. The drive will be held on June 15 in Lewischohn Stadium. Among those in- vited to attend the ceremony are Mayor Robert Wagner and Gover- nor Averell Harriman. The Governor is scheduled to be the featured speaker. The Student Government

Council Drops 'Knock Probe'

Student Council overruled a motion of the Academic Freedom Week Committee to hold hearings on awarding duplicate medals to former students who were allegedly deprived of awards because of anti-communism by Professor William E. Knick- bocker (Romance Language). In 1949 students went on strike demanding the ouster of the professor. The council felt that the charges against Professor Knickbocker had never been completely sub- stantiated and the criteria for awarding the medals was so vague that it could not be used to reach a decision.

Blood Drive

FREE DONUTS
AND COFFEE
TO DONORS

Prospective donors in the College's current blood bank drive may still register today and tomorrow at booths set up in Lincoln Corridor, Army Hall and opposite Knittle Lounge.

A challenge to a blood-giving contest by the students of the Baruch Center has led to a successful drive and the collection of 500 pints.
Topics of the Times

They say that wisdom comes with age. The New York Times is 104 years old but an editorial it published on April 5 showed that this adage does not always prove true.

The Times’ editorial proposed a “nominal fee” be charged for tuition by the municipal colleges and suggested that the fact that a means test is not used to determine those who should receive a free college education does not require a student of the municipal colleges to belong to any race, color, or follow any creed, or fall into any financial class. A free college education is considered mandatory for Class Council members.

An argument given by The Times for such a “nominal fee” was that the city and the state were in financial difficulties. Indeed, we cannot recall any time when they were not. Whether the “nominal fee” would be fifty, fifty, or five hundred dollars is immaterial. No pricetag can be put on philosophy. The only consideration for a free college education is that it is mandatory for Class Council members.

We believe that this idea has worked pretty well. For confirmation we can turn to The New York Times itself. Only last week it carried the front page story which wrote, “Vaccine Proves Success.” He is, of course, our own Jonas Salk, of whom we are also certain that every student and faculty member of the College will get off to a fine start today.

Less Tension in Israel Now -- History Prof.

The situation in Israel is “less tense” then two years ago according to Professor Oscar Janowsky (History), who delivered his lecture Tuesday from an eleven day conference there.

Professor Janowsky said that Israel has made considerable advance in its technology, in particular in the area of food production. He added that there is now a great deal of construction in progress to fill the needs of the people and immigrants, who are being absorbed more readily.

Janowsky’s purpose in visiting Israel was to attend meetings of the Board of Governors of Hebrew University, of which he is a member. The group’s membership was reduced by twenty representatives from the United States. Doctor Albert Einstein was honorary chairman of the Board until his death this week.

At the Board’s meeting, the Professor suggested adoption of a planned arrangement whereby American students might spend their Junior year studying at the Hebrew University, of which he is a member. The group’s membership was reduced by twenty representatives from the United States. Doctor Albert Einstein was honorary chairman of the Board until his death this week.

Whirlwind Tour of Europe

The May 15 1955 in today’s Westminster Press.

The number one, for example, in alphabetical notation, is outside Bliss’ philosophy. The books dealing with the History of Philosophy are noted by AA-AB, and the lettering continues in this way to the logical organization but is a compromise of convenient advantages.

Library Shelves Dewey System: Bliss Prevails

By WORLEY THORNE

CUNY students will have to toil long to find their system like their own of classifying the College’s libraries. The Bliss system of classification, which was developed at the College, is considered by some to be the best in the United States.

“This is not because of its lack of merit,” according to Miss Marquise Sobey, a Libertarian, “but because the system does not use the expense of reclasifying from older, accepted systems.”

It is still true, however, and always, for its theoretical value by not only librarians, but philosophers and scientists as well. The system does not use as many books as do those that are organized by the College’s libraries.

This kind of arrangement is a good product of the most popular classification system in the world, the Dewey Decimal. It has as its basis which professes to have a logical organization but is a compromise of convenient advantages.

Unlimited Scholarly Credit

The Bureau of National Systems (1929). It was introduced by John Dewey, who called it “monumen­tal” and “a much needed contri­bution to knowledge.”

The Bliss classification begins with the History of Philosophy and is a member. Before that the History of Philosophy and the History of Mathematics and the Systems of the Sciences.

Each of these classes is subdivided, as far as possible, in a similar way. The first category under Philosophy, for example, is Its History, starting with the declaration of AA-AAY, covering the Ancient Period. Books dealing with the History of Philosophy are so arranged that those treating the earliest philosophies are denoted by AAA-AAY, covering the Ancient Period. Books dealing with the History of the Medieval Period are denoted by AB-ABW, and the later philosophical theories through the Modern philosophies.

These letters, which represent the classification, are found on the first line of the book’s “call number.” It is some­time 100-000, which is outside Bliss’ phil­osophical organization of learning and study. The next letter, which is outside Bliss’ philosoph­ical organization of learning and study, the number can be found in the “call number.” It is some­time 100-000, which is outside Bliss’ philosoph­ical organization of learning and study.

