Next term will probably see a fee increase, according to Student Government Treasurer Mr. Dudley Franklin. One reason for the increase was the report presented by other eleven members present supporting the proposed proposal. Werden, who made the motion, revealed that the raise was "absolutely necessary." He pointed out that the raise would have to be voted on by the Council.

Four Against Motion

Four Council members who voted against the motion were: Daniel P. Brophy, who opposed the "act" on the resolution if Council would pass it. Werden further explained that the Student Activities Fee is designed by the Board of Higher Education (BHE) as a "laboratory fee for the Department of Student Life," and to initiate an increase Dean Brophy must petition the BHE. Werden declared that the raise was "absolutely necessary." He pointed out that the money collected had gone from $12,000 a few terms ago, to $14,200 this term, due to a decrease in registration.

Dean James S. Peace Implements Lists Ruling

A new trial lists plan in November would pass it. Werden further explained that the Student Activities Fee is designed by the Board of Higher Education (BHE) as a "laboratory fee for the Department of Student Life," and to initiate an increase Dean Brophy must petition the BHE. Werden declared that the raise was "absolutely necessary." He pointed out that the money collected had gone from $12,000 a few terms ago, to $14,200 this term, due to a decrease in registration.

Peace Hits Lists Evaders—Will Not Tolerate Deceit

By STEVE LUDWIG
Conflict between Student Government and the Department of Student Life over membership lists appears imminent. Dean James S. Peace (Student Life) last week announced that "all committees, subcommittees, or commissions of Student Government must file a roster," stymying a lists-encoding plan improvised by last term's Student Council. Bart Cohen, SG President at that time, originated the plan whereby clubs and organizations would be able to evade signing the lists by lists-s-Chief SG Planning Commissions. SG President Steve Nagler did not choose to comment last week upon the Department's action, but explained that the lists-signers ruling will have to be dealt with by the Department of Student Life, Dean Peace warned. "We will not tolerate deceit."

Although Dean Peace did not make specific mention of Student Government, this is the only order which refused to submit lists to the General Faculty's membership lists ruling. The action marked the end of the feasibility of the "lists-signing committee" plan to circumvent the signing of lists. In February, 1957, SG introduced an "eight lists-signers" plan to circumvent the ruling. Then following General Faculty's membership lists ruling, the plan provided for a committee of eight which would sign the membership lists of all clubs if so wished. The move, it was alleged, reduced the required number of members signing the lists of clubs which approved themselves of the plan from twelve to four.

"Lists-sighers" Return

Last term, Student Council voted the "eight lists-signers" committee into existence again. The Enroll Post-Logi Society was denoted a charter by the Student-Faculty Committee on Student Activities (SGCS) at the end of last term when it did not comply with a request to submit a full roster. The action marked the end of the feasibility of the "lists-signing committee" plan to circumvent the lists ruling. "Voluntary" Lists Plan

The General Faculty instituted a new trial lists plan in November of last year which private clubs which refused to submit lists to the College facilities, but denied that any list existed.

8,000,000 Tech Building: Construction Starts Soon

By HARVEY HORNWOOD

Construction of a new $8,000,000 School of Technology building will begin this spring on the North Campus. On completion of the six-story structure, the College will be enabled to centralize its technology laboratories and equipment, and to enlarge and improve the facilities. The building will be modern in design, and will incorporate concrete, marble, and glass in the composition. The building will be completed by January 1, 1960. The site of the new building will extend from St. Nicholas Terrace north to 141st Street and Convent Avenue, east to St. Nicholas Park. The old reference library and the ROTC Drill Hall will be torn down to make way for the building. The library has been vacated and its volumes moved to the new Cohen Library.

Labs in New Building

Labs in New Building Laboratories, administrative offices, and all other auxiliary facilities will be housed in the new structure. Classroom instruction will continue to be given in the new building. The building will be T-shaped, with high ceilings for the installation of tall equipment. Heavy equipment, including those involving "dynamic loads," will be housed in the sub-basement, and there are plans to move the College's new sub-critical nuclear reactor to the building. Sheepard, Compton, Goethals, and Harris Halls.

In Tune . . .

