## Introducing Mr. Wheeler '56 in "Portrait Series"

## Noted Graduate, Author of "Sixty Years of **American Life" Praises Thoroness** of City College Training

From the press of E. P. Dutton and Company has just come a volume entitled, "Sixty Years of American Life," by Reverett P. Wheeler, one of the most loyal and distinguished graduates of our College. As student and as man of affairs, Mr. Wheeler's has had a life crowded with activities for community betternent, bringing distinction to his Alma Mater. The record of Mr. Wheeler's life nation during the latter half of the nineteenth century. "Not only what Mr. and what he has himself done, make his book of memories a valuable record of American life." One cannot close this volume without being again forcibly impressed with the significance of Philip James Bailey's lines: "We live in deeds, not years; in thoughts, not breaths; in feelings, not in figures on a dial. We should count time by heart throbs. He most lives, who thinks most, Mr. Wheeler was born in New York in 1840, and was graduated with honors from the Free Academy (now C. C. N. Y.) in 1856, with the degree of A. B. He was awarded his LL.B. by Harvard in 1861, and afterwards to the Bar of the United States Supreme Court, he has since been an active practicing attorney chairman of its Tariff Reform Committee, one of the framers of the Pendeton Bill, President of the Church Club, and gain many important cases, involventions of the Committee of Inter-line technical questions which otherwise

United States Supreme Court, he has since been an active practicing attorney. During this time, Mr. Wheeler has been President of the Reform Club and chairman of its Tariff Reform Committee, one of the Reform Club and Bill, President of the Church Club, Chairman of the Committee of International Law and the Special Committee on Law Reform of the American Bar Association, Chairman of the Committee on International Arbitration of the New York State Bar Association, Chairman of the Committee on Professional Ethics of the New York City Bar Association, Chairman of the Committee on Professional Ethics of the New York Country Law Committee on Professional Ethics of the New York Country Law Committee of Professional Ethics of the New York Country Law Committee of Professional Ethics of the New York Country Law Committee on Professional Ethics of the New York Country Law Committee on Professional Ethics of the New York Country Law Committee on Professional Ethics of the New York Country Law Committee on Profession of the New York City In Indiana of the Country Law Committee on Profession of the New York City Indiana of the Country Law Committee on Profession of the New York City Indiana of the Country Law Committee on Profession of the New York City Indiana of the Country Law Committee on Profession of the New York City Indiana of the Country Law Committee on Profession of the New York City Indiana of the Country Law Committee on Profession of the New York City Indiana of the Country Law Committee on Profession of the Country Law Country Law Country Law C

American Life."

Among the alumni, Mr. Wheeler is known as one of the men who can be most depended upon to start civic movements, to stir up enthusiasm at public gatherings of graduates, and to support and advocate the cause of the city's free college. Mr. Wheeler has followed the progress of our institution from its earliest days to the present with deepest interest, His observations are embodied in numerous articles in the City College Quarterly and the press. About his classmates he has written at length. An especially noteworthy article on his classmate and friend, Russell Sturgis, '56, the famous architect and art critic, appeared in the architect and art critic, appeared in the Quarterly of March, 1909. In forthcoming numbers of the alumni magazine will be printed "Chapters from the
Life of a Lawyer," and a personal record of "The Free Academy of the City
The other day York."

March 1

Borough President Marks will speak before members of the Y. M. C. A. at a given by the Industrial Service Movement of the Y. M. C. A.

The purpose of this organization is to have the college mag.

The other day, I called at Mr. Wheeler's office in the heart of New York's

er's office in the heart of New York's swift-moving and tumultuous commercial district.

A genial, radiant, radiant, radiant, vigorous man greeted me. He was delighted to telk of the College. I regret I have not space enough to record Mr. Wheeler's remarks in full.

"Thoroughness," he said, "has always been the watchword of the College. Horace Webster, the first President, was a West Point graduate, and he introduced into our college the same honorable tradition of thorough and faithful work that has distinguished West Point. The training I received in the

Industrial Service Movement Will Dine in Conlourse on March 1

borough President Marks will speak before members of the Y. M. C. A. at a dinner in the concourse, on March I, given by the Industrial Service Movement of the Y. M. C. A.

