Nagler To Tell SFCSA Conflict Near Settlement

By STEVEN LUDWIG

Student Government President Steve Nagler will notify the Student-Faculty Committee on Student Activities (SFC-SA) tomorrow that House Plan and Student Government intend to resolve the Boatripe-Carnival conflict by themselves.

Nagler feels that recent meetings he has had with House Plan representatives have enabled him to assure the Committee that the two organizations can work out their difficulties without SFCSA's aid.

Previously Nagler had intended to appeal to SFCSA to take action in the matter. He had planned to

Arthur Genen Proposes Moonlight Cruise

ask the Committee to act "on their resolution of last term which stated that any conflict involving Student Government would have to be settled by that body (SFCSA)."

Nagler has conferred with House Plan representatives since Monday and feels sure that a solution

Prof. Devises Fitness Test

A new test to measure the physical fitness of students in grades four to twelve has been developed by Professor Saul Ostrow (Hygiene).

According to Dr. James E. Allen, State Commissioner of Education, the test will divide physical fitness into seven components which will each be measured in terms of a norm for different age groups and sexes. A composite score will then be obtained.

There are seven categories and methods by which fitness will be tested. Posture will determine the health of the children, as well as strength and agility. The accuracy of the subjects in throwing a softball at a round target will also be tested. Balance will be tested by having the subject perform a handstand from a squat position using the arms to lift the body off the ground.

A fifty yard dash will determine the children's speed in running, and endurance will be tested by a treadmill.

—Baden

to the problem will be worked out by next Wednesday.

At present Student Government's Boatripe to Bear Mountain and House Plan's Carnival are scheduled for the same weekend. Carnival will be held on May 3, and the Boatripe is set for the following evening.

Nagler mentioned the possibility of switching Boatripe dates with Queens College or Brooklyn Col-

(Continued on Page 3)

Postnotes . . .

• Professor Willard Jacobson of Teachers College, Columbia University will speak on "A Science Teacher in Afghanistan" tomorrow at 12:30 PM in Room 208 Klapper.

• Films of the 1956 Olympics will be shown at 12:15 PM tomorrow in Room 315 Shepard. All applicants for the Outdoor Track and Field Team are invited to attend.

• The Newman Club is sponsoring a Saint Patrick's Day Dance Saturday at 8:30 PM at Our Lady of Lourdes Auditorium at West 143 Street. Tickets are \$1 in advance and \$1.25 at the door.

• Dr. Ivo Duchacek (Government) will address AIE, IRE, ASME, ARS, AIChemE, ASCE, and THIC on the "Soviet Challenge to the Free World" tomorrow at 12:30 PM in the Townsend Harris Auditorium.

NAACP Chapter To Disband If Membership Meeting Fails

The College's chapter of the National Association for the Advancement of Colored People (NAACP) will make one last bid for members next Thursday before making a final decision to disband.

Verna Stewart, vice-president of the chapter, said yesterday that "It is impossible for the organization to continue to exist with only the one or two interested people we have at the present time. If we don't get a good turnout at our next meeting on March 20 we will be forced to disband."

The NAACP had been approached by the Marxist Discussion Club to co-sponsor the appearance of Dr. William E. B. Dubois, one of the founders of the NAACP. According to Miss Stewart the complete lack of organization within her group made it impossible to co-sponsor the invitation. "We can not do anything without members", she said.

Miss Stewart noted that although there are a great number of Negro students in the College, in the past few terms they have not been taking an active interest in

Alumni President To Be Honored

Harold A. Lifton, president of the College's Alumni Association, will be honored tomorrow evening for forty years of alumni service to the College.

A New York business executive, Mr. Lifton will be feted at a dinner of the City College Club in the Advertising Club, 23 Park Ave.

A merchandising specialist and advertising executive, Mr. Lifton has been active in the College's alumni affairs since graduation.

He served as president of the Class of '18 for many years and also as campaign chairman of the City College Fund, an annual campaign to finance scholarships and other non-classroom activities at the College.

the NAACP. "There are many vital issues that they should be taking stands on at the present time", she said, "but there just doesn't seem to be any interest. Perhaps all the controversy concerning membership lists has frightened people away."

