Middle East, students of education and the municipal colleges, Nagler To Tell SFCSA the Student-Faculty Committee on Student Activities (SFCSA) tomorrow that House Plan and Student Government intend to resolve the Boattride-Carnival conflict by themselves.

Nagler feels that recent meetings he has had with House Plan representatives have enabled him to assure the Committee that the two organizations can work out the problem that will be worked out by next Wednesday. At present Student Government’s Boattride to Bear Mountain and House Plan’s Carnival are scheduled for the same weekend. Carni- val will be held on May 3, and the Boattride is planned for the following evening.

Nagler mentioned the possibility of switching Boattride dates with Queens College or Brooklyn College.

**NAACP Chapter To Disband If Membership Meeting Fails**

The College’s chapter of the National Association for the Advancement of Colored People (NAACP) will make one last bid for members next Thursday before making a final decision to disband.

Verna Stewart, vice-president of the College’s branch of the NAACP, has been approached by one or two interested people. "It is impossible for the organization to continue to exist with only the one or two interested people we have at the present time. If we don’t get a good turnout at our next meeting on March 20 we will be forced to disband.

The NAACP had been approached by the Marxist Discussion Club to co-sponsor the appearance of William E.B. Dubois. One of the founders of the NAACP. According to Miss Stewart the complete lack of organization within the group made it impossible to co-sponsor the invitation. "We cannot do anything without members," she said.

Miss Stewart noted that although there are a great number of Negro students in the College, in the past few terms they have not been taking an active interest in the NAACP. "There are many students who are taking stands on the present time," she said, "but there just doesn’t seem to be any interest. Perhaps all the controversy concerning membership lists has frightened people away."

**Student Leaders Set Up Panel on Bias Problem**

A "Panel of Americans" was set up yesterday by five student leaders.

The purpose of the panel is to "eliminate prejudice and discrimination through understanding of group and individual differences."

Five Americans from different backgrounds will make up the panel. There will be a Jew, a Protestant, a Negro, and a new American. A new American is a person who wishes to become a citizen or a citizen whose parents come from abroad.

The panel will speak before PTAs, high schools, and junior high schools. Each member of the panel will speak about his group for about five minutes. He will explain how he feels about being a member of his group and an American. The panelists will speak as an individual and not as a group as a whole. After the talk there will be a question and answer period.

Paula Mollin, Steve Nagler, Jay Bloom, Hank Bregman, and Helen Lucas are the five students who organized the "Panel of Americans" at the College. They got the idea at a National Conference held at Purdue University in Lafayette, Ind., this past weekend. Some 125 students and fourteen faculty members representing eighteen different colleges and universities were invited to attend.

**Annual Education Conference Will Be Held This Saturday**

The problems of the Middle East will be discussed at the Fifth Annual Conference on International Education at the College Saturday.

Professor Samuel Everett, Executive Director of the American Council on Education, will chair the conference sponsored by the Metropolitan Committee on International Education and the municipal colleges. Teachers, professors, specialists on the Middle East, students of education and foreign students are expected to attend.

The conference will begin at 10:30 AM with a speech by John S. Badeau, chairman of the Near Eastern Department of the American Council on Education, on "What Americans Need to Know About the Middle East."

This will be followed by morning panels on religion in the Middle East, fine and applied arts, the role of the United Nations and technical assistance, and educational and social problems in that area, including Communion, oil, the status of women and changing social values.

In the afternoon there will be a series of panel discussions on how to integrate this knowledge in the curriculum. Speaking about the choice of topic for the conference, Professor Everett commented, "The Middle East is one of the most neglected areas in the social studies curriculum. Almost nothing is taught about it, yet today it seems as the world’s trouble spot. It seems incredible to expect American citizens to make mature decisions affecting war and peace in the Middle East without some knowledge of the history, customs, religions, and attitudes of the millions of people who live there."

**Prof. Devises Fitness Test**

A new test to measure the physiological fitness of students is in its second year of development by Professor Saul Ostrow (Hy- drome).

According to Dr. James E. Allen, State Commissioner of Education, the test will divide physical fitness into seven components which are measured in terms of a term for different age groups and sexes. A composite score will then be obtained.

There are seven categories and methods by which fitness will be tested. Posture will determine the height of the children, as well as their strength and agility. The accuracy of the subject in throwing a soft ball at a target will also be tested. Balance will be tested by having the subject perform a hand stand from a squat position using arms to lift the body off the ground. A fifty yard dash will determine the children’s speed in running, and a forty yard will be tested to determine their speed.

---

**Alumni President To Be Honored**

Harold A. Lifton, president of the College’s Alumni Association, will be honored tomorrow evening for forty years of alumni service to the College.

A New York business executive, Mr. Lifton will be feted at a dinner by the Alumni Association in the Ad- vertising Club, 23 Park Ave.