Three Bronzites have won the Music Department-sponsored Ninth Annual Music Contest. Pianist Victor Scharer will be awarded an appearance with the College's orchestra, and violinist Allan Sklar and soprano Barbara Woods will give a joint recital during the College's afternoon concert series this spring.

Scholarships...

Applications for the 1958 David Petegorsky Scholarship Awards, sponsored by the American Jewish Congress, are now being accepted. The awards provide for four six-week study scholarships in Israel to eligible students of outstanding talent, with all expenses, including tuition, paid. Information and entry blanks may be obtained by writing The David Petegorsky Scholarship Committee, 15 East 84 Street, New York City.

BE IT EVER SO HUMBLE

Today let us apply the hot white light of sustained thinking to the greatest single problem besetting American colleges. I refer, of course, to homesickness.

It is enough to rend the heart, working along a campus at night and listening to entire dormitories sobbing themselves to sleep. And in the morning when the poor, torn students rise from their tear-stained pillows and relate their breakfests and shaqle off to class, their lips trembling, their eyelids gritty, it is enough to turn the bowels up sore.

What can be done to overcome homesickness? Well sir, the obvious thing is that the student to put his house on college board and bring it to college with him. This, however, presents three serious problems:

1. The inability to jerk bars with your wine celler; many wines, as we all know, will not travel.

2. There is the matter of getting your house through the Holland Tunnel, which has a clearance of only 14 feet, 8 inches. This, of course, is ample for ranch houses, but quite impossible for Cape Cod, Georgians, and Saltboxes. For one, think it would be a fragrant injustice to deny higher education to students from Cape Cod, Georgia, and Saltbox.

3. The question of public utilities. Your house— and, of course, all the other houses in your town—has wires leading to the municipal power plant, pipes leading to the municipal water supply and sewage, and, of course, all the other houses in your town—has wires leading to the municipal water plant and pipes leading to the municipal sewage. And you will have to start rolling your house to college that you are, willy-nilly, dragging all the other houses in town with you. This will result in gross population shifts and will make the Bureau of the Census cross his arms.

So, I'm afraid that taking your house to college is not feasible. The thing to do, then, is to make your campus lodgings as close a replica of your house as possible.

Adorn your quarters with familiar objects, things that will constantly remind you of home. Your brother Sam, for instance, or your citizenship papers. Or a carton of Marlboros.

There is nothing like Marlboros, dear friends, to make you feel completely at home. They're so easy, so friendly, so welcoming, so full of charm. The flavor is marvelous. The Flip-Top Box is wonderful. The tattoo is optional.

Decorating your diggings with familiar objects is an excellent remedy for homesickness, and, of course, all the other houses in your town—has wires leading to the municipal water plant and pipes leading to the municipal sewage. And you will have to start rolling your house to college that you are, willy-nilly, dragging all the other houses in town with you. This will result in gross population shifts and will make the Bureau of the Census cross his arms.

Here Get Total Grants Of $35,700

Three research grants totaling $35,700 have been received by the College.

A $24,000 grant from the National Science Foundation will be used by Professor William E. Trucks for continuation of his work on karst geology and karstography and faunal correlation of the rocks of Western New York.

A $12,000 grant from the Ford Foundation will be used by Professor Joseph J. Compton for research on the life cycle and biology of the American oyster. The grant will be used to investigate the biology of the oyster in order to increase its commercial importance.

A $5,700 grant from the National Science Foundation will be used by Professor Albert P. O'Neill for research in the field of genetics. The grant will be used to study the genetics of a particular strain of bacteria.

A portrait of President Gallagher

Dr. Buel G. Gallagher's fifth anniversary as president of the College was observed by a testimonial dinner in the Grand Ballroom of the Biltmore Hotel January 23.

The deadline for registration is February 24. Applications may be obtained in Room 351 Finley or at the Empire Auto School Association, 85 West Fordham Road, the Bronx.

Additional information may be obtained by contacting Sid Glassman in Room 955 Finley, or by a representative of the College who will be available in Room 352 Monday to Friday from 12:30 PM to 7 PM.

Dr. Gallagher honored on 5th Anniversary

Prof. Warren B. Austin awaits the decision of the college authorities to reinstate him to his former position as head of the Department of Psychology.

