Premiere... A new organ in the Great Hall will be dedicated by Carl Weinrich, Guest Organist, on December 9 at 3:30 PM.

Villard Questions SG Questionnaire Efforts by Student Government to find an alternate solution to lecture classes in the Grand Ballroom suffered a setback yesterday when the significance of a proposed questionnaire was minimized by Professor Henry Villard (Chmn., Economics). The form would poll student willingness to take lecture courses during off-hours, such as 8 AM or 1 PM, when regular lecture halls would be available. It would be circulated among those students whose elective concentration cards include the course to be given in the Ballroom.

Magistrate Imbalance In a talk with SG President, John Zipper, however, Professor Villard warned that he could not be guided by the results of such a questionnaire in the compilation of next semester's schedule of classes. He maintained that many of the students who promised to take the off-hour course would not in fact do so, and that "an imbalance would be created."

Even if sixty per cent of the students polled were to declare their intention to take the course, he continued, "that would still leave forty per cent who would postpone taking it until the following term. Then we'd have an imbalance that term."

Apathy Surprises Kauffman As Clubs Skip Fee Interviews Only one of the seventeen chartered organizations with appointments sent representatives to a Student Government Fee Commission's series of such interviews this term. On the basis of these interviews, the Commission will recommend to the Student Government Monday night appointments for next term to Student Council.

Martin Kaufman, SG Treasurer and Fee Commission chairman, explained that all the organizations with appointments for Monday night were notified two weeks in advance and requested to inform Fee Commission if they would like their appointments cancelled. None of the seventeen chartered organizations requested such a change. City College apathy amazes me," said Kaufman. "(Continued on Page 2)"

Beaver Football Club Seeking Support; Petitions For Referendum On SG Ballot Would Up Student Fee 50 Cents; Group Has 1,300 Signatures

By HARVEY WEINBERG "The name of this organization shall be The Beaver Football Club of the City College of New York." That sentence is not as eloquent as the one that begins "We the people..." etc. etc., but like "the people," it is the beginning of a constitution. The Beaver Football Club is a reality. It has a charter filled with Student Government and 1300 signatures on a petition to levy a 50 cents fee on all students for its support.

The constitution says a lot about procedure—as set down in Robert's Rules of Order—but its purpose is to field a team of football players similar to the clubs at New York University and Fordham University.

The idea for such a group was conceived by three former-Sorority High School football backers, Randy Zimmerman, Gary Markman and Artie Shulman. Zimmerman, the club's president, was an all-city halfback with the Pegleggs.

"We got the idea when we saw NYU and Fordham play football again," said Shulman, the club's secretary.

As for players, the club has already contacted 35 to 40 former (Continued on Page 4)

Quakes Now Visible By PHYLIS OWEN An electronic visual recorder for the College's seismograph has been acquired by the geology department and is the only one of its kind in New York City. It will enable geologists to obtain an instantaneous record of earthquakes and major explosions.

The recorder, located on the third floor of Shepard Hall, is connected by 500 feet of shielded wire to the College's Babor Seismograph in the basement of the building. The Babor Seismograph, named after Professor Emeritus Joseph A. Babor, has been in use since 1948.

Records were obtained from it by a built-in photographic recording device. This photographic record must be removed and developed every twenty-four hours, thus making instantaneous information unavailable.

The new electronic visual recorder provides an immediate indication of geological occurrence. It consists of a paper-covered drum which rotates once every half hour for twenty-four hour periods. This information is continuously recorded in red ink on the paper by a stylus. The drum, the most important component of the recorder, is reset every morning and turned off during week-ends.

Davis Is Defeated As Harlem Group Votes for Wingate Professor John Davis (Chairman, Political Science) was defeated last week by Livingston L. Wingate in an election to choose a director for the HARYOU-ACT anti-poverty program.

Davis' candidacy was supported by Prof. Kenneth C. Clark (Psychology), while Mr. Wingate had the backing of Rep. Adam Clayton Powell.

Prof. Clark, who had resigned from HARYOU-ACT because he felt it was being used for political purposes by Rep. Powell, expressed the fear that the anti-poverty program would lose its effectiveness if it became politically dominated.

Prof. Davis attributed his defeat to the Board of Directors' ignorance of his qualifications. He said he had not given thought to working with the group because he did not believe that he would be asked to.

HARYOU-ACT was formed by a merger of Harlem Youth Opportunities Unlimted, founded by Prof. Clark, and Associated Community Teams. It is the distributor of the bulk of federal funds which will be poured into the city as a part of President Johnson's "War on Poverty," of which Sargent Shriver is the director.
The Albatross

With the upcoming meeting of the General Faculty, the issue of curriculum revision is once again coming to the fore. Although the proposed changes are not in any way radical, they are significant in terms of the College's seeming lack of initiative in this area.

