The President of New York University charged Wednesday that the City University's "irresponsible" expansion policies are undermining private institutions in New York, when the Regents' recommendation for tuition charges in City University is accepted, "whole complex of higher educational institutions will become national and productive."

Mr. Hester speaking at the annual Scholarship Fund Dinner of the Island University, attacked City University's intention of raising $500,00 additional fresh funds. (Continued on Page 5)

More Aid Okay But Carlinio Still Pro-Tuition Man

Speaker of the State Assembly, Joseph Carlinio, Republican from Nassau County, declared last week that the state would support efforts by the City University to obtain an increase in funds from the state to allow more students to enter and to expand its doctoral program.

The said that he would vote to support the Board of Higher Education's refusal to adopt a tuition charge at the city colleges recommended by the Board of Regents.

"Tuition is a separate action," Mr. Carlinio said, exclaiming that he was in favor of a "no charge but added, "I don't think the City University should penalize for its refusal to follow the recommendation of the board of Regents."

The Assemblyman said that the increase was contributed to new grants from the University's total budget. Mr. Carlinio added that if the state had given the same amount of support over the past years the monetary problems would not arise.

The convocation is limited to students and faculty.

Jahoda At Carnegie Recital Hall; Brunswick’s Bagatelle’s Have Debut

An OP Review by Martha Sternin and Marcy Brody

From the opening notes of Bach’s Partita in E Minor to the final bow after the third encore, the audience at Carnegie Recital Hall was treated to a skillful performance by Fritz Jahoda. Mr. Jahoda, a member of the College’s Music Department, chose an exciting program for his first piano recital since 1956. The selections, ranging all the way from the technical virtuosity of the pianist to the fleeting dissonance of the listener, were chosen with care.

Mr. Jahoda maintained the necessary precision, and the effect was wonderful. His technical accomplishments were accompanied by frequent passages of remarkably sensitive playing. Noteworthy was the lyrical beginning of the Allegro, the expressive movement of the Schubert Sonata as were several sections of Schumann’s Kreisleriana. The pianist was neither overly romantic nor cold, but he was completely absent from his music. Completely absent from his music.

Mr. Jahoda chose to eliminate the repeats in the work which amount to at least seven minutes. The skill of his performance convinced us that he has justified his inclusion in the program.

The pianist was neither overly emotional nor cold, but he was completely absent from his music. Completely absent from his music.

Jahoda chose to eliminate the repeats in the work which amount to at least seven minutes. The skill of his performance convinced us that he has justified his inclusion in the program.

Fritz Jahoda
At Carnegie Recital Hall

Brunswick Work Played

Said of the music of Debussy, it was written in 1958 by Mark Brunswick, Chairman of the College’s Music Department. The music is entirely composed with a very distinct ear for color and harmony. It is highly recommended for those who enjoy modern music.

Brunswick Will Play Works by Debussy, Ravel, and Messiaen

The selection of music was made with care, and the audience was treated to a skillful performance by Fritz Jahoda. Mr. Jahoda, a member of the College’s Music Department, chose an exciting program for his first piano recital since 1956. The selections, ranging all the way from the technical virtuosity of the pianist to the fleeting dissonance of the listener, were chosen with care.

Mr. Jahoda maintained the necessary precision, and the effect was wonderful. His technical accomplishments were accompanied by frequent passages of remarkably sensitive playing. Noteworthy was the lyrical beginning of the Allegro, the expressive movement of the Schubert Sonata as were several sections of Schumann’s Kreisleriana. The pianist was neither overly romantic nor cold, but he was completely absent from his music. Completely absent from his music.

Mr. Jahoda will conduct the orchestra for the 28th and 29th of this month. He is looking forward to the opportunity to work with his students.

Jahoda chose to eliminate the repeats in the work which amount to at least seven minutes. The skill of his performance convinced us that he has justified his inclusion in the program.

Brunswick Crushes Tax Relief Bill
For Parents, Working Student

The Senate rejected two special tax relief measures amounting to $805 million for college students and their parents last Tuesday night. The amendments offered a $11.6 million tax credit, to be defended in close voting by what was described as a ‘lot arm twisting’ on the part of the Johnson Administration.

One amendment, sponsored by Senator Abraham A. Ribicoff, Democrat of Connecticut, would have provided $255 in tax credit for the purchase of tuition books, supplies, etc. It was defeated by a margin of 48-45.

The other amendment, sponsored by Senator Winston C. Prouty, Republican of Vermont, would have provided $325 in tax credit for parent’s expenses. It was defeated by a 44-44 tie vote, which, by Senate rules, resulted in the defeat of the measure. It was defeated by a margin of 48-45.