The Board of Higher Education (BHE) has recommended the reinstatement of Dr. Austin, on the recommendation of a trial committee which investigated charges of his having falsely denied being a Communist, dismissed Dr. Austin from the College on December 16.

The Commissioner will set the date of a hearing to be held in the College's Student Union Building on January 27.

The decision of the trial committee was handed down by Dr. Joseph J. Compton, chair of the BHE, on the recommendation of the trial committee. The trial committee found that Dr. Austin had falsely denied being a Communist, and recommended his reinstatement.

Still May Appeal

The principal speaker was Dr. L. Schon, president of Brandeis University. Other speakers included Dr. George M. Shuster, president of Hunter College, representing the presidents of the city colleges; Professor Edgar Johnson, (chmn., English) representing the faculty; Harold A. Lipton, president of the Alumni Association, representing the alumni; Student Government President Bert Cohen, representing the students. Master of ceremonies was Dr. Joseph J. Klein, president of the College.

The College Chorus, under the direction of Professor Fritz Jachten, supplied entertainment.

HOUSE PLAN

Welcomes Back Its Member Houses

SG Sponsors Auto Program

A Driver Education Program is again offered by Student Government in conjunction with the Empire Auto School Association.

Students have a choice of two courses:

Course A, which costs $50 plus $5 for the road test, offers ten lecture hours, ten driving hours, and ten hours of observation—a total of thirty hours.

Course B, costing $32 plus $5 for the road test, offers ten lecture hours, six driving hours, and six hours of observation—a total of twenty-two hours.

The deadline for registration is February 24. Applications may be obtained in Room 351 Finley or at the Empire Auto School Association, 85 West Fordham Road, the Bronx.

Additional information may be obtained by contacting Sid Glassman in Room 955 Finley, or by a representative of the College who will be available in Room 352 Monday to Friday from 12:30 PM to 7 PM.

In the meantime, the College has accepted the recommendation of the trial committee and has asked Dr. Austin to appear before the Commissioner on January 27.

Students Sweat as Teacher Scrubs
To Beat the Heat in Wagner Tubs

BY STANLEY K. HENDLER

As each term progresses, weary students begin to wonder how their instructors manage to look so spic and span each morning. The answer, for the College's social scientists, may lie in the bathtubs in Wagner Hall.

The building was formerly the most luxurious private dormitory in Manhattanville College. When acquired by New York City as part of what was to become the College's South Campus, beds and bureaus were thrown out, but private bathrooms remained.

The bathtubs receive their greatest use during the torrid days and sultry evenings of Summer Session. Many a Government or Economics professor has kept his sweating students guessing by appearing at class in jacket and tie on the hottest of days, without a bead of perspiration on his forehead. Who would guess that the professor had just come out of a nice, cool shower?

The Sociology Department is especially proud of its elegant appointments. Elizabeth Flannery, one of the department's secretaries, points with pride to the newly polished floors and clean white tile in the bathtubs.

Added Library Facilities
Are Ready for Use Now

Several additional sections of the new Morris Raphael Cohen Library will be made available to students this semester, according to Librarian Jerome K. Wilcox.

Mr. Wilcox said he expects the general circulation and reference departments on the second floor will be opened to students by next Monday. Forty thousand reference books which have previously been kept in storage will be added to the regular reference collection.

In addition, Mr. Wilcox stated, the social sciences and humanities collections are expected to become available by Easter. History books will be included in the social sciences sections. The humanities collection will consist of language, literature and philosophy books.

A Liberal Arts collection will be available this semester for the first time in the history of the College. The art collection and audio-visual units may also be opened this term.

Scheduled for opening this fall are the special collections, consisting of rare books, first editions and college archives, and the life sciences collections, which will include biological sciences, psychology, and medicine.

The library of the School of Technology will remain in the Great Hall until completion of the projected new Technology building, when it will be moved there. The collections of mathematics and geology books have been added to those of physics, chemistry, and astronomy books.

The total number of volumes which will eventually be available in the Cohen Library is 200,000. There are approximately 70,000 books in the Technology library and another 75,000 in the library of the Barnard School, making a total of about 450,000 volumes available to students of the College.