A merchandising specialist and advertising executive, Mr. Lifton has been active in the College’s alumni affairs since graduation.

He is president of the Class of ‘28 for many years and serves as chairman of the City College Fund, an annual campaign to finance scholarships and other campus-classroom activities of the College.
Women Invited...

President Berl Gallaghcr will speak at a tea given by the American Association of University Women (AAUW) this Saturday. The occasion is the College's recent acceptance into the AAUW.

All women graduates and senior co-eds of the College are invited to attend the tea which will be held at the AAUW's New York headquarters, 111 East 27 Street, from 3 to 5 PM.

FOR BETTER OR FOR WORSE

The first thought that comes into our minds upon entering college is, of course, marriage. But how many of us go about seeking mates, as if to call them in, in a truly scientific manner? Not many, you may be sure. So let us today make a scientific survey of the two principal causes of marriage—personality and propinquity.

Personality need means that we choose mates because they possess certain qualities that complete and fulfill our own personalities. Take, for example, the case of Alan Symph.

As a freshman Alanex made a fine scholarship record, played varsity soccer acceptably, and was president of his class. One would think that Alanex was a totally fulfilled man. But he was not. There was something lacking in his life, something vague and indefinable that needed to be made his personality complete.

Thus one day Alanex discovered what he was. As he walked out of his class in Flemish pottery, a fetching coed named Grace Ekh offered him a handsome red and white patch and said, "Marlboro!"

"Who?" I ask, for all at once he knew what he had been needing all this time—his personal, the hearty embodiment of Marlboro cigarettes, the soul-repairing mildness of their fine tobacco, the easy going of their unpretentious filter, the ease and convenience of their crumpled-tip top-box. "Yes, I will take a Marlboro!" cried Alanex. "And I will also take you if you will have me!"

"Lalalalalalala!" exclaimed, throwing her apron over her face. But after a while she removed it and they were married. Today they live happily in Baffin Land where Alanex is with an oil-gas testing firm and Grace is at home.

Propinquity, the second principal cause of marriage, simply means closeness. Put a boy and a girl close together for a sustained period of time and their proximity will certainly ripen into love and their love into marriage. A perfect example is the case of Fafnir Sigafoss.

While a freshman at Louisiana State University, Fafnir was required to crawl through the Big Inch pipeline as part of his freshman assignment. He entered the pipe at Baton Rouge and, alone and lonely, he proceeded to crawl north.

As he passed Lafayette, Indiana, he was divided and fell in love with Mary Alice. (Mary Alice was a coed who would be joined by a comely girl named Mary Alice Isinglass, a student at Purdue University, who, oddly enough, had had to crawl through the Big Inch as part of her senior year initiation.

Opinions...

QUESTION: Will the recent emphasis on natural sciences and technology mean a reduction in job opportunities for the Liberal Arts major?

Eli Berlinger, U15
Definitely not. More Liberal Arts Majors will change their degree now open, creating greater opportunities for them.

Sol Wieder, UF3
Increased significance of science towards men with more than a superficial background in science.

Steve Low, U15
If anything, science may expand jobs open to Liberal Arts majors.

Morty Shapiro, U Sr1
The number of job opportunities will decrease along with a decrease in Liberal Arts majors.

Helene Brown, U Sr1
Jobs that ordinarily would be open to Liberal Arts majors, will remain open. However, what will transpire is a reduction in jobs open to the science and technology major.

Sara Sandler, L F 5
The number of job opportunities will decrease along with a decrease in Liberal Arts majors. Although the total number of jobs will decrease, the Liberal Arts majors will still have the same opportunities.

Stan Sandler, L F 5
Majors will be even more in demand.

If you answered "No" to all questions, you obviously smoke Camels—a real cigarette. Only 6 or 7 "No" answers mean you better go on that "No" and it really doesn't matter what you smoke. Anything's good enough!

But if you want to enjoy smoking as never before, switch to Camels. Nothing else tastes so rich. Today more people smoke Camels than any other cigarette. The best tobacco gives you the best smoke. Try Camels and you'll agree!
Bob Silver Ends Collegiate Career  
By Leading Hoopsters In Rebounds

By STU BADEN

One of the most underrated hoopsters ever to wear a Lavender uniform is Bob Silver. Completing his playing days for the College, Silver had the most outstanding year of his career, but still did not receive the recognition he deserved. Although he played three games less than the other starter, because of National Guard duty, the huge forward edged out Hector Lewis by less than the other starter, because of National

Guard duty, the huge forward edged out Hector Lewis by 225 pound senior. Silver, a business administration student from the Bronx has been on the varsity three years, and has been a starter for two and a half. During his time on the team, Bob has gained the respect and admiration of all his teammates as well as the opposition. "He has never lost his temper during a game," said Julio Delatorre.

Although he is always fighting under the boards, Silver never has been berated by a member of the opposing team. "I wondered why?" pondered the six foot five inch, 225 pound senior.