The purpose of this organization is to have the college man become intimately acquainted with the industrial conditions that prevail in the business world. By actually coming in contact with the laboring man himself, the college student secures an invaluable experience in the industrial field.

Among other speakers will be the Hon. Everett P. Wheeler, '56; one of the college's most noted and loyal graduates, and Professor Walter E. Clark, of the Political Science Department.

the Political Science Department.

## 2.000 Students **Pledge Loyalty**

209 DESIRE TO TAKE THEORET ICAL MILITARY TRAINING IN COLLEGE

Two thousand students and members of the faculty joined the student council in its declaration of loyalty and allegiance to President Wilson and the country at the monster mass meeting called by President Mezes at the request of the Council last Thursday at noon in the Great Hall.

Addresses were delivered by President Mezes at the request of the Council last Thursday at noon in the Great Hall.

quest of the Council last Thursday at noon in the Great Hall.

Addresses were delivered by President Mezes, Major Charles E. Lydecker, member of the Board of Trustees, and Inspector J. J. Dwyer, of the Emergency Police Corps. Each student was supplied with a card on which he could indicate voluntarily his intention to prepare for service in the Reserve Corps by enrolling in the theoretical military instruction course authorized by the trustees, and by enrolling in the emergency Police Corps, a branch of the Home Defence League.

President Mezes, in opening the meeting, emphasized the fact that it was entirely a voluntary gathering of those who wished to take thought of the ways open to them to serve their country in case a real emergency should

try in case a real emergency should

try in case a real emergency should arise.

"The City College," he said, "is offering the students an opportunity to take a new course in theoretical military instruction, which together with the summer camp work required by the federal government, will admit to examination for the Officers' Reserve Corps. The great national need, in case of a crisis, is for officers, and the trustees in authorizing the course are offering the students an opportunity for the most effective service to the country."

The President also discussed the opportunities for service in the Home Defence League. He then referred to the opportunities of City College for cooperating with the Intercollegiate Intelligence Bureau, recently organized in Washington. This bureau will inform the government of the existence of technically trained men who will be prepared to serve the government in specialized capacities when the need arises.

Major Lydecker explained the object and contents of the new course in the oratical military instruction.

The City College course in theoretical instruction, he said, will include class-

The City College course in theoretical instruction, he said, will include classroom instruction, and some work in the open, such as marches, walks, and observations of territory. Completion of this theoretical course will entitle students to credits towards graduation.

Inspector Dwyer outlined the aims of the Home Defence League—an emergency or reserve force of the Police Department of New York. He explained that the present strength of the department is about 11.000, a body not plained that the present strength of the department is about 11,000, a body not large enough to meet an emergency situation. An additional body of 10,000 volunteers has already been enrolled, and will be trained for emergency police duty, for the protection of the water system of the state, and so on. In looking to the collegés of New York for a reserve force, the Police Department wants to interfere as little as possible with collegiate activities.

"Men of real insight, outlook and

"Men of real insight, outlook and breadth of vision know that there are many important things about which they can be concerned besides their own narrow selves," President Mezes said in closing the meeting.

"Our government is not buttressed by bayonets or maintained by force. President Wilson is a just, patient, and peace-loving man as was Abraham Lincoln. He is a man who knows how grave it is to undertake war; he knows also that there are contingencies and

also that there are contingencies and conditions under which war has to be undertaken, as Abraham Lincoln knew."

Milton E. Schattman, president of the student council, presented the following resolutions which were adopted by a uanimous rising vote: "The students of the College of the City of New York stand ready now, as ever, to do their

rul work that has distinguished West

209 students enrolled for the course
in theoretical military instruction and
140 enrolled in the Emergency Police
Corps. Of this number, 81 students
enrolled for both services.