Leaders Meet, Discuss Roles

What role on "individual plays in such group to which he belongs" was the theme of the third City College Leadership Development Conference, held last Sunday in the Finey Student Center.

"Group," a new term for the students of the College's Citizens' Group, was introduced by Student Government President Joseph Hillel. "Group" is offering a series of lectures and exhibits in addition to its regular program.

The "Art and Contemporary Culture" lecture series will be held at Hillie House, 472 West 146th Street, Mondays at 1 p.m.

Purpose of Lectures

According to Edward Hochstein, chairman of the Art Group, the present theme of the series is to "familiarize students with contemporary art and explore art as a function and result of culture." For this end, he said, "we have attempted to secure speakers who are eminent in their respective fields."

Hillel Offering Art Lectures

Flickers

The introductory meeting today will feature a film, "Images Medieval." Next week, Mrs. Alexandre will discuss "Women in the Middle Ages." She will give an illustrated lecture on medieval women's lives and customs.

Exhibits Listed

As part of this joint program the Art Group will present the following:

The first will begin Thursday and last through March 20. This exhibit will consist of oil paintings by Mrs. Merker.

The second exhibit, of Max Ginsberg's works, will be held from March 20 to April 30. Enamelled paintings by Mr. Segal will constitute the third exhibit to be held from April 30 to May 30.

"Faster"

St. X. BHE Coordinates Offices With Move to New Site

The Board of Higher Education (BHE) changed its address last Monday.

All central administrative functions of the municipal college system, serving 20,000 students, are now gathered at one address, 535 East 80th Street. Every administrative office was formerly situated at 695 Park Avenue. The new headquarters introduce another innovation in that members of the staff, instead of going to three locations, can sit together in one place and discuss their work.

Welcome, Frosh

So you've applied, passed the test, and entered registration cards really don't taste so bad. Nor do the white ones.

Several entering students testified to this last week in the halls of the college. Some could not believe their luck.

One such individual could be found last Wednesday in Sheppard 306, hair awry, face distraught, and with stubby pencil in a grimy, sweaty hand.

He was chewing greedily on a class section work sheet, and he didn't seem to be too hungry.

Alternating his glances from his scribblings on a desk to a large blackboard in front of him, he mumbled: "This is the fifth form I've filled out here!"

Shreds of spooled-up paper fell from his lips.

The huge room around him was filled with scores of students who were jotting down their class sections on the micrographed work sheets. The blackboard was filled with various sections which had been closed out.

Every so often, someone would walk to the board, scratch his head, and then add another class section to the list.

Then a terrific groan would come from the students. And up in the air, would come hands, pencils, pens, papers, and more groans.

You would have thought a room full of baddies had lost their all at the last race at Flushing, he said.

After an hour of this and five work sheets later, the student said, "I suddenly discovered I wasn't taking sections down, but that I was jamming papers down my throat."

"And that's nothing," he said. "Let me tell you what happened down at City.

"I walked into this room, see, and a guy yelled at me. 'Technology.'"

"No. I'm from Liberal Arts."

"Go to Room 128."

"But they told me my registration card wasn't in 129, and to see someone in admissions."

"I explained that I wanted a transfer and your card isn't here," the admissions guy said. Then he added, "You wouldn't be a transfer, would you?"

"Yep."

"Then your card is in 123."

"But they said that was technology or something."

"Well try again; it's probably there."

The student stopped, then picked up his pencil, grabbed another work sheet and began to fill it out again.

In another room down the hall, one mio, with a few bitten-off fingernails, was casually flipping cards to the floor, where a pile of half-filled ones was beginning to cover her ankles.

"No, I haven't really given up completely," she sighed. "Maybe I'm dumb or something, but all these cards are getting me down."

Later that day at Finey Hall, though, things seemed to be brightening a bit.

"I'm almost done," the form eater yelled out. "I'm almost done!"

He walked slowly to a checker table, then suddenly—collapsed. But not before he had cracked a smile on his unconscious face. He was registered.

The Pink Menace

By JAN MACAULEY

Salmon colored registration cards really don't taste so bad.

The bugs, groans. And that's nothing," he said. "Let me tell you what happened down at City."

