

UBE . . .

Today is the last day the Used Book Exchange (UBE) will buy books. Selling will continue until Wednesday. Located in the Grand Ballroom of the Finley Student Center, the UBE will be open daily from 10:30 AM-4 PM through Wednesday and from 6-8 PM on Tuesday.

Students are paid 50-75 per cent of the original cost of the books. There is a fifteen cents service charge to defray the operating expenses of the Exchange. Books not sold are returned to the students.

The UBE will post the numbers of those books sold outside Room 426B Finley after Tuesday, February 12. The schedule of pay-back dates will also be posted. No seller's receipt will be honored after March 21.

Alleged Election Violations Probed by SFCSA Panel

By KENNETH FOEGE

An investigation was launched during intercession into charges of election violations brought against Senior Class President Martin Pollner and Student Government's methods in handling the charges.

Seated left to right in a meeting of the special subcommittee to investigate election violations are Mr. Stamos Zades, Prof. Lawrence Podell, and SG President Stan Wissner. Waiting to be interviewed are Bohdan Lukaszewsky, Martin Pollner, Mike Rizzo and Bill Brown.

The investigation, precipitated by an appeal by last term's Senior Class President, Michael Rizzo, to the Student-Faculty Committee on Student Affairs (SFCSA), was conducted by a "fact-finding" sub-committee of SFCSA.

Rizzo's appeal was based on charges of irregularities committed by:

- Pollner, who he claimed violated a series of regulations in electioneering for both of last term's SG elections.

- The SG Elections Agency, which he stated should have made the decision on his original appeal instead of the Executive Committee of Student Council.

- The Executive Committee, which he accused of not giving his appeal a proper hearing.

- The Campus, whose re-endorsement of candidates between the two elections he claimed placed unendorsed candidates at a disadvantage.

The sub-committee will report to the SFCSA which will make a decision on the case at their first meeting this term.

In the SG elections of December 14, Rizzo defeated Pollner. When that election was declared invalid because of a balloting error, another was conducted on December 19 in which Pollner emerged the winner by sixteen votes.

Rizzo then brought his allegation.

Mercury's Future Status Draws Study of Alumni

The issue of Mercury's status at the College has drawn the active interest of the Alumni.

Members of the Alumni Association are attempting now to formulate a policy with regard

to the controversial magazine and, depending on what action, if any, the Board of Higher Education takes toward the magazine, the Association may make a public statement.

The Association has not arrived at any definite opinion, the

See Series Mercury—Triumphs and Disasters On Page 5

Executive Secretary of the Association, Mr. Seymour Weisman, emphasized last week. But there

is a viewpoint in the Alumni which feels Mercury's future is of direct concern to them, he explained. There is also, he added, a group in the Alumni which believes the Mercury debate is not the concern of the Association.

A decision will not be made, Mr. Weisman said, until the College Affairs Committee of the Association concludes a series of discussions it is holding now with people concerned with Mercury. Their final recommendation will be made to the Alumni

College Admits 3 Hungarians On BHE Scholarships Today

A new life begins today for three refugees from Russian tanks and Hungarian secret police. The College is opening its doors to three young students who fled Hungary after the Soviet bloodbaths in that country last November.

They have been admitted to the College through special tuition-free scholarships granted by the Board of Higher Education last fall. Normally they would be denied entrance on the basis of failure to meet the College's residence requirements.

Because of fear of reprisals against their families remaining in Hungary, the last names of the students are being concealed. Their instructors will not be informed of the fact that they are refugees.

All three were in or near Budapest at the time the rebellion broke out last October. During brief interviews with *Observation Post*, they revealed how they managed to escape from Budapest.

George, twenty-three, used a

forged certificate to get past the border guards. The other two, both named Andrew, one twenty years old and the other twenty-one, made their escapes at night by foot. The younger Andrew walked and ran seventy exhausting miles until he reached safety.

In Hungary, all three attended gymnasium, an eight-year college preparatory school. They all speak English fairly well, two of them having been taught in Hungary. The third, George, has spent three weeks at Bard College, where many Hungarian refugee students are receiving intensive training in English and orientation in American life and customs.

Each is entering the School of Technology.

Efforts Renewed to Use Grant For Students' Summer Camp

By DAVID GROSS

An effort is now being made to put to use a \$250,000 grant to the College which has been lying fallow for six years. Mike Horowitz, Student Government Secretary, said last week that the grant

may be returned to the Jacob Schiff Foundation if it is not used for the purpose for which it was granted, the establishment of

Mike Horowitz Stirs Students' Interests

a Summer Camp for City College students.

President Buell G. Gallagher would approve of the plans, Horowitz said, if a suitable camp

site is obtained on a rental basis. Letters are being sent to the chairmen of every department at the College in an effort to obtain ideas on how they could integrate their programs with such a university center. Horowitz will discuss the camp with President Gallagher today.

Funds for the camp were originally collected in the Spring of 1949 in memory of Marian Weinberg, in whose name the camp would be established. Miss Weinberg was a student at the College in 1949 actively interested in House Plans camping program when she was killed in an automobile accident on Convent Avenue. The students collected \$1,500 for the project.

Former President Harry N. Wright became interested in the creation of such a university center and obtained the \$250,000 grant from the Schiff Foundation. Favorable and interested reports from the department chairmen were obtained by a special presi-

(Continued on Page Two)

Radio Station Seen Feasible

The establishment of a Frequency Modulation radio station and an Institute of Broadcasting Techniques at the College has been termed "feasible" by a special Committee of President Buell G. Gallagher.

According to Ed Hochstein, Vice-President of the Beaver Broadcasters (WVCC) and member of the Committee, a "favorable" report will be made to President Gallagher within two weeks. The report, he said, will give evidence of the feasibility of a station and Institute on a "legal, technical and educational basis."

Tech Council Approves Engineering Curriculum

The College's four undergraduate curricula in engineering have been reaccruited for a five-year period by the Engineers' Council for Professional Development (ECPD). ECPD, the national accrediting organization in engineering, made its report to President Buell G. Gallagher as a result of an inspection made in December 1955.

The report also contained a statement of observations designed to aid in the improvement of the engineering curricula and a separate statement on the

The report especially noted a course in high polymer theory, which it considered "to be filling a very great need."

In a letter to the City College Administrative Committee and the Board of Higher Education, Dr. Gallagher stated that he considered the ECPD observations to be "substantially correct," and that "in so far as circumstances have permitted, we have moved to correct our shortcomings."