Changing the curriculum simply for the sake of doing so is not, however, the solution to the problem and it does seem that the proposed changes are not the best possible.

Perhaps the most vital issue will be the change in the Science Sequence, a group of five science courses oriented to the individual. Rather than presenting the student with a meaningless and often incomprehensible assortment of definitions, formulas, constants, laws, and facts, however, an attempt should be made to present this important field with a view toward comprehension of overall trends, theories, and significance. Courses for Liberal Arts majors-in the History of Science and Philosophy of Science-would be far more useful and meaningful.

A similar tack should be taken in the area of mathematics. Although there may still be problems to solve with regard to the experimental Math 61 course, this method of approaching the subject seems closest to what is needed than does the traditional algebra-calculus course presently offered.

A proposal has also been made to give the student a choice of taking music or art, rather than both courses. The former two areas. At least a passing acquaintance with both the world's great music and art is a prerequisite for any education.

Following the subsequent banning of that organization from the University of New Mexico, is an attack on all college students and that by not coming they are significant in terms of the College's seeming lack of initiative in this area.

"Peace Corps Team Comes Back; Representatives Will Test Students"

Hank Jihaja, a graduate of the College and a member of the Peace Corps with friends on a River in Colombia, where he served. He presented his report one hour placement test beginning on December 9th. A completed Peace Corps Questionnaire must be submitted to the tester before the exam can be taken.

R. Burgess, Director of the Peace Corps, in a letter to all faculty members, stated, "I hope you will agree that it is important that the Peace Corps have volunteers who are politically and intellectually alive — who have the curiosity about the world . . . of your students."

Gelber, Speaking On His Art, Discusses Theater's Problems

Bittered by the types of characters in other plays, and the use of "slight rather than great jazz players for background music," Jack Gelber decided to write "The Connection" seven years ago.

Mr. Gelber wrote the bulk of this avant-garde play, "three days" he says. And it ran for more than three months at the Living Theater.

Writing on the rise of experimental theater at an open meeting of the English 90 class last Monday, Gelber said that many of the "faddish playwright's of his school, such as Albee, Isaac and himself, have no theatrical background when they first write a play."

Mr. Gelber, who is a writer, a director and a producer, continued, "When a writer is trying to find a producer for his play, he is faced with a very difficult time."

Mr. Gelber said he "was almost certain that everyone made suggestions on the sets and set designs, the use of parts and the interpretation of lines in his play."

The television show Candid Camera used the element of surprise very well, but after its first show it offered nothing new, maintained the playwright in illustration of his point.

Mr. Gelber went on to say that professional writers were divided by this into two categories: Those who approached "on the principle of approach and write screen plays" and those who "distinguish themselves what makes them famous" by using all of their talents.

Pupils Face Profs In Debate Tomorrow

Students and faculty will have a chance to match wits in a revival of Sigma Alpha's classic "Student vs. Faculty Quiz." Thursday at 12:30 P.M. The content, organized on the lines of TV's "College Bowl" series, but without the competitive time factor, will provide "better student-faculty relations," said Marvin Shotkin of Sigma Alpha, Monday. It will also provide publicity for the honor service society and its functions.

General Knowledge Only

Questions will be limited to general academic knowledge only.

Moderating the quiz, in Room 306 Shepard, will be Prof. Kurt Lowes (Chem., Geology). Faculty members will be: Prof. Walter Miller (Chem.), Prof. Walter Miller (Art, Prof. Bernard Sohmer (Math) and Prof. Joseph Talbot (Eco.). On the opposing team will be Campus Editor-in-Chief, Joe Berger, Community Affairs Vice President Mike Tickle, Bob Tudekman of Phi Tau Kappa, and Student Government President John Zippert.

LEARN HOW TO REALLY LIVE!!! — TAUGHT BY AN EXPERT — SEE AUNTIE MAME

Friday, December 11 and Saturday, Dec. 12, 1964

Tickets opposite 152 Finley.
proved to be Ray's downfall, for to last game in his freshman year his old nemesis, a dislocated left shoulder, suddenly decided to interfere with his plans.

He had a comparatively good season last year, the unexpected shares the team captainship with his old nemesis, a dislocated left shoulder, suddenly decided to interfere with his plans.

Polansky made a special effort not to work Ray too hard during practice this season, which began during the month of October. "It's better to have him here with less practice than not to have him here at all," he remarked.

The other Beaver captains are all practicing hard to put the finishing touches on their plays and shooting for the coming season. With the first official game only days away, Polansky has been working his boys at a fast clip. It looks as though the Beavers will start with Camisa, Julie Levine, Alan Zuckerman, Bob Kassman, and one other man who has not yet been named.

Polansky picks Mike Peirce, up from the freshman team, or Dave Schweid as two likely candidates for the fifth position on the court.
