31 Colleges To Compete In Debating Tournament

The Debating Team will be host to thirty-one colleges and universities, at its second annual Invitational Debate Tournament, to be held on Saturday, March 30. Sponsored by the Debating Society and the Finance Student Council, the tournament will begin at 10 AM in the Center and will continue until 5 PM.

The topic to be debated is “Resolved. That the United States should discontinue direct economic aid to foreign countries.”

Chosen by over 800 colleges in the country that have debating teams, this topic has been discussed throughout the year. A new topic is chosen each year and is called the National College Topic. Competing in the tournament will be the University of Pennsylvania, Fordham University, Cornell University, and Columbia University.

The Baruch School’s Debating Team will represent the College at the tournament since the up-town squad will only act as host. This year, the Team has represented the College in more than seventy-five debates, of which three were major tournaments. The season’s best score was made on March 3 when Bill Roth, Gilbert August, David Bernheim, and Melvian Berman took first honors at the Yeshiva College Tournament with seven wins and one loss.

Commenting on the increased number of participants over last year’s tournament, Dr. Wayne A. Nicholas (Speech), Faculty Adviser to the society, said, “A tournament involving thirty-one schools is a sizable undertaking for any group to sponsor.” However, he continued, “the experience of last year should stand us in good stead, and we are indebted to have the full cooperation of the Department of Student Life and the Finley Student Center Board of Managers.”

First Career Day Scheduled To Discuss Job Opportunities

Career Day, sponsored by the Alumni Association and the Placement Office, will take place on campus on Friday, April 26. The day, which will be held in the Center, will be open to students who have participated in the Internship Program or in the Placement Program last year. The day will be divided into two sessions: one for students who have completed one semester of study and are interested in discussing job opportunities with employers; and the second for students who have completed two or more semesters of study and are interested in discussing job opportunities with employers who have more experience.

The opportunities in the fields of Government Services for Liberal Arts students, Insurance, Personnel Work, Marketing Research, Personnel Work, and Creative Writing, Journalism and Creative Writing, Small Business, Advertisements and Market Research, Merchandising and Sales will be discussed.

Eli Guinsberg, head of the National Manpower Resources Council, will give an introductory speech, while the students who have participated in the Internship Program will give a report on their experiences. The students will then be free to go to the various booths and speak to employers.

Purim Festival On Tap Today

A Purim Festival will be presented by the College’s Brith Hillel Foundation today in Townsends Auditorium at 12:15 PM. In honor of the forthcoming holiday, the Festival will present Israeli artists and Hillel Art groups.

The Festival, in honor of Dr. Jude J. Shapiro, National Director of the Brith Hillel Foundation, will officially welcome Dr. Shapiro to the College. A group of Hillel members, directed by Raphael Adler, will sing the cantata, “Seven Golden Buttons.” The Hillel Yiddish and Advanced Folk Dance groups will also perform.

At the welcoming reception for Dr. Shapiro, in Hillel House, an exhibit of paintings by Israeli artists will be displayed. The exhibit will extend until April 3.

The Festival, directed by Prof. Robert Stein, Managing Editor of the New York Herald Tribune, will extend until April 3.

Career Tests Set for May 11

The New York State Department of Civil Service will hold its next Professional Entrance Career Tests on May 11. It is the third time the College students have an opportunity to begin a career in an entry-level position in any of the typical positions throughout the state.

The test, which is held three times a year, is open to college juniors and seniors, as well as to students who have completed their junior year. Juniors, however, will not be eligible for appointment until after they graduate. Others who pass the test may go to work as early as July 1.

Starting salary is $4,028 a year with three annual raises to $4,368. Applications and details may be obtained from Mr. Ernest Schneideck, Placement Director of the College, in Room 203 Finley.

Activity . . .

All organizations interested in participating in the Activities Fair, to be held April 4th, must leave reservation slips in the Chi Lambda mailbox in the Center. Slips must list: the name of the organization, type and purpose of booth, amount of materials needed and if the organization is a representative of the organization.
Cloak & Dagger Spotted In Sober Way by Prof. Donald C. Blaisdell

Government agents are generally depicted as dashing, devil-may-care heroes who spend half their time in才算ing women's boudoirs and the other half exchanging blows with forefathers.

The professor, who was a University of Illinois student and now teaches at the University of London, told the students that certain students keep them into cans, and that two things in particular are coming to mind. One is the friendly presence of two students at Queens College, and the other is the way the American Council veto, Professor Blaisdell says, "The Russians were un-imagined and Chinese representatives came out of it all without having a single dagger through them."

Of the negotiations with Russian and Chinese representatives over the question of the Council veto, Professor Blaisdell says, "The Russians were un-willing to talk unless they knew that you were authorized to speak to them and to speak to them—it was much easier in these matters to contact British or American agents than it was in these things informally. As for the Chinese, they were greatly im-probable. But the American Constitution had been amended by interpretation and usage."

The professor was born in Chautaugua, New York, and obtained an MA degree and a PhD from Columbia University. He therefor studied, traveled, and taught in Europe and the Near East. He started work for the United States government in 1936, and in 1937, when the Republicans came into office and decided that a reduction in staff was needed, Professor Blaisdell was dismissed and had to find his own cloak and dagger.