Plans for a new technology building, to be constructed on the present site of the reference library at Convent Avenue and 140 St., have already been approved.

President Buell G. Gallagher Substantiates ECPD Observations

chemical engineering curriculum made by the American Institute of Chemical Engineers, a constituent body of the ECPD.

Both statements commented that the faculty contained too many City College graduates and suggested that staff members with more varied backgrounds would be helpful. It was also stated that due to heavy teaching loads there is "an apparent lack" of professional work and research by members of the staff.

Also criticized were the limited space of the technology building and the library and the humanities stem of the curriculum, which the report considered "quite weak."

The chemical engineering department was commended for having several technical courses "somewhat above the average."

Forty-Five Faculty Members Get Professorial Promotions

The promotions of forty-five members of the College's faculty was announced last week by Dr. Buell G. Gallagher. Eleven associate professors were advanced to the rank of full professor.

Promoted from associate professor to professor were: Alexander S. Chaikelis (Biology); Percy L. Apfelbaum (Chemistry); Abraham S. Halkin (Classical Languages & Hebrew); Harold V. Walsh (Drafting); William W. Erotherton and Paul Hartman (Civil Engineering); Samuel Middlebrook (English); Samuel Hendel (Government); George N. Garrison (Mathematics); Guido Errante (Romance Languages); and Edward W. Mammen (Speech).

From assistant professor to associate professor: Donald Farquhar and Asher E. Treat (Biology); Chester B. Kremer (Chemistry); John I. Griffin and Robert D. Leiter (Economics); Hubert Park Beck and Dorothy M. Fraser (Education); Henry S. Myers (Chemical Engineering); James R. Steven (Civil Engineering); Harold A. Rothbart (Me-

chanical Engineering); Robert C. Dickson (English); Kurt Lowe (Geology); Frederick Thiele and Richard Plant (German and Slavic Languages); Henry Malin and Jesse J. Powell (Mathematics); Anthony Orlando (Physical and Health Education); Gertrude R. Schmeidler (Psychology); Adolph S. Tomars (Sociology and Anthropology); Louis Levy (Speech); and William T. Hunt, Jr. (Electrical Engineering).

From instructor to assistant professor: Joseph Taffet (Economics); Norman Schlenoff and Arthur Zeiger (English); Edward Tarangioli (Law); Hiram Hart and Harry Lustig (Physics); Edith H. Borneman, Laura C. Ham and Saul Ostrow (Physical and Health Education); John Bauer (Psychology); Rudolph Bednar, Marshall D. Berger and Stanley Weintraub (Speech).

Grant...

(Continued from Page One) dential committee set up to investigate the possibilities of a summer camp.

The Committee reported that the establishment of a camp was favorable in the three areas of academic, recreational and general use. The departments suggested that the camp could be used for many outdoor courses, which are now given, at best, with difficulty. It was also suggested that the camp could be used by student and alumni organizations and for pre-registration freshmen orientation.

The basic facilities of the camp would include a recreation hall, a lake for boating and swimming, an adequate water supply and sewerage system, varied terrain for Biology and Civil Engineering courses and facilities for winter and summer camping. The site of the camp would have to be a maximum of seventy miles from New York City.

"In order to convert the idea of the camp into a reality, Horowitz said, "all that is needed on the part of the College community is a positive expression of their interest in the camp."

GIVE YOUR BLOOD RED CROSS

'Cabinet' System Established To Assist Dean of Education

By STEVE LUDWIG

Dean Harold H. Abelson (Education) announced last week the formation of a "cabinet" to assist him in the planning and executive functions of his office. The "cabinet," which will alleviate the burden of the Dean's office, was established on a trial basis for the current academic year.

The reasons stated by Dean Abelson for the formation of the group were "a tightening up of the organization and functioning of the several units with a view towards the elimination of diffused or confused responsibility and increasing the amount and quality of service rendered."

A report of the Middle Atlantic States Association Evaluation Committee recommending a diversification of the work of the Dean of the School of Education and Director of Teacher Education brought to light the need for a change in the organization.

The "cabinet" is divided into two groups: Teacher Education Programming and Educational Administration Service. The former, Dean Abelson said, concerns itself with the specific teacher preparation programs, whereas the latter is an interrelated

group." The group will meet once a month.

The Teacher Education Program group is staffed by Professors William I. Pearman, Agnes E. Osborne, Dorothy Fraser, Burrit J. Haddow, Marian B. Brooks, Robert Jahrling and Albert F. Spillman. Five professors compose the Educational Administration Service: Arthur Mallon, Harold J. Carter, Robert Jahrling, Herbert Nechin and Bertram Epstein.

Keys...

In accordance with a new system for the issuing of keys for student organization offices, organizational lists of members eligible to use keys must be submitted to Student Government. Those students receiving SG's approval will receive a card to enable them to obtain keys in Room 151 Finley.

Use of Nuclear Reactor Delayed for One Month

The use of the subcritical nuclear reactor for research and undergraduate courses at the College has been delayed until the end of February. The reactor material was originally scheduled to be assembled in November and ready for use when the Spring semester began.

Dean William Allan (Technology) explained that the delay was due to the inexperience of the Atomic Energy Commission (AEC) in dealing with subcritical reactors for educational institutions. The AEC, he said, had to determine their policy regarding the nuclear assembly before

All other material necessary for the reactor, which includes package radiation warning signs, pilot drills, geiger counter tubes, woven space cloth, and 214 feet of aluminum tubing, Dean Allan continued, has been ordered.

"College authorities have already begun clearing Room 12, Lewisohn Stadium, where the reactor will be assembled," Dean Allan said.

The subcritical nuclear reactor will be used for instruction in nuclear physics and power courses offered by the four engineering departments of the School of Technology and the departments of Physics and Chemistry of the College of Liberal Arts and Sciences. The College will be one of the few schools in the country offering this equipment for undergraduate use.

Dean William Allan
'AEC Causes Delay'

loaning the College more than \$100,000 of nuclear material.

Delivery of the 2,500 kilograms of natural uranium and the neutron source, polonium and beryllium to be used for the subcritical assembly, is expected today and February 18, respectively.

Frosh...

A freshman reception will be held on Friday from 3-6 PM in the House Plan Lounges, Rooms 325 and 330, Finley. To help orient students, Mr. Jerry Gold (Student Life), Mrs. Constance Niebauer (Student Life), and House Plan representatives will talk on the College and House Plan.

