Cochannel Considers
Honors' Abolition

Council will consider a constitutional amendment today which would completely remove from Student Government powers to give out Honors and Awards.

The amendment, to be proposed by Council member Mike Ticktin, and

films...

Three films "The Photographic," "Passionate Pastime," and "Fish Market," will be shown at 12:30 PM in Room 248 Finley tomorrow. "The Photographic" views the artistic and cultural development of photography as seen through the life and work of Edward Weston; the "Fish Market" depicts the activities at the Fulton Fish Market; and film master Hans Richter's history of chess.

SAB's Demise Urged By Exec;
New Publicity Agency Hinted

The abolition of the Student Activities Board was recommended to SG Exec Committee last night in a report issued by a special investigatory body.

The group, headed by SG Secretary Larry Steinhauser, according to its sponsors, would make more effective a referendum passed last year in which students at the College voted to disallow the use of student fees to pay for the Honors and Awards program until all the certificates previously bought were used up.

Ticktin and Steinhauser believe that the intent of the referendum was to completely abolish Honors and Awards, and that the student fees issue is a technicality which is being used against the clearly expressed views of the student body. If the Amendment passes today's vote in Council, it will be put to the student body as a referendum in May's election.

Coe Declines SG Committee Post;
Holds Honors & Awards Unethical

Richie Coe, who had been appointed to Student Government's Honors and Awards Committee, announced Monday that he has declined the post. Coe said that his refusal to serve was based on his belief that the student body had voted against the concept of honors and awards in last December's election.

A referendum on that ballot called for elimination of the SAB, changing the Bylaws in like manner, creating a Publicity Regulations Agency responsible to SG Exec through the Campus Affairs Vice President, creating a Social Functions Agency, replacing the SAB Chairman with a Campus Affairs Vice President on the Finley Planning Board, and designating club liaison as one of the functions of the Educational, Campus, and Community Affairs Vice Presidents.

The report states the failure of the SAB to four reasons, inadequacy and misrepresentation of the Federation system, lack of any real power, positions occupied by unqualified and disinterested students, and encroachment upon the SAB's power by other organs of SG.

Other suggestions included in the report include placing a referendum on the ballot to remove Article V of the SG Constitution which deals with the SAB, changing the Bylaws in like manner, creating a Publicity Regulations

State Senate To Vote
On City Scholar Grant

The State Senate will vote today on a bill which would require the City to match all State Scholar Incentive Grants awarded to City residents. The measure, labeled Senate In-

The provisions of the bill would apply only to New York City. According to Senator Marchi's legislative assistant, Charles Hall, "not so many high schools have expressed an interest in higher education" as the City.

Senator Marchi could not be reached for comment. He said in a recent interview that the bill would not affect the City's system of free public higher education. He said there were "too[ many localities] that would like discussing or questioning any plan like this."

The bill can either be passed, defeated, or simply left on the calendar, which would probably have the effect of killing it. According to a member of Senator Abraham Barkin's (Dem., Bk) staff, the bill has been "starred," which indicates that members of the SG committee were opposed to it.

Dean's List Names 55 Top Students

The Dean's List for the spring term was released by the Registrar this week. To be on the Dean's List a student must have an index of 1.2 at the time sixty credits are completed.
Highly uncharacteristic of their recent trend toward issues of universal interest, the Vector which went on sale yesterday is, for the most part, quite technical and of limited scope. Of the three feature articles, only one might interest a student not majoring in Science or Engineering; others deal with specialized subjects in correspondingly specialized terms.

Unquestionably, the highlight of the issue is David Zinamon's article, "Preparation, Properties, and Reactions of the Noble Gases." Zinamon, a Chemical Engineering major, presents a discussion of the behavior of the "inert" or "noble" elements, which until very recently were believed incapable of chemical combination.

Elements ordinarily combine only by filling or rearranging their outer "electron shells" to attain a certain stable configuration. The inert elements, Helium, Argon, Krypton, Neon, Xenon, and Radon, already possess this stable structure, and therefore show no tendency to rearrange or to react with other elements.

In June 1952, the first compound of an inert element, Xenon, was formed in the laboratory. Many attempts have since been made to explain this combination, and many subsequent compounds of noble elements which have been formed.

Zinamon displaying a competent knowledge and understanding of his field, handles the topic in a straightforward manner which, because of the comparative generality of the topic, makes it worthwhile reading for any student with scientific inclination.

Unfortunately, all resemblances to a "family" magazine ends here, and the Vector becomes a true "college newspaper." The student who would find his topic "Geophysical Survey by Seismic and Resistivity Methods..." an explanation of the way in which subsurface rocks and strata are charted prior to the construction of a building, is again disappointed.