Jahoda chose to eliminate the repeats in the work which amount to at least seven minutes. The skill of his performance convinced us that he has justified his inclusion in the program.

Calculus and Geometry Win Oil Tank Guessing Contest

All Lewis Mandell wanted to do one December evening was to go to the movies. Instead, he and two friends spent that night and many following nights in an election office, and both Center for the Pro Prize and Sears shares for the benefit he found on 41st Street.

Lewis Mandell, accompanied by Arthur M. and Arthur Shier of Brooklyn College, entered the St. George Ferry Terminal in a contest booth set up by Staten Island Oil Dealers' Association and staffed by three girls from Center College wearing Santa Claus hats. The object of the contest was to guess the number of British Thermal Units (Btu) in a tear-drop-shaped, oil filled tank.

Mandell, Michaels and Shier had no inkling of guessing. Applying principles of analytic geometry and integral calculus, their final "guess" came within a hair's breadth of a gallon of the exact number of Btu. This estimate was reported to be less than any ever achieved in a contest of this sort.

The first worked out the equation of ellipse, whose shape the tank vaguely resembled, resolved it upon its 84 inch major axis and then computed the volume of resulting ellipsoid figure. Taking adjustments for the fact that container was not-a perfect ellipse, computed its volume at 182,493 gal. At 140,000 BTUs per gallon, their estimate was 25,548,600 BTUs, willing to risk failure by submitting only one entry, they decided upon the winning plan. Figuring that approximately 20,000 entries would be made, they resorted to send in between 300 and 500 entries in steps of 10,000 Btu on either side of their calculated answer.

Reasoning that most people would enter only round numbers, they decided to submit two additional entries for each 10,000 BTU entry, a few digits above or below a round number. "We played it like a game, competing with the other contestants," Mandell said.

They called at the booth frequently to pick up blanks and submit estimations, sometimes changing coats to disguise themselves and ease the embarrassment. Sometimes they came at night to avoid the crowds; often they came during rush hours to hide in the crowds.

When the results were announced, all these top prizes were theirs. Along with the $1,800 came a considerable amount of publicity New York Times on Jan. 28. The story was published in the days later the story went out over the AP wire and was reprinted in such newspapers as The New Britain in Connecticut, The Evening News and the Lawton Oklahoma Gazette.

Most of their fan mail, however, came from little old ladies, one called Mandell "the salvation of the world," and another wrote: "Two made my day complete when I read that."
More Than Buttons

Ever since the appearance of the notorious Headl Report in the fall of 1960, the anti-tuition demonstration has become a common occurrence. Students, similar to the admonition, "If you don't come to the picket, rally, etc., tuition will be imposed," falls too often on bored ears. The warning, however, does almost completely apply to this term's first free tuition action to be held Wednesday, Lincoln's Birthday.

Student Government has wisely decided 1-4 days, 1964, with a new approach to the City University's perennial thorn in the side. Mass demonstrations of picket-bearing, slogan-chanting students have proven to be somewhat less than successful. The new tack, which promises to be more fruitful, will hit the legislators where it hurts most—the ballot box.

Wednesday's action is slated for Manhattan's 6th Assembly District—a heavily populated residential area which includes Stuyvesant Town and Peter Cooper Village. The area, represented in the legislature by Paul Curran, a pro-tuition Republican, is termed a borderline district—that is, the GOP won by only a small margin. If canvassing is successful, if enough of Mr. Curran's constituents are convinced that free tuition is right and necessary, and if Mr. Curran's office is deluged by a flood of post cards from voters urging restoration of the free tuition mandate, then, perhaps, we will achieve one more supporter in the State Legislature.

The ramifications of the proposed demonstration are far more vital. If there is a large turnout, other free tuition foes will awaken to the fact that we are capable of exerting influence on the voters. 1964 is an election year, and Rockefeller supporters particularly can be affected by strong pro-free tuition sentiment. Student participation is demanded, in addition, because there is a strong probability that the Baruch School segment of the day's activities will be given press and television coverage. The newsreel cameras must focus on a half-filled hall. Reporters cannot be given the opportunity to write of an apathetic attitude and lack of support on the part of City University students. We must be present to show all New York City and all the state that we do care.

One more benefit can be accrued from participation in Wednesday's project. Students will be given the opportunity (or forced into the position) of explaining why they support free tuition. Sporting a button is not enough. Every student who feels that free tuition is desirable must also know why it is in and be able to convince others. Student Government, the student press, and the Alumni Association are willing to supply the facts. Students must be ready to go out and expound them.

The importance of a large, massive, turnout cannot be overstressed. Every student who is now partaking of the benefits of free tuition should be present. This is the very least that can be done to insure the maintenance of a 117 year old "tried and true" proposition.