President Proposes Increase of \$108,000 for 1957-58

President Buell G. Gallagher announced last week a proposed \$11,000,000 operational budget for 1957-58. The budget shows an increase of \$108,000 over last year's costs.

Dr. Gallagher asked the Board of Higher Education to create four new assistant dean positions. This would alleviate, he said, the burden placed on the Dean's offices of the Schools of Liberal Arts and Sciences, Technology, Education and Business.

This request was made in accordance with the report of the Middle Atlantic States Association Committee which suggested the creation of an Academic and Executive Vice-President positions.

For the third straight year, President Gallagher requested a \$20,000 appropriation for intercollegiate athletics. The money would be used mainly for the creation of more freshmen teams, which includes the hiring of ad-

ditional coaches. The appropriation would also pay for transportation expenses and new uniforms.

Brooklyn College, Hunter College and Queens College supported Dr. Gallagher's request for a \$50,000 intercollegiate athletic appropriation for the municipal colleges. Mr. Leo Klauber, Varsity Alumni Association President, and Mr. Seymour Weissman, Alumni Secretary, also spoke in behalf of the request.

Among other proposals made by the President were instructional lines for five assistant professors and five instructors, the addition of seven members to the guidance offices and six additional staff members for the new Cohen Library.

Reporter

Professor Stewart C. Easton (History) left the country last month for a trip around the world. The purpose of his tour is to gather information for a new course, British Commonwealth in the 20th Century, to be presented in Spring '58. He will also write a series of current event articles for Observation Post from India, Burma and Kenya.

Steier, Former BC Student, Refused Admission to College

By RALPH DANNHEISSER

Arthur Steier, former Brooklyn College student who was expelled from BC last month for "continued disrespect for campus rules of conduct" has been refused admission to this College.

Student Council protested Steier's suspension in a letter sent to Dean Herbert Stroup, BC's Dean of Students, on the grounds that the suspension was a violation of "academic freedom and due process."

In a letter dated January 18, Dean of Students Daniel F. Brophy informed Steier's parents that he would be unacceptable to the College, since "it should be perfectly apparent that no one at City College should be expected to sit in judgment on the decision of a faculty at a sister institution."

This, Dean Brophy said, is especially true when such a decision concerns itself with "an internal problem" at the other institution.

The College, Dean Brophy ex-

plained, has consistently refused admission to students suspended or expelled from another college, until they had "settled their differences" with that institution. Such students may be admitted only when "a fresh start in a new environment" is recommended by authorities at the other school, he said.

Since being rejected here, Steier, an upper senior at the time of his expulsion has applied

Dean Daniel F. Brophy
Rejects Steiers' Application

for admission to Queens College and Hunter College.

Before reaching his decision, Dean Brophy met Tuesday, January 15, with Dean Herbert Stroup, BC's Dean of Students. It was Stroup who originally suspended Steier on September 21. His expulsion by the BC Faculty Council followed on December 18.

Appeals to BHE

When contacted last Monday, Steier said that he had sent an appeal from his BC suspension to the Board of Higher Education the previous day.

IFC Code of Ethics Set; Frats Approve 3 Points

A code of ethics for the College's fraternities is now in effect. The code, a subject of discussion for the past three months between Dean James S. Peace (Student Life) and the Inter-Fraternity Council (IFC), was based on suggestions by the two parties involved.

The six point code was suggested last semester by Dean Peace to the IFC. He requested that the Council gather suggestions and opinions from its member fraternities and present them to him.

The code provides that "rushing" of freshmen may begin at the start of the semester, but pledging is illegal until the mid-term point when the pledgee's academic standing can be determined. A pledgee must obtain a "C" or better average and cannot become a member of a fraternity until he has completed nine credits.

IFC did not approve of this regulation. The Council suggested instead that the pledgee "secure from all instructors... a grade of "S" (satisfactory) every three weeks." This was found unfeasible and too cumbersome a method by Dean Peace.

Fraternities must now submit "a fire prevention check list to the Dean of Student Activities (Dean Peace), signed by the President of the fraternity and attended by the faculty advisor." The fire regulations will be in accordance with the rules of the Fire Department of the City of New York. Failure to comply

with the fire laws will result in the revocation of the fraternity's charter and the loss of all campus privileges.

Fraternity houses, Dean Peace said, would be shut down by the Police Department as "cellar clubs" if they were not a chartered college organization.

Also provided for in the code is the conduct for pledge programs not harmful to the "physical condition" of the pledge and the submitting of a list of pledges in order to determine their physical condition and academic standing. Failure to comply with any of the code's stipulations will be brought before a jury consisting of the Council of Presidents of IFC.

Dean James S. Peace
Forms Code of Ethics

Of the six points in the code, three were approved by IFC. The fraternities objected to the regulations on pledging. They maintained that such a rule will hinder their efforts in obtaining candidates because of the competition with House Plan and other College organizations.

The purpose of the code, Dean Peace said, is to insure the health and well being of the fraternity members. "The College," he continued, "has this moral obligation to the students."

Mercury...

(Continued from Page One)

Board of the Association.

Last week the Committee interviewed one of the faculty advisers of Mercury, Mr. Irwin Stark, and Saul Sofer an dCarl Gottlieb, editor-in-chief and managing editor respectively, to determine their "attitude and viewpoints," Mr. Weisman said. Informal discussions to obtain similar information, he said, are also being held between members of the committee and the BHE.

(The BHE authorized the City College Administrative Committee to conduct the January 9 hearing at which representatives of Mercury sought to prove the publication merits continued use of the College's seal and name. The Administrative Committee's chairman, Dr. Charles H. Tuttle, said last week that his committee would discuss the hearing Wednesday evening and probably make recommendations to the BHE February 18.)

College Frosh Number 260

The smallest freshman class in the last twenty-five years, 260, entered the College this semester. More than half of the entering class, 140, have enrolled in the School of Technology, the remainder in the School of Liberal Arts and Sciences.

Mr. Robert Taylor, Registrar said, "The decrease in January enrollment is due to the elementary and high school one year promotion plan." He continued, "In the future, we can expect a registration of 200-250 students for the January term." Last January the entering class numbered 274."

The statistics for the fall '56 term show that the total enrollment at the uptown day session center in 7,265. The men outnumber the women 5 to 1. Of the 3,287 technology students, only twenty-seven are women.

3,060 Receive Polio Vaccine

Of the 3,400 students who filed applications for anti-polio inoculations 90%, or 3,060, have already received their first shots.