"I walked into this room, see, and a guy yelled at me. 'Technology.'"

"No. I'm from Liberal Arts."

"Go to Room 128."

"But they told me my registration card wasn't in 129, and to see someone in admissions."

"I explained that I wanted a transfer and your card isn't here," the admissions guy said. Then he added, "You wouldn't be a transfer, would you?"

"Yep."

"Then your card is in 123."

"But they said that was technology or something."

"Well try again; it's probably there."

The student stopped, then picked up his pencil, grabbed another work sheet and began to fill it out again.

In another room down the hall, one mio, with a few bitten-off fingernails, was casually flipping cards to the floor, where a pile of half-filled ones was beginning to cover her ankles.

The Board of Higher Education (BHE) changed its address last Monday.

All central administrative functions of the municipal college system, serving 20,000 students, are now gathered at one address, 535 East 80th Street. Every administrative office was formerly situated at 695 Park Avenue. The new headquarters introduce another innovation in that members of the staff, instead of going to three locations, can sit together in one place and discuss their work.

Twenty years ago, the first BHE administrative office was a tower room at the College. Mrs. Pearl Max, Administrative Officer, said last week that, "One small room is too far from our five floors of offices, a basement for stores, and a view of the busy East River traffic."

"The work of our board members and administrative officers will be greatly advanced by the improved facilities provided for us by the City," BHE Chairman Gustave G. Rosenberg said. "As the colleges have grown so have our duties."

Silver Anniversary

Dr. Morton Gottschall, who has been the confidant of many more students than the other members of the College's staff, last week celebrated his twentieth-anniversary as Dean of the College of Liberal Arts and Science.

Despite the traditional policy of one which attempts to bridge the gap between science and the humanities, it appears that Dr. Gottschall is one of the few individuals whom science can respect without any suspicion of elitism.

At the same time, he is able to bridge the gap between science and the humanities, it appears that Dr. Gottschall is one of the few individuals whom science can respect without any suspicion of elitism.

We would like to congratulate Dr. Gottschall upon his twentieth-anniversary as Dean at the College, and at the same time express the hope that he and others like him will preserve us from becoming technologically adept automatons.
Shrthnd...  
Non-credit afternoon courses in Pitman and Gregg shorthand will be offered this term by the Extension Division of the School of General Studies. The classes will be held in Shepard Hall beginning the week of March 3. The cost is $22 plus a two-dollar registration fee. Registration information and forms can be obtained in Room 209, Shepard, or by phoning WA 6-6469.

Student Activities Fee May Be Raised in Fall

(Continued from Page 1)
and in the money coming back from reserves.
Along with this decrease in funds has come an increase in costs and in the desires of existing clubs and organizations to expand. Werden warns that the budgets these clubs submit will be drastically cut this term. "The Friday Night Dances," he added, "have already been cut to five for the term, and the College's delegation to the National Student Association will also be cut in size."

Parachutists' Flops Are Successes; Skydriver Numbers on the Way Up

By BERNIE LEFKOWITZ

Life's ups and downs are all taken in stride by Ronnie Hart since he's cultivated an interest in "sky-diving".

Amateur parachute-jumping, aptly nicknamed "sky-diving," is a mushrooming sport that has attracted a wide following following the fact that the East and the South. Ronnie was first introduced to the avocation this last summer when he was invited to the Woodbury, Conn., embalmed farm, landing-strip the guiding force behind the movement, Sebastian Patch "Pond."

A grizzled, Charles Lindbergh-style aviator, who flew the U. S. in the 1920's, Pond owns and acts a four-seater with attached "step-off" device, that simplifies the jumping process for the novice.

Although he's a 6-1, 200-pounder, Ronnie is quick to point out that sheer physical strength or size is relatively unimportant in parachuting. "What is required," Ronnie observed, "are dexterity and reflex-action."

High-Steps

"The most proficient men can wait up to a minute before they open the chute," he added. "Delaying the jump, permits the "sky-driver" to execute all sorts of "figure-eights, own-dives, and jack-knives."

While the jumper is hanging from the aircraft, Ronnie described his as "falling at the horizon and spread-eagled."