Annual Education Conference Will Be Held This Saturday

The problems of the Middle East will be discussed at the Fifth Annual Conference on International Education at the College Saturday.

Professor Samuel Everett (Education) will chair the conference sponsored by the Metropolitan Committee on International Education and the municipal colleges. Teachers, professors, specialists on the Middle East, students of education and foreign students are expected to attend.

The conference will begin at 10:30 AM with a speech by John S. Badeau, chairman of the Near East Foundation. Badeau will speak on "What Americans Need to Know About the Middle East."

This will be followed by morning panels on religion in the Middle East, fine and applied arts, the role of the United Nations and technical assistance, and educational and social problems in that area, including Communism, oil, the status of women and changing social values.

In the afternoon there will be a series of panel discussions on how to integrate this knowledge in the curriculum.

Speaking about the choice of topic for the conference, Professor Everett commented, "The Middle East is one of the most neglected

Student Leaders Set Up Panel on Bias Problem

By JOAN REINSTEIN

A "Panel of Americans" was set up yesterday by five student leaders.

The purpose of the panel is to "eliminate prejudice and discrimination through understanding of group and individual differences".

Five Americans from different backgrounds will make up the panel. There will be a Jew, a Catholic, a white Protestant, a Negro, and a new American. A new American is a person who wishes to become a citizen or a citizen whose parents come from abroad.

The panel will speak before PTAs, high schools, and junior high schools. Each member of the panel will speak about his group for about five minutes. He will explain how he feels about being a member of his group and an American. The panelist will speak as an individual and not for the group as a whole. After the talk there will be a question and answer period.

Paula Mullin, Steve Nagler, Jay Bloom, Hank Bregman, and Helen Lucas are the five students who organized the "Panel of Americans" at the College. They got the idea at a National Conference held at Purdue University in Lafayette, Ind., this past weekend. Some 125 students and fourteen faculty members representing eighteen different colleges and universities were

Steve Nagler Forms Group

at the conference. Dr. Dwight Culver, Professor of Sociology at Purdue, is the current Executive Director of the "Panel of Americans."

The students are looking for a faculty member who will act as coordinator of the panel and several faculty members who will be "resource people". The coordinator will act as correspondent to the national office, organizer, and will help interview panelists.

The "resource people" will advise the panelists, give them the information they need, act as moderators, and help interview panelists. Several members of the faculty have already agreed to work with the panel.

Students who wish to become panelists will be interviewed by one faculty member, one person of their own group, and one person of another group. This is the method used at the University of California at Los Angeles.

There will be an introductory meeting for faculty members and students who are interested in the panel next Thursday between 12 Noon and 2 PM.

The five student leaders will ask Student Council's approval of the panel.

Dr. W.E.B. Dubois To Speak

Dr. William E.B. Dubois, noted historian and one of the founders of the National Association for the Advancement of Colored People, will speak on "The Negro Since Reconstruction", Thursday at 12:30 PM in the Grand Ballroom of the Finley Student Center.

Dr. DuBois, author of many books including "Black Reconstruction" and "John Brown" is being presented by the Marxist Discussion Club.

An OP Review

'Anything Goes'

By Linda V. Lipnack

The Musical Comedy Society has taken a bold step in the right direction. It has added the first active and admirably organized club of its kind to the College community. In light of this the Society cannot be given enough praise. The director, Tony Calabrese, has founded an outlet for people, whose aspirations are imbedded in the theatre, and for those who simply derive pleasure from participating in a college play. Because this is the first production for the Musical Comedy Society, and because the performers have no claim to being trained creators of perfect musical comedy, it is a little difficult to review their performance with expectations for professional calibre.

The chosen vehicle was "Anything Goes," which has a rather slight and run-of-the-mill script, relieved occasionally by the invigorating music and lyrics of Cole Porter. Out of the skateyeight billions of brilliant musical scripts that are available, "Anything Goes" was a decidedly poor choice. Of course, a play can be an excellent piece of literary work, and then be ruined by an incompetent actor. But it has been demonstrated that an actor can make something out of any part if he has the talent. The point at question is, therefore, just how successful the Musical Comedy Society was in treating the material they had at hand.