The series of three inoculations which is being given free of charge to all students under twenty was initiated during the week of January 21. All students who are part of the program have already received their first shots.

Dr. Abner Stern, head physician at the College, expressed satisfaction at the success of the program. He said that the response of the students, both at the Uptown and Downtown Centers, was very gratifying.

Student Government

By SG President STAN WISSNER

I would like to thank *Observation Post* for giving me this opportunity to present before the student body my program for this semester's Student Government. I hope that through this column the reader will obtain a certain insight into the role Student Government plays on this campus.

My program for Student Government has a double purpose: achieving what I consider to be the immediate aim of Student Government—increasing respect for the organization, and having Student Government work towards attaining certain long range goals. I will divide my discussion into these two categories.

The constant aim of Student Government must be one of service to the academic community. Not only is Student Government judged by the services it performs, but also, these services give the organization a purposeful existence at the present time. Such projects as the Blood Bank, low cost flights to Europe, Health Insurance, the Reading Clinic, and a host of others have been a boon to the whole academic community.

This semester I would like to see Student Government put into operation the following services for the student body:

- A greater opportunity should be offered for the students to obtain vocational counseling. To do this it is necessary to work closely with the Placement Office. I think that there should also be a "Career Guidance Day."

- Courses in typing and stenography should be made available to the students. If these courses cannot be given free of charge then there should at least be discount rates available.

- A student discount booklet for clothing and manufactured appliances. I realize that this project has met with a limited success previously. I believe however it to be a good idea.

- A reinstatement of the Driver Education Course.
- A compendium of night clubs, restaurants, and off-Broadway theatres for the students' information.

These are but a few of the projects Student Government will undertake this semester. If Student Government can carry these worthwhile projects through to fruition, than I believe it will achieve the respect it deserves.

Student Government exists, at present, without responsibility or authority. The only area in which students exercise a modicum of responsibility and authority has been in the allocation of fees. However, even in this area an attempt is being made to minimize the role of the students.

The reason Student Government exists without responsibility and authority is that the Faculty and the Administration from whence it must derive these prerogatives are unwilling to treat Student Government as a meaningful organization.

This situation exists because there have been leaders within Student Government who are not mature enough to be in college, much less representing college students. Such students attain their offices because capable students have not been attracted to these positions. Many students, among them those who would make good leaders, have recognized the picayune nature of some of Student Government's endeavors, and the futility of some of Student Council's deliberations. One of the ways to remedy this situation is to have the faculty place a greater trust in Student Government and hence make the students appreciate its importance. This is one of the long range goals toward which I would like to see Student Government work. I hope to accomplish this in the following manner.

There are a number of problems which face our College which can only be solved by interested students and faculty working closely together. Such problems as the increased college enrollment, the role of the library in the College, the effectiveness of the recitation type class over that of the lecture type class, and making the Freshman Advisory Program more effective, are problems in which students and faculty must work together. I have started now to recruit students within and outside of Student Government to work on these problems.

It is my hope that if something worthwhile does result from the joint efforts of students and faculty, these faculty members will place a greater confidence in what the students can do and in turn "spread the Gospel."

In the light of what has been said, the long range program of Student Government becomes self evident. It is to provide a practical education in democratic self government. One person has described this goal as "An insurance policy for a nation that prides itself in the capacity of its people to govern themselves."

I am advocating that through a process of evolution, not revolution, powers, responsibilities, and authority be delegated to the structures that already exist within the Student Government. These prerogatives should be given when the students have manifested the capabilities to assume them. This process must take place so as to insure that students realize democratic principles in the realm of their own activities.

Postnotes . . .

- Mr. Ivan Samuels replaced Mr. Saul M. Brenner as Assistant Director of the Job Placement Bureau last week. Mr. Brenner left the Placement Bureau for a position as Personnel Manager with the Polarad Electronics Company in Long Island City. He had been Assistant Director of the Bureau since 1954.

- Professor J. Bailey Harvey (Speech) last week was appointed Chief Marshall of the College.

- Dr. Oscar Zeichner (History), Assistant Dean in charge of the School of Graduate Studies, last week replaced Dr. Oscar Janowsky (History) as head of its graduate program.

Time Decides To Take Rest During Break

By SHELLY HALPERN

Time as well as students took a holiday during the intersession. For the past three weeks, the clock atop Townsend Harris Hall has been registering whatever hour suits its whimsy, and of late has staunchly maintained its position at high noon.

In spite of the clock's erratic behavior during finals week, Mr. Kenneth G. Fleming (Superintendent of Buildings and Grounds) said that there were no complaints from students who missed their examinations because they didn't know the correct time. "Students know what time it is when it comes to finals," he said.

According to Mr. Fleming, the clock is usually serviced once a year whether or not it needs to be repaired. The recent cold snap and the sudden drop in temperature, however, congealed the oil in the mechanism and stopped its operation before the yearly examination.

Until the Department of Building and Grounds chooses a clock repair company on the basis of the lowest bid offered, the hands will stubbornly remain "at prayer."

Will the clocks soon be running smoothly? Only time will tell.

Shepard Hall Mystery Man Caught in Act

A mysterious night visitor at the College for the past seven years was finally apprehended three weeks ago and arraigned at the Bronx County Magistrates Court Friday. The man, whose name is being withheld, is a former Evening Session student.

The night caller was apprehended at 1:15 AM emerging from Shepard Hall. He had been placing editorials from the *New York Journal American*, dating back to 1940, on the third floor of the building. The man was not seen posting these editorials, on which he had written militant, anti-communist remarks, Dean S. Peace (Student Life) said, but when arrested they were found in his possession.

The former student was given a suspended thirty day sentence on the condition that he not return to the College. If he is found on the College premises in the future, six months will be added to his sentence.

Dean Peace brought an injunction against the night visitor for two reasons. First, he wanted to prevent the former student's return to the campus and also to make it known that the College will deal severely with other visitors coming to the College for criminal acts.

Secondly, Dean Peace wanted a clarification of New York City's 722 law which forbids loitering at a public place. The test case gave evidence that the law is effective twenty-four hours a day and not just while the College is open.

—Gross

Review

'Gondoliers'

By Michael Spielman

Towards the end of their brilliant partnership Sir William S. Gilbert and Sir Arthur Sullivan produced one of their most beautiful light operas, the *Gondoliers*. Rather poor from a dramatic viewpoint but truly delightful musically, this story of the two gondoliers who rule jointly as king of Barataria is one of their most intricate and difficult works, and consequently rarely performed. It was indeed a king-sized undertaking for the College's Gilbert and Sullivan Society last weekend, January 25-26, at the Joan of Arc Junior High School, and if the result was at times less than satisfactory, it is to some extent understandable.

