

PROPOSED M.S. PROGRAM (MAJOR IN MATHEMATICS)

Supporting Data

Aims of the Program

The program aims to provide advanced work in mathematics and physics beyond what can be obtained in undergraduate study. The program is designed for flexibility in meeting the needs of the two groups of students expected to enroll in the program: (a) graduate students in engineering pursuing either a Master's degree in one of the engineering fields or the new Master of Science degree in the School of Technology, (b) and graduate students in the College of Liberal Arts and Science who plan to work toward the M.S. degree offered in the Liberal Arts College.

Reports on M.A. & Ph. D. Degrees
NYCC. FACULTY COUNCIL

The FACULTY COUNCIL Minutes commence in the 1930s. The most important committee of the Faculty Council is the Curriculum Committee. The list below of major reports issued by the Council, includes a number from that Committee. To get a full record of year to year changes in courses and curriculum, the Minutes of the Curriculum Committee should be consulted. Earlier years had only proposed reports.

Masters Degree Programs

The campus-based M.A. and M.F.A. programs are those in Art (Art History and Museum Training), English (Literature, English Pedagogy, Linguistics and Creative Writing), Medieval and Renaissance Studies, Music (History, Theory, Composition and Performance), romance Languages (Spanish), Speech (Audiology and Pathology) and Theatre Arts (History). In terms of student interest the strongest of these are Art and English (Primarily Creative Writing), although there has been fairly steady enrollment in Theatre Arts and Music from fall 1978 to the present. Overall, in Fall 1980 the Division was responsible for 55% of the total CLAS Master's FTE enrollment, a slightly larger share than in 1976 and appreciably larger than in recent semesters.