Lonely

How does it feel to be about two miles above earth with an unopen chute between yourself and death? "It's the only one in the world. All you can hear is wind whistling and all you can see are a few clouds," the twenty-year-old electrical engineering major volunteer with a slight shudder.

"It's a far cry from the old idea of 1-2-3- jump, " he said epigrammatically.

Beckett is back!...

with a provocative new play, in the tradition of his Waiting for Godot, that will shock the conformists and draw fire from the critics, but which will be a source of great pleasure to those who have not forgotten how to think! Now at the Cherry Lane Theatre. Read it before you see it! An Evergreen original. 51 23

ENDGAME BY SAMUEL BECKETT

MY CLOSEST SHAVE by Pat Flaherty

"My closest shave was at Indianapolis in 1953," says Pat Flaherty, 1956 Indianapolis winner. "The track temperature that day hit 125° and the exhaust fumes hung right down on the roadway. I was going into the north straight at 150 mph and the fumes got me. I blacked out, hit the outside concrete fence, and skidded along for 100 feet. The car was demolished, my helmet was torn off, my safety belt broke—but I didn't break a single bone!"

For YOUR Close Shave — with a razor, not a racing car — try new Colgate Instant Shave. What a way to shave! It's the quickest, easiest way ever, in no matter what race you use. Smooth, too! Shaves your whiskers, saves your skin. A great shave buy for the tough-beard guy!

Colgate Instant Shave

Pro Boxer Uses Arena To Practice Psychology

Frank Ippolito can confound his opponents with a psychological offensive as well as his fistic abilities.

Dividing his time between studying for a Master's degree in parapsychology at the City College of New York, Ippolito is a regular works at the New York Board of Education. "It is often as devastating as his actual one-two. Ippolito chucked menuously.

"When I start flexing my muscles and stop shaving for three days I have two the only one in the world. All you can hear is wind whistling and all you can see are a few clouds," the twenty-year-old electrical engineering major volunteer with a slight shudder.

"It's a far cry from the old idea of 1-2-3- jump, " he said epigrammatically.

Frank explains his vocational ambivalence rather simply. "I would like to continue to teach, and the Master's degree in psychology opens more opportunities in guidance and counseling work, or as a school psychologist," he observed.

"But," he continued, "I want to make some investments for future security and boxing is my quickest way to earn a large sum of money." Frank's reasons for desirous financial security are not purely personal. He is the father of twins.

No End of Roses

Although a leading lightweight contender, Ippolito does not regard boxing too highly as a profession. "Sometimes I get discouraged and I wonder if its worth it," he admitted.

Frank considers his future Master's degree and teaching license as insurance for the future. He believes, however, that he has the ability to win the championship some day. Nevertheless, he said, "I find that I'm fooling myself, or if I really started to get hurt, that would end it all."
Nuclear Reactor Serves Graduate Tech Program

By ROSE MARIE DAVOLI

The College's nuclear reactor, which started operation in the fall term, is responsible for the construction of nuclear reactor materials and for the production of nuclear reactor engineering. Additional courses to be offered will be a laboratory in nuclear engineering, nuclear science for engineers, and a class in the study of materials for the construction of nuclear reactors.

The classes will be given during the evening session to those qualified students who enrolled or not regularly enrolled at the college. They will begin the week of February 3. Late registration will continue until February 7. Information and applications may be obtained from the Graduate Engineering Office at Shepard Hall.

We expect our Carnival to be the student rate of five cents a card.

BOOK FOR RENT

Studied courses, call after 9 PM.

Furnished rooms, private, elevator, 6-11, 61-63-67-91, 62 West 137th St.

Small apartment, March 3, to June 1 in 3 rooms fully furnished, suitable to 2, 3 or 4 persons. Call 100-68-48-45-46-47-48.

WANTED

Sub-let apartment-March 1 to June 1. $3.49 List.

Approved...

The College has been placed on the "approved list" of the American Association of University Women, President Buell G. Gathagan has announced. The Board of Directors of the Association took the action, based on a report by Dr. Enrico Robino, who visited the College recently as an official AAUW representative.

The classes will be given during the evening session to those qualified students who enrolled or not regularly enrolled at the college. They will begin the week of February 3. Late registration will continue until February 7. Information and applications may be obtained from the Graduate Engineering Office at Shepard Hall.