The director holds the reins of responsibility in the executing of a script. After discussing the script's possibilities with his actors, his interpretation is final. He must have flawless understanding of every character, and must know the capacity of the actor who is playing the role. It is his most important function to give an activity or a piece of business to the actor, so that he will have a reason for being on the stage. An actor cannot be on the stage merely because the script says so. There has to be a vital reason for the actor—there has to be a purpose. When an actor stands on stage just parroting his designated lines, he looks foolish, lost, and consequently the essence of the play is lost. It is the director's job to see this doesn't happen. This is an enormous undertaking for anyone, and especially for one who has comparatively little training in the theatre.

Mr. Calabrese did not give enough direction to "Anything Goes." There should have been more for the actors to do on stage. There should possibly have been more than a backdrop, something to give the reality of an ocean liner for the actors to use. Mr. Calabrese should have tried to draw some of the actors out of themselves. There should have been more life to the performance. This was supposedly a lively musical, and if the actors had enjoyed themselves the audience would have too. There were, aside from these some very successful attempts for effect. The mass scenes on board the ship, the "Blow Gabriel, Blow" number, the use of the Mad Comic, the strip poker sequence were just a few of the optimum points of imaginative direction.

Versatile Alex Orfaly gave a bit of a professional touch with his very fine voice as the relaxed and smooth Billy Crocker. His pal Mike Stone, or rather Moon Face Martin was a very benevolent thief, giving the performance at its highest level of life, fun and energy. Vera Nigrelli, who warmed up toward the end of the first act was hampered by the little activity she had, and was resigned to a pose of hands on hips. Although the pose was in character, it grew rather tiresome. Her rendition of "You're The Top" with Mr. Orfaly was a high spot. Sheila Gradus, who played the very confused instrument being married to a bankroll, gave an occasional warning that she was going to smile; but the smile never broke, and neither did her cold characterization. The part was perhaps too much of an undertaking for her, although her voice was competent. Her fiance, John Mammino, was very funny, especially in the scene where he wore his red-heart drawers. But Mr. Mammino should have been a little less eager in acknowledging the whistles from the audience. That is the most sinful thing an actor can do during a performance. Other commendable performances were delivered by Edwinda Picone, riotous Shirley Tugentum, and Fay Silvermetz. Mike Katz performed admirably at the keyboard.

The organization of the incidentals that are taken for granted a performance should especially be mentioned. The breaking of the Townsend Harris Auditorium tradition, and the substitution of the Music and Art Auditorium, was a revolutionary and rewarding thing for the Musical Comedy Society to do. The successful sale of tickets, due to the brilliant publicity campaign that took place, is an example of a workable formula for breaking City College apathy.

The Musical Comedy Society deserves eternal praise for its remarkable organization. It is the concensus of expectations that Tony Calabrese will guide future performances in view of present mistakes, and that he will follow up "Anything Goes" with another awaited performance. Everything didn't go, but some things did, and what more can be expected from a first try?

CLUB NOTES

AICHe
Presents film on Atomic Physics in Room 103 Harris on Thursday at 12:30 PM.

Alpha Chi Delta
Meets tomorrow in Room 138 Finley at 12:30 PM for induction of new sisters and an introduction to Professor Levine, faculty advisor.

Baskerville Chemical Society
Presents student papers at 12:30 PM tomorrow in Doremus Hall.

Biology Review
Meets tomorrow in Room 316 Shepard at 12 Noon to hold a very important meeting.

Biology Society
Presents Dr. Dowson (Chmn., Biology) in Room 819 Baskerville.

Christian Association
Features Mr. Boris Erwit, Secretary of the American Buddhist Academy of New York, speaking on "Buddhism" at 12:30 PM tomorrow in Room 424 Finley.

Caduceus Society
Presents Dr. H. Stunkart of the Museum of Natural History speaking on "Basic Research" in Room 106 Harris at 12:30 PM tomorrow.

Class of '59
Will meet at 12 Noon tomorrow in Room 304 Downer for a compulsory meeting.

Economics Society
Presents Dr. Greenwald of McGraw Hill Book Co., who will speak on the recession and the economic outlook in Room 107 Wagner at 12:30 PM tomorrow.