## **Varsity Puts Indian** Sign On Aborigines

## Carlisle Puts up Crude Game and Loses 40 to 24. Tich Makes 11 Field Goals; Second Team Plays Poorly; 1920 Wins

Out of the wild and woolly West came last Saturday a war-whooping band of Injuns to lay waste this calm and peaceful settlement. But our lusty war-deneral Tichinsky's deadly eye kept the braves at a respectable distance from toward the end of the combat, from further duty. When the battle was over it The preliminary skirmish was annexed by our recruits when they took into Both sides dashed into the fray with a vim, and falls were not infrequent. Gaptain Herman manifested the most decided propensity for rolling around the on his ear, turned somersaults, did handsprings, was stepped all over and althe Carlisle boys were as cheery a bunch of chaps as have yet exhibited on our the game.

The summaries:

floor—never sore, always indifferent to the game.

The fair-sized crowd was impatient to get a glimpse of the natives, and waited eagerly. The question upper most was what did they look like. Would they wear Indian blankets? Were they wild? Maybe they carried knives and tomahawks! At last these objects of curiosity appeared—perfectly good Indians and quite tamed. Gorgeous scarlet and yellow sweaters attired their persons. A few seconds later our five appeared.

Neither side could score for the first three minutes. Tich drew the claret first, when he sent one home, right he-squaw, put his comrades in the lead on a foul and field goal. Tich retailed ated subsequently, taking the sphere from one end of the arena to the other past all opposition, while the rest of the team cleverly drew off the opposing players. Schmidt followed soon after. Then Pro, Tich and Mussy rang up in rapid succession. A truce was called here so that both sides could pick up their wounded and dead. The count was 20-10. Thus far the attackers had been repulsed.

was 20-10. Thus far the attackers had been repulsed.

The firing in the second half began forthwith. But the aim of the North American natives was poor, while that of our soldiers was sure. In a trice we had 30 points to our credit. It was Schmidt to Pro, to Tich and then into the basket. Nothing was able to hold the lavender. Twenty-five to the good, Commander-in-Chief Deering called off the regular troops here and sent in the Commander-in-Chief Deering called off the regular troops here and sent in the reserves. But the seconds made an aw-ful mess of it and seemed at sea. Car-lisle ran up four goals in no time. They might have set at naught the advantage gained earlier in the contest were it not for the kind assistance of Lefty, pro-moted to time-keeper. Time was called when the spectators began to get ner-vous as to the outcome.

The Indians retreated under cover of

## Freshmen Win Opener

undertaken, as Abraham Lincoln knew."

Milton E. Schattman, president of the student council, presented the following resolutions which were adopted by a uanimous rising vote: "The students of the College of the City of New York stand ready now, as ever, to do their duty to their country. We hereby voice our steadfast loyalty to the Inited States of America."

Capped by the fact that they had not practiced together much, and were a little given to individual playing.

Standing side by side, the pacifict and the militarist, the advocate of preparedness and his opponent—City College men, all, pledged their loyalty to the nation and their support to our president. Over fifty years ago when this country faced the greatest crisis of its lifetime, the College of the City of New York was not wanting when that great president—the spirit incarnate of America and its ideals—issued his call. The memorial in the Lincoln Corridor attests to the loyalty of our college in those bitter days. those bitter days.

Or, if the living voice be more effective, there is Colonel Lydecker, loyal alumnus and trustee, who fought under General Webb when the latter faced Pickett in the bloody charge at Gettysburg which decided that great battle and the nation's fate. How appropriate and inspiring was the appearance of Colonel Lydecker at this patriotic gathering last Thursday.

It is the duty of the American citizen—particularly the college nan—to do his part in perpetuating and maintaining the ideals and opportunities of this, the greatest of all nations.

We, who are neither ultra-classicists nor ultra-modernists—if we may use the words as autonyms here, but have studied both Greek and Latin, must needs raise our puny voice in favor of the despised languages which have fall-en under the ban of the Rockefeller millions.

The present unpopularity of Greek and Latin, must needs raise our puny voice in favor of the despised languages which have fall-en under the ban of the Rockefeller millions.