Nuclear reactor will see more use this term.
Holman Back at College After 18 Month Absence

Professor Nat Holman returns to the College today, after an eighteen month leave of absence. The famed "Mr. Basketball" has spent the last four months of his leave in Japan and Korea, as a basketball instructor for the State Department.

"My work for the State Department in these two countries was a once-in-a-lifetime experience," Holman said, on his return, "and one that I will never forget. I feel that my trip has definitely served to improve relations between our country and Japan."

Holman seemed pleasantly surprised by the welcome given him by the Japanese people. "Aside from basketball, they really rolled out the red carpet for me. I visited many Japanese homes, which is quite unusual. Visitors are taken to the best restaurants, but it isn't very often that they are willing to take outsiders into their homes. I feel I have made very many friends in Japan for both myself and my country."

The old basketball genius has a tremendous amount of respect for the Japanese players, who play "his kind of game." "They play fast ball," he explained, "use the fast break and a modified zone defense." Holman was especially impressed with the ball handling ability of the Japanese athletes.

"I think a game between a good Japanese club and today's City College team would be a very good, and a very close, contest. There would be a big height difference, but they'd really make us hustle."

The College's best known athletic figure was present at last Wednesday's game against Manhattan, and appeared pleased by the drive of the team. "They lost the game, but I think they have fine potential and spirit." Holman said he is very much interested in helping the team in whatever way he can, but would not do so unless he was asked by Beaver coach Dave Polansky. He admitted that it might not be fair to Polansky if he were to interfere in the affairs of the team during the remainder of the season. "I left the College under investigation," he explained, "and I certainly don't want to embarrass the College in any way. I definitely intend to coach the City College varsity next season."
Intersession Sports

BASKETBALL

It was a last two weeks for the College's cagers, who dropped decisions to Fairleigh Dickinson and Manhattan in the intersession period. In an exhibition, the Bears were able to knock off Army.

Their record for the season now stands at 5-3.

Manhattan

On Wednesday, January 24, the Cagers tangled with the Jaspers of Manhattan in a game that the Bears figured to lose. The final score, 74-58, left no doubt that Manhattan was the superior team.

The Bears got off to a 3-4 lead on a layup and foul shot by Hector Lewis. This was the last time that they had the lead. The Jaspers took advantage of a four-minute Beaver dry spell and piled up a 2-9 advantage mid-way through the first half, before Lewis, Joel Ascher and Joe Benardino began to find the range. The cagers closed to 36-22 late in the period and trailed and trailed, 36-26 at the half.

In the second half, the Jaspers increased the margin to twenty points, but after twenty points, Only Lewis and Ascher were hitting with any degree of consistency for the College, and they could not match the combined firepower of the whole Jasper starting five. Although the cagers fought back to within nine points, 63-54, they could not overcome the deficit, and they lost.

The Alumni substituted freely and got a good showing in sixteen or so minutes of the game.

Alumni

The Bears pumped in a second half high of eighty-nine points as they defeated the Alumni, 57-71.

The Alumni defeated the Bears, 66-59.

Fairleigh Dickinson

Fairleigh Dickinson, led by Lewis in second-half action, the rival centers had one thing in common—they both hit a high of eighty-nine points during the game.

The Bears were pulled out of the contest, eliminated in the 137 lb. contest, the 130 lb. contest, and the 126 lb. contest.

The Bears took the sabre division by a score of 6-3, but could not stop off the Tigers in the other two classes.

RHEE

Princeton University topped the College's fencing team, 17-10, in the Wingate Gym, on January 19. The Princetoners have now split four matches on the season.

Some fine sabre performances by former high school and newcomer Harry Mayer were wasted as the Bears showed poor performance. The saber wavers were not even able to score in the 137 lb. contest, the 126 lb. contest, and the 120 lb. contest.

Harry Mayer took a 4-0 deficit, in one, to cop a 4-0 decision in the 126 lb. contest.

The Bears took the sabre division by a score of 6-3, but could not stop off the Tigers in the other two classes.

Evans

Former College's wrestling team, 17-10, in the Wingate Gym, on January 19. The Princetoners have now split four matches on the season.