NAACP and CORE Begin Book Drive

A book drive is being conducted by NAACP and CORE this week to help southern colleges, both integrated and Negro, build up their library facilities.

Both organizations conducted a southern integrated and Negro schools in general to have poor libraries. There are many schools which have few or no books. Or two schools built side by side in Tennessee, one was reserved for Negroes and had no library. One school in Ft. Pierce, Florida had 150 books for 750 students.

Last year's book drive netted 2200 books, which were sent to Miller College in Birmingham, Alba- bama. Before the drive the college had 400 books.

Books will be open all next week opposite Knittle Lounge and opposite Room 135 Finley.

The term's first issue of Vector, which will be on sale today through Wednesday, is a slender volume, full of ads and pictures, and the finest issue in quite a while.

It's lack of bulk (there are but two feature articles) is more than amply counterbalanced by the quality of its content.

Lawrence Presser's article "Introduction to Molecular Electronics," is a discussion of the ultimate stage in miniaturization...the use of tiny crystals of semiconductor materials to replace the massive circuits now used extensively. Ideally, the entire circuit might be impressed upon a single crystal which would serve more efficiently and be more reliable than the original circuit.

The 0.05 of molecular electronics is thoroughly outlined, from the huge, bulky, and unreliable vacuum tube circuits of the pre-1940 era...Semiconductor, micromodule, and thin-film circuits, each smaller and more efficient than the ones preceding it are discussed as well.

Presser never loses sight of the fact that he is writing to a lay audience. His explanation of how an instrument's performance is a delicately focused beam of electrons which is scanned across a surface...top is a hard and fascinating explanation.

Those sociology, philosophy, and history majors, whose interests lie far from electronic developments will be more at home with the second article.

Mr. Harold Dorn treats the topic, "Technology and History," from a viewpoint and in a style that would do credit to any sociology text. Mr. Dorn shows technology as a cultural trait...and succeeds admirably in discussing both the culture of technology and the technology of culture.

...Technology is more than an activity—it is a cultural process, bearing upon and influenced by every other aspect of the cultural life of a society...The new scholarship calls for a comprehensive re-evaluation of the development of culture, reflecting a new mode of awareness more appropriate than Platonic idealism for a society polarized around technology and experimental science.

Virtually every reader will find some portion of the article which touches strongly upon his major interest.

A microscope which operates on the principle of a television camera is discussed in the "Engineering Highlights" section of the magazine.

"Key to the instrument's performance is a delicately focused beam of electrons which is scanned across a surface...the same way as an electronic beam sweeps out a picture on a television picture tube." The device is used for the microscopic examination and fabrication of microminiature semiconductor devices similar to those discussed in the article on "Molecular Electronics."

A stable magnetic field, which will be unaffected by slight vibrations in the surrounding magnetic field, and a "350 ion portable telescope" (wow!) are also explained.

The regular complement of features, the Dean's Page, Wheels and Vector Voils, fill out the magazine.

The issue as a whole seems representative of a trend towards "Scientific Americanism." Making ample use of photos and full-page multi-colored diagrams, Vector now approaches more closely than ever the general appearance of that publication.

It is disappointing to note that once again the selection of articles fails to produce a sample of original research. A magazine dedicated to the presentation of engineering articles (presumably for an audience of engineers) would seem an ideal medium for student research papers on an undergraduate level.

Although the articles in the present issue tend to favor the science-minded, rather than the science-trained, the publication is of the highest quality, and should be read by all science or engineering students.

BHF Scores Tuition For CU

has come out in favor of free tuition at the city's two-year community colleges.

Commissioner Allen attributed opposition to tuition by city officials to "a failure to understand what the policy would be and a very strong pride in the fact that they have had free tuition for so many years."

The Commissioner contended that scholarships would pay tuition for all students from low income families, and for some students with middle income parents. All students would have at least part of their tuition fee paid by the state.

Max E. Greenberg, President of the College's Alumni Association, described as "fraudulent" the Regents' claim that $15 million could be raised by charging tuition at the CU.

He pointed out that most of the CU's students would receive rebates under the scholar incentive plan, and declared that the CU would net $4 million from charging tuition, or about 3 per cent of its total budget of $131 million. He added that the cost of administering the tuition charges and rebates would cut heavily into this $4 million.

Working at a resort in Germany.