The plot as usual is complex, and concerns the Duke and Duchess of Plaza-Toro, whose daughter Casilda had been married in infancy to the heir to the throne of Barataria. This heir however, had apparently been abducted in childhood, to Venice, by Don Alhambra the Grand Inquisitor, and is now believed to be either Marco or Giuseppe—unfortunately no one knows which. The two dashing gondoliers had just married Gianetta and Tessa, but are persuaded to leave their wives temporarily to jointly rule Barataria, until the mystery is cleared up. At the conclusion it is revealed that neither of the gondoliers, but Luiz the drummer boy, whom Casilda had secretly loved, was the King of Barataria and all lived happily ever after. The confusion is great, but it is a vehicle for some of Sir Arthur's finest music—and this saves the affair.

The staging of this production was again handled for the G&S Society by Danny Finkelstein, who has done such excellent work previously. But with the *Gondoliers* his direction was uneven, and lacked the inventiveness to really carry it off. With all its complexity, there is very little action or excitement in the plot, and all too often Mr. Finkelstein left the actors standing flatfooted on the stage. A true lightness of touch and ingenuity is required to put over much of the dialogue and singing, but this was frequently lacking. In the more obvious, farcical parts, Mr. Finkelstein did better. Here he was working with actors who have shown in the past, their ability with a broad, low comedy style. (Such stalwarts as Ralph Fried, as the high stepping Grand Inquisitor, and Richard Solow and Annette Gritz-Carelle as the Duke and Duchess of Plaza-Toro provided some of the funniest moments in the show.)

The music director was Emilio Rivera Jr. who managed to produce a really fine musical experience. This, despite an uncoordinated orchestra that was not up to the difficulties of the music, and unfortunately, was often more of a hindrance than a help. But the singing was excellent.

Gondolier spoofs, among other things, the grandiose style of Verdi, and the score is full of very difficult ensemble numbers, a long section of recitatives where there is not a word of spoken dialogue, and the usual lightning fast patter songs. Considering that many of the principals had never had any vocal training, the results were marvelous.

Alvin Friedman and Leonard Goldenberg as the gondoliers, and Anita Facton and Cecile Carol Berger as their wives, were all in fine voice. Particularly Mr. Friedman and Miss Facton gave sparkling performances that more than made up for the dramatic shortcomings of their partners. Mr. Goldenberg's performance was marred by his stiff, unsure acting, but his singing was good and he reached his forte with a truly beautiful rendition of the romantic song, "Take a Pair of Sparkling Eyes."

As Casilda, the future queen, Cynthia Baldwin did a very creditable all around job, and looked quite beautiful and charming in her hoop skirt and white wig.

Andi Steinmetz did the choreography for the short but disjointed dance in the second act, which was saved only by her own all too brief appearance as a perfectly stunning flamenco dancer. The sets were simply and tastefully designed by Alan Greenberg.

To sum up, and this performance is particularly difficult to sum up because of the many extremes, one is tempted to feel that a few more weeks of preparation would have made a remarkable improvement. Much of the acting was poor, and some of the singing, by supporting characters, was downright bad. On the other hand, the very difficult ensemble singing had wonderful balance and finesse.

Whatever the reason, whether it was the difficulty of the work, or the extremely rude audience on Friday night, the G&S players showed a marvelous potential, but unfortunately, did not always live up to it.

Awards . . .

Professor Mark W. Zemansky (Chmn., Physics) was honored Thursday with the Oersted Medal of the American Association of Physics Teachers for "outstanding contributions to the teaching of physics." A member of the faculty since 1920, Professor Zemansky served during 1943 and 1944 on the Manhattan Project which developed the atomic bomb.

On January 17, Professor Adolf Leschnitzer (German) was presented with the Order of Merit of the Federal German Republic by Dr. Adolph Rifferschedit, German consul-general.

The Opening Victory

Mercury—Triumphs and Disasters

By Barry Mallin

Mercury, threatened with the loss of its right to use the College's name and seal, is now in one of the most critical periods of its seventy-seven year existence. In a series of articles, Observation Post will trace the past history of the humor magazine.

From the very beginning, Mercury gave notice that it would leave a lasting imprint on the College. No other school publication could possibly hope to equal its accomplishments in that turbulent first semester.

In Mercury's second issue, a short month after its birth in the spring of 1880, the first editors ignited an incident that resulted in having General Alexander S. Webb, then president of the College, blasted and smeared in newspapers throughout the country. And yet the new magazine was still able to survive and become the most successful literary and humor publication the College has produced.

to the job of teaching elocution, a suspicion that added crude oil to his fury."

Webb then suspended Mercury's chief editor, Edward J. Newell, but this move proved costly to the president. Newell, besides attending CCNY, was also a freelance reporter for several New York newspapers.

A number of these papers sharply criticized "Emperor Alexander" for his interference with the freedom of the press. Other newspapers then copied the story and Webb was soon being branded throughout the country as, among other things, a "tyrant," "despot," "autocrat," and "Czar Alexander."

"... All over the country the affair was taken up," wrote Mott, "and when we read from Phil Kearney, the Sand-Lot Orator of San Francisco, 'Go it, brave boys,' we all began to feel really heroic, though perfectly innocent of any act or thought that deserved the name of courage."

This surge of public pressure forced Webb to moderate his attitude, and in a short time Newell's suspension was lifted.

And so it was that Mercury—destined later to be transformed from a news magazine to the leading humor publication at the College—was saved from a quick death.

L'affaire Rizzo

The picture which has emerged from the SFCSA sub-committee hearing on Michael Rizzo's appeal shows gross negligence on the part of those students responsible for the handling of his original appeal to Student Government. It is one of apathy towards the rights of an individual and indifference to the by-laws of the constitution of Student Government.

When the full SFCSA deliberates Rizzo's appeal it will have two questions before it: whether or not to invalidate the election for Senior Class President, and whether or not revision of the by-laws is necessary to prevent a recurrence.

On the question of invalidation of the election, the many complex factors involved make a judgment difficult. The election was decided by only sixteen votes, and among the many denials of violation two are admitted.

What the SFCSA must decide is how significant these violations—relatively minor under other circumstances—were in this close election.