The topic itself is specialized and unwieldy, and the author assumes a foreknowledge on the part of his readers which seems somewhat unreasonable. His presentation is, ordered, but on a considerably higher level than it need be.

Victor Greenhut's "X-Ray Diffraction of Crystalline Materials" is a discussion of a technique for crystal structure analysis.

"Most solids have a crystalline structure..." A crystal is defined as any structure in which atoms are arranged in a systematic and periodic manner. X-Ray Diffraction is a method of measuring the distance between the crystal lattice planes...an important factor in the identification of materials. Although, although this is a lucid and straightforward discussion of a research paper, the article seems suitable readings for only a select audience.

In June 1952, the first compound of an inert element, Xenon... was formed in the laboratory. Many attempts have since been made to explain this combination, and many subsequent compounds of noble elements which have been formed.

Bob Rosenberg
SG President

Prof To Survey Relationship Of Health To Living Conditions

A City-wide survey to discover the relationship between living conditions and the family's state of health, is being supervised by a teacher from the College.

The teacher, Irving Silin (Economics prof. and Observer Post's Managing Editor), conducted the survey, which is being sponsored by the City Health Department, would provide data that can be obtained in no other way. He explained that many health problems are a question mark to the Department because the sufferer may never report his illness. He noted that this especially applies to noncontagious and chronic diseases.

Fourty-eight questions will be asked of 5000 families by the end of the year. One query states that the Department "realizes that many problems...housing, jobs, education...affect the well-being of families" and asks if the particular family's "serious problems" are similar to its own.

A mother's answer to this question was that her ten year old son came home with an "addict's needle for a toy." She said she was "afraid." The other question is aimed at finding out who takes care of the children of working parents during the day.

North Of Dixie

It seems inevitable that there will be demonstrations against Governor Ross Barnett when he speaks at the College in May. It is, however, important that any demonstration be conducted responsibly, and that it not be used to prevent Barnett from coming to this campus. An Ad Hoc Committee has been formed to prevent just such an occurrence. We urge that the leaders of all clubs at the College attend its meeting tomorrow in order to show the Governor that here, at least, a man can say what he wants no matter what his audience thinks of him or his opinions.
Club Notes

All clubs will meet at 12:30 tomorrow unless the time is otherwise indicated.

AGREE

"Le Cercle Francais du Jour"

The French Club will present Madame de la Tournelle for a reading and discussion of "The Death of a Baronet." Professor de la Tournelle will be present to reply to questions on the literature of France. All are invited.

ASTRONOMICAL SOCIETY

The Society will hold a meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank, director of the observatory, will discuss the history of astronomy and its relation to other sciences.

AUGURS

Dr. Ewbank will present "The Art of Foretelling" at 8:00 PM in the Science building, room 323. He will discuss the methods of predicting future events.

BILOGICAL SOCIETY

The Society will hold its quarterly meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the latest research in the field of biology.

CHEER CLUB

The Club will meet at 12:30 PM in the Recreation center. All members are invited to attend.

COMMUNICATIONS CLUB

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of communications.

CANNIBAL SOCIETY

The Society will hold a meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of cannibalism.

CASTOEUS

The Society will hold its quarterly meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest research in the field of entomology.

CHESS CLUB

The Club will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of chess.

COMMUNICATIONS CLUB

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of communications.

CROSSWORD

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of crossword puzzles.

DANCE

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of dance.

DRAUGHTS

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of draughts.

DRAMA

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of drama.

ENTOMOLOGY

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of entomology.

FILM SOCIETY

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of film studies.

GEOGRAPHY

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of geography.

GEOLOGY

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of geology.

HISTORICAL

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of history.

HUMOR

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of humor.

HUMANITIES

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of the humanities.

MATHEMATICS

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of mathematics.

MUSIC

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of music.

PHYSICS

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of physics.

PHYSIOLOGY

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of physiology.

POLITICAL

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of political science.

PSYCHOLOGY

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of psychology.

QUICKS

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of quicksilver.

RELIGION

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of religion.

SCIENCE

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of science.

SOCIAL

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of social science.

SPORTS

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of sports.

THEATRE

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of theatre.

UNIVERSITY

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of university studies.

WOMEN'S

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will present a lecture on the history of women's studies.

YOUTH

The Society will hold its regular meeting at 7:30 PM in the Science building, room 321. Dr. Ewbank will discuss the latest developments in the field of youth studies.

Bowling...

(Continued from Page 4) teams, two (besides the College) as clubs, but every year a composite unit was subsidized by its respective college.