The present unpopularity of Greek and Latin, must needs raise our puny voice in favor of the despised languages which have fall-en under the ban of the Rockefeller millions.

Military The popularity of the new raining course in theoretical mili-

rie told his audience that the appropriation for the College had been doubled by the Board of Estimate, because the increased enrolment had necessitated such action. He refuted the contentions of those who argued that the College was receiving more than it needed.

A The assembly in the Great Patriotic Hall last Thursday was a Assembly tribute to the spirit of City College—the spirit which makes for service to the city and the nation. In a nation's crisis the college man has always been the first to respond to his country's call, and our college has evinced its desire to maintain this ancient attribute.

The maintenance of the ideals and institutions of this nation is an ample justification for the sacrifice of war. For does not the existence of these ideals, and institutions—advance steps, as it were, in civilization—mean the further advance of humanity to the time when such evils as war will be relegated to the scrap heap of the world's progress?

Greek That part of the Rockefeller and Foundation whose business is Latin education has decided that Greek and Latin are moribunds in the modern educational curriculum fand has started in good earnest to give these tongues their death-blow.

And does it a Mark they call a wind instrument."

And does the classicist fear and trem-And does the classicist lear and tremble as he hears the rumbling which prophecys the fall of his temple. No, he does not. He distains to reply and the populace concludes that he cannot.

We, who are neither ultra-classicists nor ultra-modernists—if we may use the words as autonyms here, but have studied both Greek and Latin, must

Yorkville, 222 E. 79th Street,
St. George, 5 Central Avenue,
96th Street, 112 F. 96th Street.
The Brooklyn and Queens County
libraries have also entered the scheme
and it is hoped that in this way the
work of the students will be greatly
facilitated.

# Lectures to S.P.C.

PROFESSOR WOOLSTON'S SUB-

sential for the establishing of industrial democracy, are: ample opportunity for real personal competition; rewards graded according to ability; sufficient concentration of authority to permit of rigid discipline without conflicting with the preceding conditions; and the application of scientific methods which are constantly suppressed by the forces of monopoly.

"These conditions," Prof. Parmelee asserted, "will make possible the proper genuine form of industrial democracy."

## **EVENING SESSION**

DANCE ON MARCH 16th IN GYM.

LIMITED TO 300 COUPLES

At the last meeting of the Student Council the High Chancellor-in-Charge of the dance, Ben Minz; announced a program of ruthless warfare against all those who have not as yet bought tickets. The Council agreed that every one of the 300 tickets printed must be sold and various means have been suggested of the 300 tickets printed must be sold and various means have been suggested to make this a possibility. Though there seems to be no difficulty in disposing of that number of invitations the committee in charge of the dance is anxious to get rid of the tickets and collect the indemnity. From now on a group of submarines in disguise as student councillors will hover around the environment. submarines in disguise as student counciliors will hover around the entrances of the College and demand that all who enter within that zone show his colors. Green is the tavorite color with the committee. Those that refuse will be sunk immediately. In exchange for the green color (which as you may have sunk inmediately. In exchange for the green color (which as you may have arready guessed is a donar bin), the challenged party will receive a safe conduct to the Evening Session dance

reading thus:
Dance of the Evening Session

Of the College of the City of New York at
The Gymnasium

Friday evening, warcii sixteenth Nineteen hundred and seventeen

Subscription One Dollar Subscription One Dollar
This will not only give you the right to travel in safety within the sight of the committee, but will also admit you and your best girl (or vice-versa), to the dance on March 16. If you have classes that night you may stay away from them. Absences will not count against those who attend the dance.

against those who attend the dance. This anair promises to be the greatest social event in the history of the byening Session. The committee is working hard to procure the very best of everything. The band will consist of experts in terspsicnorean music and you will have ample chance to display your vernon casticism. The committee is aiso trying to get up a suitable souvenir which will make this evening a memorable occasion. It all depends now soon and how tast the money comes in. The and now last the money comes in. The arrangement of all details requires time and money. You are going to buy a ticket anyway. Buy it right now and help the connected with the dance.