Geological Society
Features Mr. Raoul Vajk of the Standard Oil Co. of New Jersey, who will speak on "Gravity Exploration" tomorrow in Room 306 Shepard at 12:30 PM.

History Society
Presents Prof. Jesse D. Clarkson of Brooklyn College speaking on "Some Aspects of Russia—Past and Present" at 12:30 PM tomorrow in Room 105 Wagner.

Logic Society
Will present Prof. Abraham Schwartz (Mathematics) who will speak on "Desargue's Triangle Theorem and an Axiom in Geometry" on Friday at 3:30 PM in Room 212 Wagner.

IVCF Christian Fellowship
Meets tomorrow at 12:30 PM in Room 206 Harris. Rev. Donald Hulín will speak on "Gentleness."

Le Cercle Francais Du Jour
Will discuss 12th and 13th Century French Poetry tomorrow from 12 to 2 PM in Room 02 Downer. All are invited.

Mathematics Journal
Holds an organizational meeting tomorrow at 12:30 PM in Room 125 Shepard.

Newman Club
General Membership Meeting tomorrow at 12:30 PM at the Catholic Center, 469 West 142 St. between Amsterdam and Convent Ave.

Philosophy Society
Will discuss William James' "Will to Believe" in Room 118 Wagner tomorrow at 12:30 PM.

Physics Review
Gathers tomorrow at 12 Noon in Room 109 Shepard.

Physics Society
Is holding a physics symposium tomorrow at 12:30 PM in Room 109 Shepard. Dr. Greenberg will speak on "Irreversible Thermodynamics."

Promethean
Reads a one-act play by Fred Tuten on Friday in Room 350 Finley.

Psych Society
Will meet tomorrow in Room 210 Harris at 12:30 PM to make plans for a party to be held on Friday, in Room 417 Finley at 7:30 PM.

SG Ticket Bureau
Sells tickets for the shows "Music Man" and "Autie Mae" every Thursday from 12 to 1 PM in Main Corridor Finley.

Sociology Society
Presents George A. Silver, MD, of Montefiore Hospital and Columbia University who will speak on "What is the Place of Sociology in Medicine?" in Room 202 Wagner at 12:30 PM tomorrow. On Friday, there will be a Student-Faculty Tea at 3 PM in Room 438 Finley.

Vector Magazine
Will hold a meeting tomorrow at 12:30 PM in Room 329-A Finley.

Women Invited . . .

President Buell G. Gallagher will speak at a tea given by the American Association of University Women (AAUW) this Saturday. The occasion is the College's recent acceptance into the AAUW.

All women graduates and senior co-eds of the College are invited to attend the tea which will be held at the AAUW's New York headquarters, 111 East 37 Street, from 3 to 5 PM.

FOR BETTER OR FOR WORSE

The first thought that comes into our minds upon entering college is, of course, marriage. But how many of us go about seeking mates, as I like to call them, in a truly scientific manner? Not many, you may be sure.

So let us today make a scientific survey of the two principal causes of marriage—personality need and propinquity.

Personality need means that we choose mates because they possess certain qualities that complete and fulfill our own personalities. Take, for example, the case of Alanson Duck.

As a freshman Alanson made a fine scholastic record, played varsity scrabble, and was president of his class. One would think that Alanson was a totally fulfilled man. But he was not. There was something lacking in his life, something vague and indefinable that was needed to make his personality complete.

Then one day Alanson discovered what it was. As he was walking out of his class in Flemish pottery, a fetching coed named Grace Ek offered him a handsome red and white pack and said, "Marlboro?"

"Yes!" he cried, for all at once he knew what he had been needing to round out his personality—the hearty fulfillment of Marlboro Cigarettes, the soul-repairing mildness of their fine tobacco, the easy draw of their unparalleled filter, the ease and convenience of their crushproof flip-top box. "Yes, I will take a Marlboro!" cried Alanson. "And I will also take you to wife if you will have me!"

"La!" she exclaimed, throwing her apron over her face. But after a while she removed it and they were married. Today they live happily in Baffin Land where Alanson is with an otter-glazing firm and Grace is a bookie.

Propinquity, the second principal cause of marriage, simply means closeness. Put a boy and a girl close together for a sustained period of time and their proximity will certainly ripen into love and their love into marriage. A perfect example is the case of Fafnir Sigafos.