In contrast to the complexity of the first question, consideration of possible by-law revision appears comparatively simple. That Rizzo is still waiting for a fair hearing is due to irresponsible conduct on the part of individuals rather than to procedural weaknesses. The instruments for handling effective handling of the appeal were there. The students involved, however, failed to utilize them.

The Elections Agency, which is specifically delegated in the by-laws to hear appeals of candidates passed the buck to the Executive Committee with a "We don't want to be bothered with it" attitude.

Exec accepted the responsibility, as is permitted under the by-laws, but did not fulfill it.

That an injustice to Rizzo has been committed is unquestionable. Although some of his charges were based on hearsay, others were substantial enough to warrant a thorough and careful investigation.

The failure of the individuals involved to accord him a fair hearing however has other implications. These same individuals who acted irresponsibly are advocates of broader responsibilities for students in the governing of their activities. Yet by the adoption of such attitudes as those displayed in this instance they tend to support the members of the Faculty and Administration who feel that students in general are not mature and responsible enough to take on a greater measure of authority.

The damage is done. It can only be hoped that the shame and approbrium resulting from this situation will serve as a stimulus for students to display a more responsible attitude in the future.

Welcome

Two hundred and sixty new students, the smallest group of entering freshmen in recent years at the College, are joining the ranks today. Of them, three are young men from Hungary, who in the last year have suffered much hardship. To them, and to all the new men and women of City College, we extend a cordial welcome, with the hope that the next four years will be exciting and meaningful.

You will discover, perhaps, that college life is not all it's cracked up to be. Some of you will find to your dismay, that there are many students around here who don't give a hang for anything but getting a sheepskin. We hope that you won't fall into this category. We hope that you will quickly learn that college offers many things outside the classroom, that may be just as, or even more important for your education. This too may be strange to you after the type of schools you have gone to up to now.

But above all, you will find that for the first time during your formal education, you will be on your own. The responsibility for what you learn is on only your shoulders, and you will get from the College only what you are willing to put into it. So while there is no red carpet out, indeed three of you would want anything but a red carpet, we welcome you to the fold, and hope that you will carry on in the best of the City College tradition.

Mercury was born when a group of students, indignant at "the painful deficiency of newspapers at the College," organized it as a news magazine. A rash of papers had appeared several years earlier, but each lacked the necessary quality to hold student interest, and were forced to disband.

Possessing a superior group of editors, Mercury achieved almost immediate success. Before the founders could enjoy their popularity, however, they were in the midst of the magazine's first crisis.

An editorial in the provocative second issue, criticizing the decay of instruction in oratory at the College and urging an appointment in this department, started the trouble.

Writing in Mercury's fiftieth anniversary issue, Lewis F. Mott, one of the founders of the magazine, gave this account of what ensued:

"... General Webb was an explosive man, and there was nothing that would cause a more violent detonation than disparagement of the daily student orations.

"The editorial board was called to the office and fiercely harangued by the president... Though we could not understand just what he was talking about—Webb in such speeches always said it first, and thought it afterwards—we inferred that he was hopping mad about something.

"... I found out later that Webb had suspected us of being subsidized by a certain aspirant

SG Elections Policy Probed By Sub-Committee of SFCSA

(Continued from Page One)

tions of electioneering violations by his opponent before the Executive Committee. Pollner was cleared by Exec and his election held valid, prompting Rizzo to appeal to SFCSA.

The FCSA asked Dean James S. Peace, a non-voting member, to handle the case. Dean Peace then formed the sub-committee, composed of Dr. Lawrence Podell (Sociology) and SG President Stan Wissner.

Before the sub-committee, Pollner again denied Rizzo's charges that he campaigned in a class, campaigned at the polls, left up campaign posters after the deadline, and campaigned between the two elections. He did, however, admit that Raymond, the College's bagel vendor, had campaigned for him and that he (Pollner) had driven through Convent Avenue with campaign posters on his car.

Another charge by Rizzo was that, according to the SG constitution, the Elections Agency is empowered to make a decision in cases of appeal, and not Exec.

Under the questioning of Dr. Podell, Joel Resnick, co-Chairman of the Elections Agency, asserted that he advised Rizzo to take his case before Exec because he felt it "could do a better job" than the Agency. He said that the impending Christmas vacation made it difficult to gather the members for a hearing. "If in 'passing the buck' to Exec I was derelict of duty," Resnick said, "then I am guilty."

Rizzo accused Exec of not informing him formally that a hearing would take place. He said that the hearing first came to his attention in an article in *Observation Post* the day it was scheduled and that he did not have sufficient time to prepare his case.

It was further charged by Rizzo that in the hearing before Exec, discussion of campaign practices occurring before the first election whether a quorum of Exec mem-

was barred. He also questioned bers was present and accused the hearing of being too informal.

Michael Horowitz, last term's SG Treasurer and a member of Exec, said that Exec did not discuss matters occurring before the first election because he and Bill Brown, last term's SG President, considered the second election to be a new one.

Answering the questions of Dr. Podell and SG President Stan Wissner, Horowitz testified that he and Brown, along with Howard Schumann and Bohdan Lukaschewsky who arrived late at the Exec hearing, considered the "burden of proof" to be on Rizzo.

Rizzo also objected to Campus' re-endorsement of candidates between the two elections. He based his objection on the fact that since no electioneering was allowed between elections, an unendorsed candidate was at a disadvantage.

Big Ben? . . .

An illuminated clock will be installed by June in the tower of Finley Student Center, facing the South Campus lawn. The clock, which will be six feet in diameter, will not cost the College more than \$2500, according to Mr. Kenneth Fleming Superintendent of the Department of Buildings and Grounds. Bids for installation are now being made to various companies.

Frosh Cage Foes' Confusion Result of Twins, Not Illusion

By NELS GRUMER

Opponents of the College's freshman basketball team have been seeing double this season, and no eye doctor can help them. The cause of their trouble is the court combination of Tournour and Tournour.

John and Gene Tournour are identical twins. They are as alike as two backboards. The only way to distinguish between them is to ask them.

Both eighteen year old six-footers attended Bayside High School in Queens. They played basketball and baseball, besides attending a few classes. While at Bayside, John was selected All-Queens in basketball, and had a tryout with the New York Yankees as a first baseman.

Although John has a pair of birthmarks on his cheeks, very few who know the twins can tell them apart. George "Red" Wolfe, coach of the freshman team,

John and Gene both intend to try out for varsity basketball and baseball, so the chances are that things will be even more confusing for College opponents, as well as our own coaches, in the future.