Your councilior in your class room has tickets; buy yours today before approaches you.

### Dime Day

This week the Student Council held Dime Day for this term. Ten cents a term makes you a member of the Student body, and entitles you to vote. Your councillor has tickets. A com-plete report of Dime Day will be given

next week in The CAMPUS.

BASEBALL PRACTICE TO START IN THREE WEEKS—DEER-ING TO COACH—HOPES BRIGHT

Johnny Schroeder, manager of the baseball team, holds out much hope for a very successful season. Last year's star twirler, Rosenberg and his batterymate Rank, are still with us, as are Tucker, Lowenthal and a few other yeterans. With them as a nucleus, it is expected that the coming season will is expected that the coming season will be one of the most successful in our

be one of the most succession in our history.

The A. A. has appropriated money for screens to place around the Stadium to that it will be necessary to pay to see the game. On this account the team is expected to prove a source of increment instead of loss as has frequently been the case. In about three weeks, candidates will be called out, and our new coach, Joe Deering, who has our new coach, Joe Deering, who has turned out such a wonderful basketball team for us, expects about one hundred

SWIMMING SCHEDULE SLIGHTLY REVISED

The schedule of the swimming team

The schedule of the swimming team for the rest of the season has been revised as follows:
University of Pennsylvania, Feb. 23.
Columbia, March 3.
Amherst, March 10.
Rutgers, March 16.
Intercoilegiates, March 24.
All these events with the exception of the Amherst meet will take place on the road. Water-polo matches will be played at all these meets, that at the Amherst affair being a varsity-alumni contest.

Last Friday our natators took a rest but were practicing hard all week. Liebner, especially is striving hard to regain his old-time form, and is coming along scatty well but regular poloists who pretty well, but regular poloists who were out of the last contest because of illness will in all probability be seen in the line-up when we take on the University of Pennsylvania aggregation Friday.

## Manhattan Defeated By our Varsity Five

GAME PLAYED ON POOR COURT

— PRO HIGH SCORER —
FRESHIES LOSE CLOSE

GAME 25-23

In a barn, otherwise known as the De La Salle Institute, on Tuesday the 13th, the 'warsity basketball team drubbed the Manhattan College five, 28 to 14. The preliminary event went to the Manhattan Freshmen in an exciting extra period match by two points. When the smoke had lifted from the field of battle, the count was found to be 25-23, not in our yearlings' favor.

Pro, who has been coming strong of late, was our chief point gatherer. He netted enough, 16, to beat our opponents single-handed. In the first period he caged three pretty goals in such rapid succession as to amaze the spectators. In fact, in two shakes of a young sheep's tail, our little forward garnered 10 points.

The fierce and much-touted Houlihan The herce and much-touted Housinan brothers got in some of their deadly work, and occasionally stirred the game to action by their freak shots. Being inclined at a 2½ degree angle seemed to be their favorite mode of scoring. Generally speaking, these Houlihan individuals are a pretty good team. dividuals are a pretry good team.

The smallness of the size of the court

impeded our boys in their passing game, the art at which they excel. Ten men, however, plus a referee managed some way to get on the court at one time without stepping on each other's toes. As it was, our boys' superiority in this department manifested itself quite con-

Defense on a court like this was also

The freshmen might have won their tussle were it not for the poor eyesight (or shall we say, over-acute eyesight?) of the referee. Our lads seemed, however, to be the particular and sole objects of this official's scrutinizing gaze. After awhile conditions became such as to render breathing on the part of our freshies a particularly hazardous liberty, since a foul might be called as well as

since a foul might be called as well as not, pending the referee's whim.

Krinsky, who had showed up so well in the Harris game, couldn't get started in this in this encounter until near the end when he caged some nifty points when most needed. Bernstein and Beer played when he caged some nifty points when mest needed. Bernstein and Beer played stellar guard games while De Rose and Austin co-operated well. Coach Deering expects to put a crack first-year team in the field for the remaining games.