While a freshman at Louisiana State University, Fafnir was required to crawl through the Big Inch pipeline as part of his fraternity initiation. He entered the pipe at Baton Rouge and, alone and joyless, he proceeded to crawl north.

As he passed Lafayette, Indiana, he was agreeably surprised to be joined by a comely girl named Mary Alice Isinglass, a Purdue freshman, who, oddly enough, had to crawl through the Big Inch as part of her sorority initiation.

When they reached the Vermont border they were going steady

Chatting amiably as they crawled through Ohio, Pennsylvania, and New York State, Fafnir and Mary Alice discovered they had much in common—like a mutual affection for licorice, bobsledding, and the nonsense verse of Arnold Toynbee. When they reached the Vermont border they were going steady, and when they emerged from the pipe at Boothbay Harbor, Maine, they were engaged.

After a good hot bath they were married and today they live in Klamath Falls, Oregon, where Fafnir is in the weights and measures department and Mary Alice is in the roofing game. They have three children, all named Norman. © 1958, Max Shoben

Propinquity is sure to mean love when you put yourself close to a pack of Marlboros, made for your pleasure by the sponsors of this column.

Opinions...

QUESTION: Will the recent emphasis on natural sciences and technology mean a reduction in job opportunities for the Liberal Arts major?

Eli Berlinger, UJ5

Definitely not. More Liberal Arts Majors will change their degree objectives to the sciences. There will be fewer Liberal Arts graduates to fill all the jobs that are now open, creating greater opportunities for them.

Sol Wieder, UF3

Yes. Employers realizing the increased significance of science in today's world, will tend to lean towards men with more than a superficial background in science. This will greatly reduce the number of jobs open to Liberal Arts majors.

Steve Low, UF5

If anything, science may expand our society so that Liberal Arts majors will be even more in demand.

Helene Brown, U Sr 1

Jobs that ordinarily would be open to Liberal Arts majors, will remain open. However, what will transgress is a reduction in jobs open to the science and technology major.

Stan Sandler, LF 5

The number of job opportunities will decrease along with a decrease in Liberal Arts majors. Although the total number of jobs will decrease, the Liberal Arts majors will still have the same opportunities.

Morty Shapiro, U Sr 1

Opportunities for the Liberal Arts major are increasing. Among the plentiful opportunities available in such fields as teaching, social work and psychology, the Liberal Arts majors will have little trouble finding placement in the future.

SFCSA...

(Continued from Page 1)

lege as a way out of the present difficulty.

"If nothing else works," Nagler said, "I believe we should change to an evening boatripe."

Last week SG Vice-President Arthur Genen proposed to Student Council that a moonlight cruise would be an answer to the Boatripe-Carnival date conflict. The proposal was automatically tabled for discussion until this week when Council voted not to rescind a previous resolution setting May 4 as the date of the Boatripe.

Ant Collection Occupies Mind of Busy Bio Prof

By MARTIN SEVERINO

South Campus students had best think twice the next time they are tempted to step on an ant. They might do well to surrender the ant to Professor William S. Creighton (Biology).

For over thirty-five years, Professor Creighton has been collecting ants from the United States, and from most of Mexico. To date,

from the beginning," said Professor Creighton.

Each ant is glued to a triangular piece of cardboard cut to fit the size of the ant. A pin is attached to the three "points," and a label is attached which denotes the species of the ant and where it was found. Ants are so delicately constructed, says Professor Creighton, that any other type of mounting would destroy them. "Their delicacy, and the fact that one must know exactly what to do with them," he said, "explains why they are not used in college biology courses."

Ants In The Pants?

his collection includes over 5,000 specimens, and more than a quarter of a million individual ants.

When he started his collection as an undergraduate student, Professor Creighton soon discovered that the task of storing and keeping the ants was as laborious as the process of finding them. He quickly endowed Mrs. Creighton with the task of mounting and cleaning the ants. One may think that Mrs. Creighton would have been a bit squeamish about this task, but "she was with me right

Taking into account the example of the busy insects' habits, Professor Creighton does not sit back idly and regard his collection. In 1950, after extensive field trips throughout all of North America, he took a leave of absence from the College to write a book. It is called "Ants of North America—Bulletin of the Museum of Comparative Zoology at Harvard College," and has proved itself quite useful to those interested in this field of study.