John (left) and Gene Tournour
Or Is It Vice-Versa?

can't, "until they put on their uniforms."

The twins enjoy playing together on the court. They feel that they can work together well. On occasion, they have even double-dated together "with no confusion."

They make a point of dressing differently, and have done so since high school. Neither one can find any disadvantages in having a twin. In fact, they admit, it sometimes comes in handy, especially in class. They have the same degree objective, Electrical Engineering, and have had some courses together.

ANNOUNCEMENT BY Illinois College of OPTOMETRY

Applications for admission to classes beginning September 9, 1957 are now being received.

Three year course of professional study leading to the Degree of Doctor of Optometry

Requirements for Entrance:

Two years (60 semester hours or equivalent quarter hrs.) in specified liberal arts and sciences.

Fencers Absorb Third Loss; Foiled by Midshipmen, 17-10

The College's fencing team lost its third match of the season on Saturday, January 26, absorbing a 17-10 defeat at the hands of the United States Naval Academy at Annapolis.

Although the Beaver parriers displayed their best form to date, the Sailors, who are rated as one of the top squads in the country, had too much depth.

Joel Wolfe, City captain, was defeated by Navy's George Robillard, 5-2, but managed to win his other two bouts. Al Kaplan, substituting in the foil, was victorious in his only match. Sabermen Elliot Mills and Bob Melworm also performed well. Mills won two of his three bouts, and Melworm copped his first intercollegiate bout against Navy's best saberman, Charles Eidson.

Despite the setback, Beaver Coach Edward Lucia was very pleased with the performance of the squad. "If we had fenced as well against Yale and Columbia, we would have won easily," he commented. "We have always been a late starting team and when we compete in the East-erns (the Eastern Intercollegiate Fencing Championships, Friday, March 15, and Saturday, March

16, at the Concourse Plaza Hotel), we will make a name for ourselves."

The next match for the sword-

Coach Edward Lucia
'Team Improving'

men is against MIT Saturday in the Wingate gymnasium.

Sport Notes

• Big-time soccer of sorts came to the College last week with the approval of next semester's soccer schedule. The Beavers will play host to perennial powers Temple and RPI in Lewisohn Stadium, and will travel to West Point and Brockport, New York. They will also play six Met Conference games, including one playoff tilt with a Met foe.

• Plans for the new freshman baseball team were finalized last week with the hiring of Mr. John Davis as coach. The squad will play six games this season, with Fordham, Columbia, Manhattan, Hunter, Brooklyn and NYU.

• The basketball game with St. John's originally scheduled for Tuesday, February 26, has been postponed until Saturday, March 2.

• Coach George "Red" Wolfe had mixed emotions during last Monday's basketball preliminary. The freshman team, coached by George "Red" Wolfe, defeated the Baruch school evening session team, coached by George "Red" Wolfe!

• Hector Lewis, 6-5 reserve on the basketball team, suffered a fractured ankle early in January and will be lost to the team indefinitely.

Aquamen Dunk Fordham To Continue Met Sweep

By BERT ROSENTHAL

Metropolitan swimming teams continue to fall victim to the College's aquamen with ridiculous ease, as witness the Beavers' easy 58-27 win over Fordham Wednesday in the Wingate Pool.

The triumph was the tankmen's fourth in five weeks, with a loss to Ivy League opponent Columbia the only blemish on an otherwise perfect record. Victories have been registered over Manhattan (55-23), Brooklyn Poly (74-12), Hunter (74-8), and Fordham.

Although two Maroon mermen, Caesar Cirigliano and John Hayman, stole the spotlight in the individual competition by coping five events between them, the Lavender's overall depth and balance that enabled them to score points in all ten events carried them to victory. All fourteen men employed by City Coach Jack Rider contributed to the point total, whereas Ram mentor John Lyttle got mileage out of only three of his eight performers: Cirigliano, who won the 50, 100 and 440-yard freestyle events; Hayman, a winner in the 220-yard freestyle and the 200-yard backstroke; and Ed Muir, who finished third twice.

Besides coping both relays, the Beavers had winners in the 200-yard butterfly (Joe White), the one-meter dive (Al Smith), and the 200-yard backstroke event (Dick Fisher).

The most pulsating finish of

the afternoon occurred in the 50-yard freestyle. Cirigliano just touched out the College's Steve Kesten, with Beaver co-captain Richie Silverstein only a half body behind and the Rams' Paul Hunter a few feet back. Cirigliano and Kesten were both clocked in 0:24.5 seconds, only five-tenths of a second off the pool record.

Intra Program Begins Thurs.

The College's spring intramural program will begin Thursday at noon with the start of the wrestling tournament. Entry blanks are obtainable in Room 107 Wingate.

The basketball tourney will begin on February 21. Handball and softball eliminations and a road race will be held in March, with a track meet and co-ed tennis following in April.

Swimming events will round out the program in the last week in May.

Prizes will be awarded to the winners of the various meets, which will be held on Thursdays from noon to 2 P.M.

Baseball Tryouts . . .

Tryouts for the varsity baseball squad will begin at 9 AM Saturday in the Goethals Gym.

Tryouts for the newly instituted freshman squad will be conducted on Tuesday, February 12, in the Goethals Gym. Candidates whose last name begins with the letters A-L should report at 9 AM. Others should report at noon.

Cagers Set Scoring Mark; Meet Fordham Tomorrow

The highest point total ever amassed in fifty-two years of City College basketball was posted in the Wingate Gym last Monday, when the Beaver quintet rolled to a resounding 101-74 victory over the Kings Point Mercant Marine Academy.

A three-point play by substitute Mike Gomshay with twenty-three seconds remaining eclipsed the old mark of ninety-nine set against Upsala last year, and put the Beavers over the century mark for the first time.

Gomshay's goal, the first of his varsity career, came on a driving lay-up, and sent the small but noisy crowd into wild applause rarely heard around these parts

Although the outcome was never in doubt, the Lavender rooters had some tense moments toward the end. City led 97-65 with 3:40 remaining, but the visitors' pressing defense held the Beavers scoreless for the next three minutes. Marty Doherty finally broke the ice with a foul shot at 0:36 to set the stage for Gomshay.

Face Fordham Tomorrow

With new heights to conquer, the Beavers will tackle Fordham tomorrow night at the Ram Gym, Third Avenue and Fordham Road in the Bronx. Game time is 8:30 P.M.

one of the oldest in New York. The two schools have met forty-one times since 1906, with the Lavender holding a 28-13 edge.