Students of the College are ambitious to a fault. Most of them are very serious-minded and too serious and eager to complete their education in a hurry. This makes them lose sight very often of the educational value of courses and the value for life of extra-curricular activities.

Very often students are more interested in piling up credits and marks that will enable them to enter the professional schools than in getting an education per se. Few try to understand the world about them or to become sensitive to the moral and artistic values.

This is not true of all of them or even of the majority of them, but it is true enough of too many of them. (I would like to have the exact statistics.) This state of affairs is a pity, since ability at The College is very high and so is the character and even general attitude of the student. The student lies in the fact that the student feels driven to get through, by economic necessity, as quickly as possible. If he could be convinced that the real value of the study would more than make up for the hardship of earning a living while going to school. At this slower rate, the student would get more out of opportunities that the College has to offer.

Council . . .

(Continued from Page One)
Walsh, '36 Representative, was set up to investigate crime on the campus. Student Council criticised the cancellation of the proposed visit of eleven Russian student editors as being "motivated by political considerations" at the SC meeting last night.

In a motion passed 15-1, Council stated it "regrets the action of the Soviet student editors in utilizing a gesture of international friendship for propaganda purposes."

This resolution referred to the decision of the eleven Russian student editors who were supposed to arrive in the United States last Tuesday, to cancel a month long tour of American colleges. According to the Soviet Foreign Office, the trip was cancelled because the editors refused to be fingerprinted, and sign a statement requiring them to assume responsibility if delayed in leaving the US. The State Department said that fingerprinting is required of all visiting aliens.

SC, which had extended an invitation to the editors to visit the College last month, expressed the hope in the resolution "that the time will come when student exchange between our nations ceases to be motivated by political considerations."

ARE YOU MECULOUS about your choice of cigarettes?
Do you want exactly the right taste? Then take a hint from the Doodle, above, titled: Ash tray belonging to very tidy Lucky smoker: Luckies taste neat—and for excellent reasons. First of all, Lucky Strike means fine tobacco. Then that tobacco is toasted to taste better.

"It's Toasted" is the famous Lucky Strike process that tones up Luckies' light, good-tasting tobacco to make it taste even better... cleaner, fresher, smoother.

So enjoy yourself thoroughly whenever it's light-up time. Light up the better-tasting cigarette . . . Lucky Strike.

LUCKY DROODLES! ALL BRAND NEW!

WHAT'S THIS? For solution see paragraph below.

Brooklyn (Not the Dodgers) Rapped By City 9-3; Galletta Wins in Relief

The Beaver "nine" gained second place in the Metropolitan Conference with a 9-3 sweep of Brooklyn College at Babe Ruth Field yesterday. Six ringgamen errors in the fifth inning opened the floodgates accounting for a half dozen City runs, and put the game on ice. Right-hander Joe Galletta who relieved starter Bernie Spiro into the third limited the visitors to six runs in the fifth on three hits and six Brooklyn miscues. The shenanigans began when center fielder Dom Tenerelli reached first on second baseman Barry Gang's first error. Backstop Jim Cohen singled, advancing Tenerelli to second. On an intended sacrifice bunt by third baseman Ed Lubitz, Gang committed another error, loading the bases.

A single by first baseman Ed Ryan brought across Tenerelli with the first run of the inning, as the bags remained loaded. Tom Fracaro was called in from the bullpen to replace starter Bill Anderson for the Brooks, as Anderson shifted to left field. Vince Ciccone, right fielder, then lifted a foul pop to first baseman Ed Lubitz who dropped the ball out Lubitz lined to Edge who circled the bases on Jakubowski's single. City retaliated for the third on catcher Ray Jakubowski's single, a sacrifice by Puglisi, and a run-producing double by center fielder Walter Edge. In the bottom half of the frame, with Troia on second pinch hitter Al Weinstein took a high throw and forcing Nacinovich to third. On an attempted pick off play of the Brooklyn bench, allowing Cohen and Lubitz to tally. Brooklyn regained the lead in the second on catcher Roy Jakubowski's single, a sacrifice by Puglisi, and a running double play by center fielder Walter Edge. In the bottom half of the frame, with Troia on second pinch hitter Al Weinstein, taking for starting hurler Bernie Spiro, lashed a scoring single and knotting the game at 2-2. The Lava­nder forged in front for the first time in the third, when with two out Lubitz lined to Edge who dropped the ball for a two base error. A passed ball moved Lubitz to third, from where he tallied on Ryan's single. Galletta, who replaced Spiro in the third, twisted seven innings of one run ball, striking out eight and walking only one in the process. It was his best performance of the young campaign. City's overall record now stands at three wins and three losses.

Mike Kucklinca reached second on shortstop John Puglisi's miscue and eventually scored after a sacrifice by Tenerelli and a one-bagger by Cohen.