Professor Creighton keeps his ants in his dining room. Stored in glass cases, they represent one of the most complete collections of North American ants in the world.

If you answered "No" to all questions, you obviously smoke Camels—a real cigarette. Only 6 or 7 "No" answers mean you better get on to Camels fast. Fewer than 6 "No's" and it really doesn't matter what you smoke. Anything's good enough!

But if you want to enjoy smoking as never before, switch to Camels. Nothing else tastes so rich, smokes so mild. Today more people smoke Camels than any other cigarette. The best tobacco gives you the best smoke. Try Camels and you'll agree!

Have a real cigarette—have a Camel

Bob Silver Ends Collegiate Career By Leading Hoopsters In Rebounds

By STU BADEN

One of the most underrated hoopsters ever to wear a Lavender uniform is Bob Silver. Completing his playing days for the College, Silver had the most outstanding year of his career, but still did not receive the recognition he deserved. Although he played three games less than the other starter, because of National Guard duty, the huge forward edged out Hector Lewis by two rebounds to lead the team in this category. His 193 rebounds were good for a 13.8 per game average.

To judge Silver's true value one

Bob Silver Leads Rebounders

need only speak to his teammates. Sophomore Tony Pellicone, who

played on the same squad as Silver at De Witt Clinton High School, as well as at the College said, "It is hard to believe how Bob has improved since his days at Clinton. From an average High School player he has developed into a very fine college star."

Team Mainstay

Sid Birnback had this to say: "In spite of his quiet nature, Bob's influence on the team is immeasurable. He is the squad's mainstay and is in there fighting until the very end of every game." The rest of his teammates think enough of him to have elected him co-captain

along with Joe Bennardo.

Silver, a business administration student from the Bronx has been on the varsity three years, and has been a starter for two and a half.

During his time on the team, Bob has gained the respect and admiration of all his teammates as well as the opposition. "He has never lost his temper during a game," said Julio Delatorre.

Although he is always fighting under the boards, Silver never has been berated by a member of the opposing team. "I wonder why?" pondered the six foot five inch, 225 pound senior.

Intramurals...

The Spring Intramurals are in full swing. In the basketball department the Red Devils led the scoring parade by defeating the Newman Club, 57-40. The most outstanding game played thus far was the 23-22 win by Jolson '60 over Knittle '61.

By far the most exciting Badminton match was Herb Rosenblum's 15-4 route over Myles.

Winners in four wall handball were Brown, Zucker and Friedman, while Klein, Swazz, Wong, Eisbuch, Greenberg and Lee were victors in table tennis.

The outstanding athlete participating in the intramurals will win the Alton Richards Memorial Trophy.

Brooklyn College took the first step towards the return of varsity football at the college, last week.

President Harry D. Gideonse in a special meeting last Wednesday, recommended that Brooklyn adopt intermural competition in the sport, with the eventual goal of reinstating varsity ball.

The College, as well as Hunter, Queens, St. John's, Fordham, NYC, and Manhattan would be invited to participate in a series of elimination games between the various municipal schools, beginning this fall.

Sticklers!

Don't just stand there...
STICKLE! MAKE \$25

Sticklers are simple riddles with two-word rhyming answers. Both words must have the same number of syllables. (No drawings, please!) We'll shell out \$25 for all we use—and for hundreds that never see print. So send stacks of 'em with your name, address, college and class to Happy-Joe-Lucky, Box 67A, Mount Vernon, New York.

NEAT FEAT? No! Slick Trick? A thousand times no! When a magician makes a pack of Luckies vanish, it's a plain case of *Tragic Magic!* Connoisseurs claim there's one approved way to make Luckies disappear. That's to smoke (Yum!) every last one of 'em! That way, you get the wonderful taste of Luckies' fine tobacco... light, good-tasting tobacco that's toasted to taste even better. So, Ladeez-ann-Gennlemen, observe a pack of Luckies closely. Then carefully remove one (1) cigarette and light up. Presto! You're puffing on the best-tasting cigarette you ever smoked!