The Rams will be led by Jim Cunningham, 6-3 forward who has been averaging more than twenty points per game. Bill McCadney, 6-7 center, is the squad's top rebounder.

The Beavers will probably start with Ralph Schefflan and Joe Bennardo in the backcourt, Bob Silver and Marv Rose at forward, and Syd Levy at center.

Edged by Rider

In their first outing during the intersession, the Beavers lost a tough contest to Rider College of New Jersey, 71-68.

Marv Rose led the Beaver scorers with twenty points, but the star of the game was Rider's Leo Chester, who tallied thirty. He hit on twelve of nineteen from the floor and six of six from the foul line.

The lead changed hands fourteen times in the hard-fought

Joe Bennardo Set Threat Against Rams

with a freshman preliminary at 6:30.

Reserved seats for the game may be purchased at the gate for \$1 upon presentation of a Bursar's receipt.

The City-Fordham rivalry is

Leo Chester Real Rough Rider

contest. City led 36-35 at the half, but the Broncos opened the biggest spread of the game, 59-53, in the second period.

At that point the Beavers brought the partisan crowd to its feet with a six-point spurt that knotted the count, and no team led by more than three thereafter.

The Lavender lost the game at the foul line. They missed ten of twenty free throws, including two in the last minute. —Mayer

Riflemen Beat Violets for 6th

The College's rifle team extended its undefeated streak to six on Friday, January 11, by beating New York University at the Lewisohn Range.

The Beavers amassed a total of 1395 points to NYU's 1381. Ed Mahecha paced the squad with a 291 score, followed by Morton Solomon's 280. The other three qualifiers for the sharpshooters were Ernest Trump, with 277, captain John Marciniak with 275, and player-manager Steve Madigan, who fired a 272.

The top scorer for the Violets was Dick Witkover, with 283. The win kept the Beavers in a first place tie with Rutgers and St. John's in the Metropolitan Intercollegiate Rifle League.

Last year, the Lavender riflers finished seventh in the league.

SportOPics

By Bob Mayer

Every year around this time, when local basketball attendance falls ever lower than usual because of intersession, and the Metropolitan schools get knocked off by out-of-towners, the idea of a Metropolitan Basketball Conference mushrooms up and enjoys a brief period of publicity. Like the weather, however, everybody talks about it and nobody does anything, and when the new term begins and a few intracity rivalries temporarily reawaken the waning local interest in the sport, the idea is laid to rest for another season.

This year has been no exception, and although several league proposals have been offered by the Metropolitan press, the idea is dying out. Before we bury it, a brief autopsy is in order.

The idea is perennially killed, it seems to me, by a group of coaches and athletic directors who are living in the past. The arguments they offer against it—that "the best teams are the independents," and that "a team shouldn't get tied down to a conference schedule"—may have been valid six years ago, but today they are nonsense. Almost all of the top teams in the country play part of their schedules in one conference or another, while the Met teams, without a league to shackle them, have managed to neatly fade into the background of the national picture.

Dave Polansky, coach of the Beaver quintet, is not one of these reactionaries. He would judge any proposal on its own merits before rendering a decision. Why, then, is Polansky cool to the idea of the College joining a Met loop?

"It would be silly," he said, "for us to try to compete on even terms with schools that give athletic scholarships, since many of our boys haven't even had high school experience."

Polansky, as usual, hit the mark with that one. The scholarship difference is the main reason we've been losing consistently of late to teams like NYU, St. John's, Manhattan, etc. But it's my contention that if we're going to continue playing these teams (and surely no one advocates ending these traditional rivalries merely because we haven't been winning), then what is the harm of losing to them, if we do, in a league.

When you contrast with this the benefits a league would bring, the idea becomes extremely desirable. A Met conference is not, as some would like to think, a panacea to restore New York basketball to the lofty position it once held. Out-of-town schools, with their green campuses and matching money, will continue to lure the top local schoolboy players away from the city. But a league would reawaken local interest, and serve as a shot in the arm for anemic gate receipts. It would give the strong teams a championship to shoot for, and the weaker ones a chance to play the role of a spoiler. It would add fuel to the few hot rivalries we have left, and kindle others, all of which would increase "school spirit" or whatever you call the atmosphere that is lacking at "subway colleges."

The advantages that a league would offer heavily outweigh the drawbacks. It's time the idea was given serious consideration instead of the lip-service it's been getting.

The Record-Breaker

Too Much for the Scoreboard

of late. It capped a one-sided contest that saw the Beavers lead by as much as thirty-three at one point.

Marv Rose and Syd Levy, with twenty-one points apiece, led the scoring spree that enabled coach Dave Polansky to remove his regulars with ten minutes remaining. Rose hit on ten of sixteen shots from the floor.

Matmen Maul Dickinson For Fourth Straight Win

The College's wrestling team won its fourth decision of the season without defeat by conquering Fairleigh Dickinson, 23-11, on Saturday, January 26, at the losers' gym. City won five of eight matches, including three pins, to cop the victory.

After the match, coach Joe Sapora remarked: "This is the best team we've had since the war and one of the finest I have ever coached."

The match began in unusual style with the 157-pound contest rather than with the customary 123-pound opener. Sonny Golia got the Beavers off to a successful start with his second straight victory, a pin over Pete Delaney at 3:28.

Sorry . . .

We regret that we were unable to report on Saturday's sports events. To do so would have required the expenditure of \$150 above our normal printing costs. Since it would merely have been duplicate coverage, we felt the money could be put to better use. We will resume our usual complete sports coverage in the future.

Sam Berkowitz (123) then lost a gruelling match to the Knight's Bill Cummins, 7-4. Amadeo Qualich (130) scored his third win of the campaign with a 4-0 decision over Art Villarosa.

The Jerseyites then tied the score at 8-8 when Eric Rudolph pinned Beaver co-captain Vince Norman with a pile-diver at 4:45. Norman had pinned all his previous opponents this season. Bernie Woods (147), gave the Lavender a lead which they never relinquished by pinning Bob Campbell in 2:05 for his fourth triumph of the campaign.

Fred Starita then lost a 4-1 decision to Dickinson's Ed Perazone in the 167-pound class. City co-captain Bernie Stolls also remained undefeated when the Knights forfeited the 177-pound match. The College's heavy-weight, Leon Entin, closed out the scoring with an impressive pin over Al Provan at 3:21.