Credit for the successful work is due chiefly to Professor Holton, Mac and Mr. Williamson.

Although it is too late to start a hockey team in the field for the remaining games.

Credit for the successful work is due chiefly to Professor Holton, Mac and Mr. Williamson.

Although it is too late to start a hockey team the prospects for next year are exceedingly bright and hopeful.

## SPORTING COMMENT

TO BE OR NOT TO BE. That is the question which the Executive Board of the Athletic Association will decide. Shall we run a theatre party at which the whole college can attend?

Two things are to be considered here—desirability and practicability.

Desirability—do we desire it? Well, we don't desire it. We want it—we

need it.

A move like this would more than almost anything else tend to establish our prestige in the outer world. It acquaints others with the fact 30 little realized by some of us that such a thing as City College exists. We hear of Yale, Harvard, Princeton, all right. We know such institutions exist.

And why? Yale, Princeton, Harvard are kept in the lime-light and the public eye is upon them because they get publicity. And theatre parties is one way in which this is gotten.

public eye is upon them because they get publicity. And theatre parties is one way in which this is gotten.

Very recently both Yale and Harvard held such affairs. A theatre was bought out for the evening and the undergraduates and alumni flocked to the performance. And the next day the newspapers had long accounts of the unique event, how much of a crowd was there, how the audience enjoyed, how the boys columnered their kind though unsolicited aid during the performance, and generally of the good time had.

volunteered their kind though unsolicited aid during the performance, and generally of the good time had.

Now outside of this publicity another and more potent factor enters. It's he old time-and-again pumped-dry, rehashed question of spirit, which we won't

The old time-and-again pumped-dry, rehashed question of spirit, which we won't attempt to define.

Obstacles in the way of any stronger expression of such a sentiment there are many, strongest being the lack of opportunity for a general getting together of the student body. The Student Council realized this, and therefore has insame direction. It brings us together, and the feeling is manifested.

A theatre party is an excellent medium for this purpose.

And now the practicability of it. It requires an outlay and work. The treasury is not so much embarrassed that it could not afford to undertake this. But the student body—would they support this? Why not? Last year the been because chiefly of the forbidding price and unappealing character. This we hear the last of the project aims for a universal attendance, something within the reach of all.

We take great theasure in making known the Hygiene Department's and

We take great pleasure in making known the Hygiene Department's announcement to the effect that the last year has witnessed a change for the better in the general cleanliness and neatness of our surroundings—buildings, pool,

THE A. A. AUTHORITIES TOOK A STRONG HAND in the handball THE A. A. AUTHORITIES TOOK A STRONG HAND in the handball affair. Rather than be hopelessly beaten in any sport we had better not be represented, thought they. Not that being beaten was such a disgrace, but that the handball team, whatever there was supposed to be of one, had not practiced and that not enough interest had been displayed in the way of candidates' trying out

The re-installation of the sport is made with hope for a change for the

THE TRACK TEAM has been registered at last with the A. A. U. and now we can enter all meets held under that organization's auspices.

IN BROONES, CORCORAN, LEHRMAN AND SUMNER we have a reach freshman swimming relay. In all probability the team will be entered in the intercollegiates.

THE SICK MEN on our polo team will be seen in action again i riday, when we take on the University of Pennsylvania.

THE ICE-SKATING EXPERIMENT, it seems, has worked. The chief difficulty to have been overcome was that of flooding the field and having it time to the project, and now their efforts have been crowned with success. Next year it will not be unlikely that we shall have a seven cutting figures on the coagulated water out there in the stadium. on the coagulated water out there in the stadium.

OOH, LOOK!" burst out one of the fair ones at the Carlisle game. "I saw him," pointing to one of the aborigines, "standing in front of a cigar store on Amsterdam Avenue." Some were looking for a war dance at the conclu-

IF COACH DEERING had not taken out the regulars in the second half, there's no telling how many points Tich might have scored. We would have got away with eleven goals from the field.

