A motion commending Hungarian students active in the current revolt in that country was passed last night by the Student Council.

**Stempel Hits $44,000; Tied by Cuban Physician**

A Cuban doctor almost served Herbert Stempel’s fantastic winning streak which reached $44,000 last night on the TV quiz program “Twenty-One.” The doctor, Carlos Carballo, a student at the University of Havana, was able to answer all but one question correctly.

The Stempel-Dobbs match was concluded before the event could be broadcast coast-to-coast yesterday over NBC’s TV network.

Prof. Mark Brunswick (Chmn. Music) was defeated by a substantial margin. After the meeting, Professor Brunswick said that now the College was “back where it started last June with the old no-safeguards motion.” He said, however, that he will attempt to introduce a motion next week which would agree to a no-safeguards motion but which would completely exempt all religious and political organizations from submitting membership lists. He also said it was disclosed at the meeting that it is illegal under the law to ask for the religious affiliation of an individual.

The defeated recommendation stated that information concerning a student’s extra-curricular activities may be given to a particular organization upon written authorization of the student concerned.

The motion of the GFCSA further required an organization to notify the Department of Student Life (DSL) a complete record of its officers and members accompanied by signed membership cards. These records would not be retained “beyond the end of the succeeding semester.” This motion was adopted by the GFCSA at their meeting on Thursday.

Marvin Gettleman, appointed by SG’s Executive Committee to present Council’s views opposing lists to the General Faculty, was denied permission to come before the body. President Buell G. Gallagher explained that no one except authorized Department representatives is allowed entrance to the General Faculty meetings.

Last June GFCSA voted 4-1 for a resolution which removed all safeguards from membership (Continued on Page Two)

**Should Hydrogen-Bomb Tests Be Halted?***

The College will not observe a period of silence tomorrow morning for university students who have been requested to do so by the General Faculty Committee on Student Activities (GFCSA), termed “more liberal” by Professor Mark Brunswick (Chmn. Prof. Brunswick said that now the General Faculty is “back where it started last June with the old no-safeguards motion.” He said, however, that he will attempt to introduce a motion next week which would agree to a no-safeguards motion but which would completely exempt all religious and political organizations from submitting membership lists. Vote For My Candidate Because...

On Labor Day 1952, the then General Eisenhower, made the following statement:

"If I should be the next President of our Country, it will be my aim to so conduct that office that at the end of my service, each of you can honestly say these words: "He has been fair, he has been my friend."

For his division by class, but has fostered mutual respect, understanding, and goodwill. He has led us forward along the broad middle way toward prosperity with a war economy, and our children with a prosperous society.

To say that President Eisenhower has succeeded in his aim would be quite an understatement.

Let us look at the farm price, the Administration. The Administration of every American president since Abraham Lincoln.

President Eisenhower has actively moved toward the ending of segregation in the Nation's Capital. More Negroes have been appointed to policy-making positions by President Eisenhower than by any previous President's six-point program to end civil rights, in his own words, because of Democratic opposition.

President Eisenhower and the United Nations have led the world to war free of nuclear weapons. This has been a major victory for the United States, and a major setback for the Soviet Union.

8. The Administration has led the world in a program of civil rights for minority groups, particularly African Americans.

9. President Eisenhower initiated the Atomic Energy Act. He has worked to keep the United States on the threshold of peace through the peaceful use of atomic energy. The Administration has suffered from a lack of the kind of imagination, understanding of foreign policy and a fresh approach. A prime example of this is his withdrawal of American forces from South Vietnam.

German and Japanese blunders have been particularly apparent in the Middle East as the present crisis grows. Most of the Administration has left the President with a very difficult and complicated situation.

President Eisenhower has been fair, he has been my friend. He has done everything to Ike, while, in reality, the reins of government are in the hands of a small "palace guard."

America to the America of great ideals and noble visions which are on the threshold of another great decisive era. History's headlong rush to war might not be quite an understatement.

Hey, everybody! Here's a new stack of

Sticklers!

Here's a Stickler! What do you call the
Minutes of a Smoker's Convention

(see paragraph at right)

When Smoke Folk get together, the chatter
takes on the nature of fine tobacco. Naturally, that means
Lucky Strike. Lucky Strike's taste is worth talking about because it comes from fine tobacco—light, mild, good-tasting tobacco that's
TOASTED to taste even better.

As for the Stickler, you call the minutes of a smokers' convention a Light-up Write-up. Speaking of light- ups, have you tried a Lucky lately? You'll say it's the best-tasting cigarette you ever smoked!