Who do you blame for the folding of our team or club (or anything else you want to call it)? Do you blame the school which fell after that another infamous scandal would result by recognizing the bowling club as a team, just as all the other members of the BCAJ had done with their respective organizations? Do you blame the students who, just like other good little beavers, didn't give a damn, and decided not to show up or not to pay the $1.30 we were individually charged for bowling three games a week? Do I blame myself for not publicizing our efforts, but who wants to know about any team that's going badly? It's been a very perplexing situation.

Just as after every season, there's always next year, and once again there'll be somebody trying to organize a bowling club, or team, or who, who knows what they'll be trying to organize next year? The Athletic Committee of the City College of New York thinks the sport of bowling has had it, before K's even started.

tennis...

(Continued from Page 4)

Bernie Wasserman, captain of the Beaver racketeers last year, is no longer playing. Marty Deitch, Mike Seiden, Leon Rapport and Joel Dovinsky will provide a solid foundation for the team's efforts. Rich Gowing, a new Beaver, Tap looking good for this season, on the roster by the end of the month, but Karlkin feels he needs a lot of coaching. He's ready for real playing for at least another month" the Coach said.

Congratulations

RENEE WIDMAN

We, the makers of Marlboro, know one kind of guidance: the direct route to greater smoking pleasure. Try a fine, filtered Marlboro, available wherever cigarettes are sold in all 48 states of the Union.
The sound of tennis rackets is being heard around Finley Center as the College's tennis team begins practice for another season under the guidance of Coach Harry Karlin. The Coach is looking forward to a season "hopefully as good as last year," when the team finished with a fine record of 8-1.

Karlin is a wee bit apprehensive about his match with Adelphi, since Adelphi was the only team to beat the Lavender last year. The team itself had such outstanding players as NYU's Barry Kramer and Seton Hall's Nick Wexlerman on it. A week before, Blatt had also been named to the second team on the Tri-state League.

BY ARNIE BERMAN
Arnise Berman was captain of the College's Bowling Club for two years.

For a more about the first and only half season of competitive bowling, the Beaver Bowling Club officially did not represent the College in inter-collegiate play. However, it did exist as a team in the Eastern Intercollegiate Bowling Conference.

For one of two two-and-a-half season, the Beaver Bowling Club finished as a first division "team," competing against teams from the other major colleges in New York City and the immediate vicinity. For instance, the first division bowling "team" knocked the heck out of the so-called "powerhouses" of the league. Today, the Beaver Bowling Club no longer functions. For one of you, this will mean absolutely nothing, but to myself, as captain of this unofficial "team," it means a lot. It means that over 2 years of work is wasted. It will probably mean that the Athletic Committee of the College will not ever bother to consider the possibility of a bowling team existing as a major one. For last week I was forced to withdraw the Beaver Bowling Club from the EIBC. The reason—a lack of finances and student interest.

Functioning as a club or a team (whichever you care to choose) we received no money from the school. The reasons for this were simple. If we functioned as a club, we could not have had a select number of students competing and would have had to let any student who wanted to bowl, the

Pershing Rifles Finish On Top
In Invitational Drill Competition

Tennis Team Preps For Opener:
Karlin Optimistic About '64 Slate

Last Major Event:
HPCA-IFC Get Set For Match

The College's basketball team wrapped up their season just about a month ago with a victory over Bridgeport. The Knights wrapped up their season (which never began) with a fine loss to Detroit, and last Saturday night UCLA defeated Duke for the NCAA crown to officially finish the collegiate hoop campaign.

But there are still major college events left on the immediate sports calendar. The National Basketball Association has its playoffs now and it is more important than that is the time to play the players tomorrow night in Wrigley gym.

It's the annual Interfraternity Council—House Plan Association basketball contest to be played for the benefit of the World University Service.

No matter what anyone says, this is one of the top drawing cards of any athletic event at the College. IFC will be running for revenge this year as HPCA has been victorious in the only two previous contests.

In a very unusual preliminary game, an all-star female squad from HPCA will take on a similar team representing HPCA in a vol-leyball swing-out. Admission is fifty cents, with proceeds going to WUS, of which President Bueell Gallagher is international chairman.

Stickmen to Open
Spring Sports Sked

Spring arrived last Friday and the spring sports season will arrive next Monday when the College's lacrosse team opens its season at 2 PM in Lewishon Stadium against New Hampshire.

Saturday, April 4 will see the baseball team playing Iona in a double-header starting at 11 AM at Iona's New Rochelle campus.

More close to home will be a tennis match with St. John's. Scheduled for a 1 PM start, in the official schedule of Division of Inter-collegiate Athletics, is the opening of the outdoor track season in Lewishon Stadium. Also scheduled for Lewishon (according to the schedule) is the second Lacrosse game of the season at 2 PM.

In any event, the Lavender stickmen will compete against Mostch, while the Beaver stickmen will face Harvard.