Counterspy in Action

The professor is a counter-spy who works for the American government. He is a professional and has been working in this field for many years. He is a skilled operative and has a wide range of skills and abilities.

Ed. Professor Is Enlightened On India Visit

A ten-month sojourn in India earned Professor Janet Kelley (Education) a new name. For going away gift, Prof. Kelley's Indian friends dubbed her "the Lady in Blue" for "one who spreads light."

The professor received the honorary degree of Doctor of Philosophy in appreciation of her educational work in India. From September 1955 to May 1956 she toured through most of the huge sub-continent helping to establish workshops for Indian educators.

As part of a three-member American team, Prof. Kelley learned vividly how the average Indian lives. She dressed in the traditional "Sari," a long flowing robe; slept on razor-thin mattresses; and had her clothes washed by native laundymen by the ancient method of pouding on garments on rocks.

"It was important for my work to learn how Indians lived, and I felt this was the ideal way to know the people," she explained.

A workshop participant became Frank Potenza, and his wife, a Russian-speaking friend, personally attended her. The two worked against her. She had taken the Ganges River for a bath and was later thrown at him.

If they like beards and want great—beards and moustaches are a thing that irk the group. Their professors who break coke bottles and plant bushes in the spring. !

Rose Bushes, Garbage Cans All in a Groundkeeper's Day

While those unfortunate o'clock class are snoring the buildings echoed with the emptying the garbage barrels. Those are the men of Local 204 of the Laborers and Assistant Gardeners' Union. The yard boss is Frank Polenz, and his efficient staff includes Joe Muller, Tom McKenna, Jerry Williams and Tom Affisco.

Taking care of the barrels in the morning one is never having the 8-4:30 job. They also dispose of more, keep grounds clean and plant bushes in the spring.

Joe Muller, the self-appointed spokesman, promises that "things will look rosy" around South Campus during the next few months, because the men intend to plant. Joe also promises turnips—but says it with too much a smile to be taken seriously.

Then it's reverated. After the fire, the harden part of the job is moving furni-

CLUB NOTES

AICHE
Presents Dr. E. B. Regen of The General Electric Co. and Prof. J. Blaisdell of the College at 12:30 PM in Room 135 Shepard to discuss the question of "Gases and Materials." Students free.

The Anthropology Society
Meets today at 12:30 PM in Room 316 Shepard. See the flyers in Room 208 Breegis at 1:00 PM.

Baskerville Chemical Society
Will present Prof. John D. Robinson of the California Institute of Technology at 12:30 PM in Room 316 Shepard.

Biological Review
Meets today at 12:30 PM in Room 208 Breegis. Deposit the forthcoming issue.

Biological Society
Presents Dr. H. E. Johnson who will discuss "The lovers burn up the morning is but one part of the Laborers and Assistant Groundkeepers' Do
cy Founds at 12:30 PM in Room 135 Shepard.

Chemical
Presents a speech on medical specialties at 12:30 PM. Pitches will also be made for the Friday night cocktail club.

Samar Club
Conducts a "model system" today in Room 428 Finley. All students free.

Club of the Arts
Meets in Room 403 Finley. Thursdays 5:15 PM. All students free.

Social Club
Meet next at 12:30 PM in Room 316 Shepard.

Class of '58
Meets in Room 303 Finley. All Fridays 5:15 PM. Free to all.

Class of '60
Meet at 12:30 PM at College Center.

Criticism Society
Class of '60 needs help in arranging the big event of the year, "The University of Connecticut," which will be held on Apr. 11. Please assist members in Room 121.

Chemistry Association
Meets in Room 406 Finley. Thursdays 5:15 PM. All students free.

Physics Society
Presents Prof. E. A. Condon who will speak on "Summer Projects."

Society of '39
Meets in Room 206 Finley. All Fridays 5:15 PM. Free to all.

Business Society
Meet at 12:30 PM at College Center.

Drum Club
Prepare today in Room 121.

Music Society
Meet at 12:30 PM in Room 412 Finley. Prof. Frank C. Davidson (Apeuha) will be the feature speaker.

Weightlifting Club
Will be at 12:30 PM and will be open to all students in a competitive spirit at 12:30 PM in Room 145 Shepard.

IT'S FOR REAL!

Engineers Show After Ego; Will Sport Palettes, Berets

An occasional easel may be found between the drawing boards, and a palette or may be lying on a generator or dynamo in Goethals' Hall, at the annual E-Day art exhibit. Sponsored by Tau Beta Pi, the exhibit will be one of the many features of E-Day, held at the College on Saturday, April 10. The gala celebration will begin at 11:00 AM with a tea in Townsend Harris, and through the night culminating in a Saturday evening ball at 9 PM in the Great Room of the Colby Student Center.

Potential DaVincis can enter paintings, etchings, statues, and sculptures in the art show, but not be experts on the campus. A submission of 200 works were chosen from the 200 submitted works, and the featured will be a display and demonstration of new-required tech apparatus, and not tours of exhibits by representatives of the various engineering departments.