Cagers Face Terriers Tomorrow; Can Hector Lewis Stop Al Inniss?

The College's basketball team will travel to Brooklyn tomorrow to take on a tough St. Francis five, in what figures to be one of the Beavers' roughest battles of the season. Game time is 7 PM, at the 2nd Corps Armory.

In St. Francis, they will be meeting a team far better than its 8-6 record indicates. The Terriers feature a well-balanced attack centered around Al Inniss, the nations leading rebounder, and a definite prospect for the pros.

Coach Dave Polansky's charges will not be able to contain their defense too much on Inniss, though. St. Francis' Les Yellin and Tony Delia are both dangerous shots.

Much of the Beavers hopes will be on the shoulders of Hector Lewis. The six-five center has been steadily improving all season and tomorrow might just be his night to really break loose. Lewis will be helped under the boards by big Bob Silver and Joe Bennardo, and it will probably be up to Joe Bennardo and Marty Vaughn to hold Delia and Yellin. Groveman, after a fine season start has tailed off considerably in the last few games, and a return to his earlier form, albeit a bit cautious, St. Francis mentor Danny Lynch hoped his boys would "play the way I'm sure they can, and we can win it."

Beaver coach Dave Polansky said, "I think we can win it, but they're a better club than their record shows. They've lost to some pretty good teams."

In a preliminary contest on Monday, February 3, 1958, the Terriers took the Beaver's measure five times. The College still had a big lead in the rivalry which began in 1921; the Beavers have won twenty-four of thirty-one games.

Both coaches were optimistic, albeit a bit cautious. St. Francis mentor Danny Lynch hoped his boys would "play the way I'm sure they can, and we can win it."

Beaver coach Dave Polansky said, "I think we can win it, but they're a better club than their record shows. They've lost to some pretty good teams."

Directions...
The Eleventh Corps Armory, site of the game, at 15th St. and 6th Ave., in Brooklyn can be reached by taking the Independent line "D" train to the Prospect Park-Fifteenth St. station, and walking one block west.

Football in Los Angeles
Some of these problems, as noted by DesGrey, are: 1. Poor staffing. Springfield was named co-holder, 2. Inability to keep the Beaver booters on a consistent schedule. The Committee formally agreed with a Student-Faculty Committee on Intercollegiate Athletics (SFCA) proposal "to continue the suspension of football (at the College), since the problems confronting its reinstatement have not been remedied since the discontinuance of the sport.

Leon A. "Chief" Miller, lacrosse coach, is推迟ing at his home after an attack of pneumonia. He is expected to return in a few days. During his absence, George Bracun, an All America lacrosse star at the College in 1947, will take charge of the team.

Swimming coach Jack Rider is expected back at the College in a few days. Rider recently underwent minor surgery.

Tryouts for the Freshman baseball team will be held in the Tech gym Saturday, February 15, at 1 PM for players whose last names begin with letters A-J. The following Saturday is the tryout time for all others.

Post-Season Competition Proposed by NCAA

Soccer continued to dominate the College's athletic picture during intersession, as the Beaver Booters were picked number one team in the country by a national group.

Another NCAA action, a proposal for a national soccer tournament, could give them the chance to justify the honor next year.

The Booters emerged in a dead tie for first with Springfield College in the national rankings of the Intercollegiate Soccer Football Association (ISFA). The body, officially sanctioned by the National Collegiate Athletic Association (NCAA) compiled its ratings on a "strictly mathematical" basis in lieu of tournament competition, according to Beaver coach Harry Karlin.

Going through their ten-game season undefeated and untied, the Booters scored impressive wins over Army, Temple, and Brockport State Teachers' College. Springfield, under Coach Irv Sherman, breezed through their schedule in similar fashion, knocking off all nine of their opponents. Defensively too, both teams were equally tops, the Booters giving up six goals in their ten games, and Springfield five in nine games.

Even down to the point of All America selections the two squads remained tied. John Parsons, the Booters' star center halfback, became the first athlete at the College ever to be selected to an All America first team. Springfield placed left halfback Daniel Sullivan on the honor squad.

In the other intersession action, the NCAA voted to institute a round-robin national championship.

(Continued on Page 11)