THE CHEEDING WAS A TAXES.

THE CHEERING WAS RANK at the game Saturday. No life, no zest, which almost rendered the spectators unconscious. By dint of great labor and with the assistance of half a dozen self-appointed cheer leaders a squeak was

bia's attempt to flood South Field last year had proved disastrons. The ice has been used every day and evening, and there are now official instructors in attendance. Tickets can be obtained two for a quarter at the A. A. hooth two for a quarter at the A. A. booth in the concourse.

## A. A. Board Passes On Important Business

MEYER ELECTED TREASURER-OPEN MEETINGS TO BE TRIED—THEATRE PAR-TY ADVOCATED

The Executive Board of the A. A began proceedings with a vim this term, and in its first meeting passed several measures of much importance.

The treasurer of the athletic association was elected. Martin Meyer, of the ciass of 1919, was given the job with H. Pollock and F. Wille as runners-up for the position. George Lehrman, who will continue in the capacity of assistant-treasurer, declined the treasurership because of pressure of work.

Meyer made a motion to adopt the open meeting idea so frequently agitated in the past, and it was passed. The scheme will be given a two-week tryout, at the end of which period, the board will decide whether or not to retam the innovation. Any student interested will be admitted to meetings

It is contemplated to use for this purpose some such theatre as the Alhambra or other popular-priced institution.

Consideration of the matter was tabled, a committee consisting of president Mendelson and property-manager Behrman, the sponsor of the movement, having been appointed to investigate in the interim.

having been appointed to investigate in the interim.

It was decided to permit all men winning their letters on the basketball team to retain their sweaters at the end of the season, with the further provisor that no men shall get more than one sweater during his career on the team.

#### HANDBALL RE-ADOPTED AS A VARSITY SPORT

The handball difficulty has been adjusted. After a little tilt between the A. A. authorities and the handball advocates, the sport was once more adoption. as a 'varsity activity. The schedule as a 'varsity activity. The schedule as drawn up by Manager Bernard Spiegel, will continue in effect, and the twenty-five dollar appropriation originally voted will again be devoted to its original purpose.

inal purpose. Handball was introduced as an offiriandom was introduced as an om-cial sport near the end of last year, and an appropriation duly voted the team. The lack of interest in the acscheduled for last week, since the board would not countenance having us meet Fordham "without a team." At the meeting of the executive board of the A. A. Thursday the sport was once more taken up.

## CHEMISTRY LECTURE SERIES NOW BEGINS

MR. ROLAND SPEAKS ON MAKING OF PIPES IN DETAIL

The Department of Chemistry offers during the spring semester, 1917, the following lectures open to the public:
February 16—"From Ore to Finished Pipe." (Illustrated with motion pictures.) Mr. C. F. Roland, New York Representative, Metallurgical Dept., National Tube Co., Pittsburgh, Pa. This lecture, illustrated by moving pictures, was given in the Doremus Lecture Hall by Mr. Roland last Friday afternoon. The lecturer presented an explanation of the mining and treatment of the ore from the time it leaves the earth, until it is in the form of the finished product. it is in the form of the finished product. The lecture will hereafter be used ex-

the students of citemistry in the Gollege and will give to us a resume of some of his most interesting recent investigations, bearing upon the composition of many of the complex substances closely associated with the continuance and eproduction of life.

March 23—"The Conservation of Pine Forests through the Methods of Chemical Research." (Illustrated by Specimens and Stereopticon.) Dr. Chas. H. Herty, Past Pres., American Chemical Society; Editor, Journal Industrial and Engineering Chemistry, New York.

Dr. Herty, by his splendid work in the South, resuscitated the turpentine and rosin industry of the United States. He will tell how he accomplished this

and rosin industry of the United States. He will tell how he accomplished this by applying methods of strictly pure scientific research. Dr. Herty, who succeeded Prof. Baskerville, as Head of the Department of Chemistry, at the University of North Carolina, has recently resigned that position to come to New York to become editor of the Jagural of Industrial Chemistry of the American Chemical Society. Dr. Herty ited to three hundred.

has just retired as president of that

Dr. Mees is also

of mancial support. Dr. Mees is also a well-known original speaker.
April 13—"Colloids in Pharmacy."
(Illustrated and Experimental.) Dr. John Uri Lloyd, Manufacturer, Chief Chemist, Investigator and Novelist, Cincentific

cinemst, investigator and reoverse, cin-cinnati, Ohio.