The program will be thrown to the entire city. One of the main objectives will be to display to the high school student, general public, and even the Arts major, with the College's School of Engineering. The engineer is not a cold, calculating Univac, but also has "human" aspect to his person.

The E-Day Ball, of course, will fill the day's social calendar. Right of the ball will be the action of Miss E-Day. The dance will also feature a show and refreshments; candies will be set up in the Auditorium and Ballroom to accommodate students from all schools of the College, who will dance to the musical charm of Mary Adler and his Society Orchestra.

Tickets at $2 per couple will be sold by the Technology Inter-society-Interfraternity Council on Thursdays from 12-2 PM outside Oriel Lounge.

A Banana Boat Sightseeing trip to Miami is available to the entire city. One of the advantages I found in working for a big company such as General Electric is that, because of its size, it is able to give me, and other college-graduate employees like me, a wide variety of training and experience in any one of 159 plants all over the country.

Through an extensive on-the-job training program, it is possible for me to give employees and other college-graduate employees like me, a wide variety of training and experience in any one of 159 plants all over the country. Through an extensive on-the-job training program, it is providing me with the opportunity to become one of the top men in my field, and I know that as long as I work myself to each job, I'll keep moving up.

The way I look at it, General Electric is helping me help myself. That's why I say, I'm working for a big company, but a big company works for me, too.

This wide framework of opportunity is a unique characteristic of a company of General Electric's size. 27-year-old John Evans is just one example of the thousands of college graduates at General Electric, each being given the opportunity for self-development so that he may grow and realize his full potential. As our nation's economy continues to expand in the years ahead, thousands of young people of leadership ability in American industry. General Electric feels that by assisting young people like John Evans in a planned program of personal growth, we have found one way of meeting this need.

A Manager of Employee and Plant Community Relations at General Electric holds a responsible position: he handles employee benefits, health and safety, training, wage and salary administration, and community relations.

GENERAL ELECTRIC
Harry Karlin

The ability to coach successfully is not possessed by all. Of those who try, many soon realize the hard work of organizing, instructing, and understanding the team. Some are talented enough to produce winning units from any material, and Dr. Harry Karlin, soccer and tennis mentor, rates high in this group.

When Professor Karlin was given the reins of the soccer team in 1944, he was greeted by an aggregation of stars that had completely dominated the Metropolitan League Conference, but which was in no condition to compete with strong, nationally recognized squads.

"Doc" devised a training program for the booders and the results are evident. In three years the soccermen posted a 23-2-1 mark and last season they were unanimously selected All-State, Chauffer. With modifications, the same schedule has been fed to the netmen with similar effects. They have achieved marks that would be gained by teaching at City, would far overshadow the entertainment field's inducements.

The popular hygiene instructor started to coach after leaving the navy in 1919. After entering in 1918 he engaged in many activities aboard ship. One memorable occasion, because of his short stature and great agility, Dr. Karlin was cast in the female role in "Merryland." In the audience sat the engenue of "Lisetta," a popular Broadway musical. She was so impressed by his performance that, when his naval service was completed, she invited Karlin to join her and a few other associates in forming the New York Theatrical Exchange. Established in 1922, this booking office secured employment for numerous chorus girls. It was "Doc's" job to mold them into a trained office. Secure employment. Karlin had graduated from Nightown High and Savage, a two-year college. Before enlisting in the navy he attended NYU but did not receive a degree. "Doc" re-entered the Violet institution, going evening session, and at twenty he was an All-New York City, Violet institution. Karlin became a co-captain of the swimming team in 1920.

Karlin had graduated from Newton High and Savage, a two-year college. Before enlisting in the navy he attended NYU but did not receive a degree. "Doc" re-entered the Violet institution, going evening session, and at twenty he was an All-New York City, Violet institution. Karlin became a co-captain of the swimming team in 1920.

Meanwhile, Prof. Karlin had been teaching at The College since 1920 and coaching the baseball team since 1921. On Sundays he would take moving pictures at the agency. The pressure was too great and Karlin had to choose between the two vocations. After a leave of absence, during which he engaged in long conversations with his associates and family, he decided that the enjoyment and security, which would be gained by teaching at City, would far overshadow the entertainment field's inducements.

Before resuming his instructional duties, Karlin became a co-partner on a burlesque wheel. Back at school he became the swimming coach in 1920.

Leon "Chief" Miller

A few returning stickmen from last year's squad will form the nucleus around which the team will be built. Shorty Cashman, with several years of experience to his credit, will probably serve as the Beaver goalkeeper. Others, including co-captains Mike Volpe and Leonard Pagen, along with George Jensen and Joel Asher, basketball luminaries, will all be steadying influences.

Several newcomers, among them Marty Doherty, Prince, Vito Curione, T. Crossfield, Dave Elias and Larry Kolaitis are waiting for starting positions to give the returnees competition.

Meanwhile, the "Chief" is seeking varsity candidates, particularly "men who have played football and other rugged sports. He quickly added that "alike lacrosse is a tough, rough game, there are some few injuries."