WORK IN EUROPE

Every registered student can get a job in Europe and receive a travel grant. Among thousands of jobs available are resort sales, lifeguard, office work. No experience is necessary and wages range to $400 monthly. For a complete prospectus, travel grant and job application return airmail, send $1 to Dept. J, American Student Information Service, 22 Ave. de la Liberte, Luxembourg City, Grand Duchy of Luxembourg.
The usual candidates box any number of things to do as children are not interested in reading and a book might not be the first thing they think of to read. So the challenge is to find a way to make reading fun and exciting for them. The Lavender sharpshooters scored a fine 1409 in route to raising the civilian C.W. light as the Beavers sunk the break on Thursdays. Students against Hunter College oh ter College athletic fund. The tickets will cost 59c and 50c and will be available at the office in Lewisohn Stadium. The College's rifle team was in the University of Rochester and the University of Hartford. The game against Rochester and Hartford will both be road games. The Lavender sharpshooters will have a member of the tri-state loop. The 1965 baseball schedule has been released by the University of New York. The Lavender memmen will find only one change from this year's. The Lavender lacrosse calender. **Hoopsters Upset Parriers Squeeze Princeton Tigers, 14-13**

By HARVEY WEINBERG

A field goal percentage of zero for the first eight and a half minutes of the second half last Saturday night, sent the College's basketball team to its third defeat in six tournaments in four inter-squad games and second defeat in Tri-State league competition. The cold shooting hand of the Lavender at Rider College, enabled the latter to drub the Beavers 72-57.

Before the Rider defeat, the Beavers had beaten Wagner and lost to Fairfield and C. W. Post. At Lawrenceville, N. J., the home of the Rider Broncos, the Beavers trailed by one at the half, 25-24. But when the second half began, the Broncos had 47 before the Lavender could corral a basket.

Alex Blatt was high for the Beavers with 14 followed by Dave Schweid with 13. Steve Golden began, the Broncos had 47 before the Lavender could corral a basket.

The Beavers broke the long final exam layoff on Thursday, January 30 against Fairfield but for the first twenty minutes the Lavender hoopers looked like they were still in the library as the Stags shot to an eleven point, 41-30 half time lead.

In the second half, Coach Dave Polansky's charges gave an inkling of the hard, strong play they were capable of as they stormed back to knot the score at 62 all with 1:09 to go in the game. But for these remaining minutes, Fairfield outscored the Lavender 11-6, to gain the victory.

- Actually the Lavender did not play such a bad game—it was simply that Fairfield played such a good one. In particular it was that Fairfield played such a bad game—it was simply that Fairfield played such a bad game. At Lawrenceville, N. J., the home of the Rider Broncos, the Beavers had beaten Wagner and lost to Fairfield and C. W. Post. At Lawrenceville, N. J., the home of the Rider Broncos, the Beavers had beaten Wagner and lost to Fairfield and C. W. Post.

The Lavender had five points even beginning road against Hunter. The team scored with fifteen points on a forfeit. The Lavender won and the Haws did win. The Haws did win. Darion beat the heavily, forcing Lefkowitz to the end of the strip. Darion did well, Darion being short. Darion having won.

The match had started poorly for the Lavender, with sausage being short. Darion dropped his first bout 5-2. Appice lost his second bout, and Lefkowitz winning his bout 5-4. Sophomore Darion, fencing epee, dropped his bout 5-1, leaving the score for the match at 18-18, and Princeton—12.

This left Beaver Stan Lefkowitz, an epeeist, in the lime-light. With a seemingly highly developed sense of the dramatic, he made the most of the opportunity, as he fought a nerve-racking see-saw bout. Lefkowitz started out on the defensive, and scored first. He then seemed to relax, go on the defensive, and was scored against by his opponent. The sequence of this sequence was continued throughout the bout until the score stood 4-4. The Tiger epeeist, eager for the touch that would tie the match fought aggressively, forcing Lefkowitz to the end of the strip. While he was leaving, however, Lefkowitz got a touch, clinched the match for the Lavender.

The match had started poorly for the Lavender, with sausage being short. Darion dropped his first bout 5-2.

On the second round, Kao won his bout 5-4, Appice losing and Darion dropping their bouts. Ray Fields and Captain Eddie Martinw won.

The epee squad did better, winning his bout 4-0 when time ran out, and Darion taking his opponent. Darion dropped his first bout 5-4.

On the second round, Kao won 5-4, Appice losing and Darion dropping their bouts, while Martinw won 5-2. The epee squad went two for one again with Cohen losing and Darion Lefkowitz winning 5-4, respectively.

The match consisted of three bouts, with Cohen losing and Darion winning.

**Matmen Deck Hunter And Wagner; Topped By Fairleigh Dickinson, 20-18**

The College's wrestling team fought its third match in eight days last Saturday and dropped a close 20-18 decision to Fairleigh Dickinson University (FDU). The Beaver matmen had previously beaten Hunter, 25-23 one week earlier and Wagner, 21-9.

After entering the intersession break with a season's mark of one win and three defeats, the Lavender gained the lead again when Hunter could not field a man in the 141 and 157 pound bouts.