Dr. John Uri Lloyd, of Cincinnati, has been for 40 years a manufacturer of the highest grade drugs that are made primarily from plants. In many The lecture will hereafter be used extensively for educational purposes, and was presented in that way at City College for the first time.

March 2—"New Method for Nitrogen Fixation." Experimental, showing utilization of home-made apparatus. Dr. J. E. Bucher, Professor of Chemistry, Brown University, Providence, R. I.

Professor Bucher's lecture, given before the Institute of Chemical Engineers at its recent meeting in New York City, is recognized as one of the most brilliant lectures that has ever been presented before chemists in this country, He will abridge this somewhat and adjust it for the students of the College. The topic is on the Fixation of Nitrogen, one of the most important problems confronting all countries at the present time, as nitrogen is one of the essential, and is the most expensive of all chemical elements needed in agriculture. It also constitutes the basis of practically all modernized high explosives and its compounds. A number of methods have been worked out to utilize the abundant nitrogen of the air and the process described by Prof. Bucher is an absolutely new one, which has been worked out by Americans, Prof.

methods have been worked out to utilize the abundant nitrogen of the air and the process described by Prof. Bucher is an absolutely new one, which has been worked out by Americans, Prof. Bucher being the discoverer and inventor of practically all the processes involved in this American method.

March 16—"Chemical Structure and the Biological Function of Tissue Elements." Dr. P. A. Levene, Chief Chemist, Rockefeller Institute, New York.

City. at present on an important mission in the tropics, and will speak to the students on the subject, "Some Chemistry of the Tropics." (Illustrated from recent observation), bringing with him fresh observations in addition to his labeled resemblations and some new circular transfer of the state City.

Dr. Levene is an old favorite with fresh observations in addition to me the students of elemistry in the Gollege older recollections and some new pictures.

tures.
All these lectures are given in the Doremus Lecture Theatre at 3:00 P. M.

### Theological Students Visit Gym.

The Social Hygiene exhibit which was on view in the Gymnasium last week was visited by a delegation of students from Colgate Theological Seminary last Friday. The exhibit will be taken throughout the city and state and put on public view until June.

# **New Policy for Teachers**

Here is a policy which came to me only a few days ago and I want the Instructional Staff of the College to know about it. Only one company issues it and there is nothing on the market to equal it. It is sold only to select and preferred risks and is not in the hands of agents generally. Read the following with care and "get" it.

\$10,000 Payable at death for any cause at any time.

Premiums cease at age 60. If total and permanent disability occurs because of accident or illness before age 60, no further premiums required, AND the Company will pay you \$100 per month for life, AND \$10,000 at death.

\$100.00 Monthly in case of accident or illness, paid as long as total discontinues. COMPANY CANNOT CANCEL THE POLICY. continues. COMPANY CANNOT CANCEL THE POLICY. You might have 1 or 40 claims for accident or illness before you reach the age of 60. As we grow older we approach the time of disability and breaking up. This protects you always. Take a moment to look ahead and think of what MIGHT happen or be your physical or mental condition at 45, 50, 55 or 60. YOU ARE COVERED.

\$100.00 Monthly FOR LIFE after reaching the age of 60—and \$10,000 at death.

This is "LIFE" insurance-not death insurance.

One can afford to "spend as you go" with such a policy. If you don't "save" anything, this policy takes care of you in old age and your family if you die, "WHY DO MEN OVER 40 BREAK DOWN?" See essay in Scientific American, July 17, 1915. It's worth reading.

ARE YOU INTERESTED?

If so, kindly state date of birth, and drop in mail box.
