"It must certainly be true, for example, that the methods of teaching the pressures for results brought to bear upon students, and the critical testing of achievements will have to be extremely different as between situations where true cultural interests are still the primary concrn of students and those in which purposefully pre-professional motivations should be accepted as controlling."

Contrary to the opinion recently expressed by President Lowell of Harvard that undergraduates have Prof. Snedden believes there are a great many serious students who are

# COUNCIL TO DECIDE | ELEVEN CONCLUDES ON CLASS CHARTERS UNSUCCESSFUL YEAR

Manhattan Defeat Ends Most Disastrous Campaign Since Revival of Sport

When Lavender sports followers in council, which have been drawn up the future talk of the history of the bin of an ocean-sailing vessel. Prier particles of matter, will be the gridiron sport on St. Nicholas Heights, the results of the campaign which closed so ignominiously last Student Council at 3 p. m. today in Saturday, will be discussed in comparatively low accents. In fact, ex-Washington University and Rensselaer Polytechnic Institute, the 1929 season will probably receive only whispered mention.

Impressive in Practice

On September 18th Coach Hal Parker installed in its stadium quarters one of the most promising college grid squads, after two weeks of ntensive conditioning at the Bedford Hills Country Club. Captain Bernie Bienstock and his moleskin companions impressed Lavender touts and metropolitan experts as a most formidable aggregation for which there was predicted a brilliant season in the eight-game schedule that had been arranged by Prof. Walter B. Williamson and Manager Harvey Neidorf.

find that this story of two wins, two bly. ties, and four defeats is about the cordance with their own educational seeking access to our multiplying most disappointing since the pigskin

Rider College came to the Stadium getting away with a 6-6 deadlock. Lowell Tech followed the New Jersey outfit, and the college team showed some improvement in holding this press-agented aggregation to a scoreless tie.

Lose to Washington and Drexel Doc Parker for the following fortnight led his charges to two foreign excursions at Canton, N. Y. and Philadelphia. The St. Lawrence and Drexel teams were far from hospitable and the Lavender returned with 22-0 and 12-4 defeats to make a home no great desire for a sound education, stand for the remainder of the sea-

fects the production requires.

The action in "Where the Cross is Made" occurs in a room in Cap- will discuss the different divisions of tain Bartlett's house which the Captain has altered to resemble the ca- detail. "The Microcosmos," marily, the play brings two charac-subject next Wednesday. ters strikingly to the fore, the demented Captain Bartlett and his will be taken by John Karpeles, and Jerome Samuels, Kenneth Knowles, and Harvey Rosensweig will play the three seamen. For the sole female part, that of Sue Bartlett, Mr. Polinger intends procuring the services of one of the co-eds attending the night session.

After much deliberation Mr. Polinger has selected the O'Neill play Peter Schmuck, and Prof. Paul Sauras the most appropriate production for the Dramatic Society.

Since "Where the Cross is Made" is a one-act play, it was decided to present another short production, preferably a comedy, to provide a full evening's entertainment. With the large turn-out for the Dramatic Society, Mr. Polinger expects little But tracing the records back we difficulty in filling all the roles capa-

team and its coaches will be tend-Rider College came to the Stadium team and its coacnes will be tend-to open the Lavender season and the ered by the Athletic Association on ary line between classes is at times Friday, December 20, in the gymna-sium. The dance wil also be in the nature of a celebration in preparation for the game with Dartmouth which is to be played on the following evening at the 22nd Regiment Armory.

Memmbers of the basketball team, who are to be guests of honor, their coaches, Nat Holman and Mac Hodesblatt, the varsity eleven, Doc Parker, representatives of other teams, and the officers of the A. A. will be invited.

Tickets for the general student body, priced at \$1.50 per couple, will be placed on sale in the Concourse and alcoves within a few days. The Toe Teazers, a seven-piece orchestra, will provide the music for the dance.

# OPENS TALKS ON KINDS OF THINGS

Seventeen Material Systems From Corpuscles to the Universe in Speaker's Classification

MANY NOTABLES PRESENT

Commerce Center Auditorium Used for the First Time for a College Exercise

Professor Harlow Shapley, director of the Harvard Observatory, inaugurated a series of five lectures on

cussion "On the Kinds of Things" before a crowded Commerce Center Auditorium Wednesday night. In the series, which is called "Flights from Chaos." Professori Shapley at-

Dr. H. Shapley. tempts to classify all material systems from atoms to galaxies. The first lecture was a brief summary on the kinds of matter. In succeeding talks Prof. Shapley material systems in more complete

Dr. Robinson Introduces Speaker The lecture Wednesday night was son, Nat. For the portrayal of the first college exercise ever to be these, Joseph Frascona has been held in the new auditorium and it cept here and there, specifically the given Nat Bartlett while Julian was filled for the occasion. Professor victories chalked up against George Dundes has been selected for the Robinson introduced the speaker to Captain. The part of Dr. Higgins an audience which included Dr. Fred H. Comstock '72; Professors C. J. Kayser, Edward Kasner, and N. Benjamin Fite, of Columbia University; Harry Elmer Barnes, Dr. John H. Finley of the New York Times, Judge Charles McDermott, Chancellor Lord of the University of the State of New York, W. J. W. Osterhout of the Rockefeller Institute, Justice el of the College.

"As soon as you divide things into classes you can begin to study and understand them," declared Professor Shapley at the start of his lecture, and with the aid of slides and intricately devised pieces of apparatus he then classified and explained all the different forms of matter known at present.

Mass Is Basis of Classification The basis of Professor Shapley's system of classification is mass, and chairman of the meeting of the Poli- aims is the central idea in a plan professional schools. And that ties Club, sponsors of the talk, in- proposed by Professor David Snedden charge," according to Prof. Snedden, olas Heights by such enterprising athletic pioneers as Mac Lieb. #### COLLEGE STUDENT: TAKE YOUR CHOICE

FROM Columbia comes a proposed remedy for the "very bad state of health" of the American liberal college. A division of colleges into three types—one for the "breadand-butter" or pre-professional student another designed for the coonskin-coated youth who prefers hip-flask and football game to text-book and library, and a third life is but "a minor crustal phenomenon at the surface of the planet. But it has such plan suggested by Professor David Snedden glorious galactic accompaniment that it is as of Teachers College. This ray of hope, intended to penetrate the gloom of collegiate decadence, paints over-standardization as the major evil.

With Prof. Snedden's stand-explained more fully elsewhere in today's issue that our present collegiate system gives rise to a good deal of mediocrity, we have no bone to pick. But the assertion that his proposition is a "remedy" seems at best most du-bious. When Prof. Snedden declares that there are these three types of students in attendance at our institutions of higher learning, he provokes no lurking doubt. When he says that the difficulty under which our colleges are laboring arises from the fact educational processes of the modern Unithat they are trying with little success to offer "composite programs of studies which are neither good fish of pre-professional training nor fowl of genuine cultural education", he arouses no dissenting voice. But turing enterprise, which, let us say, is enwhen he offers his so-called remedy of elective segregation, we must call a halt for further examination.

For it appears that the success of the professor's Utopian notion rests upon an assumption which, at least, must not go unchallenged. And this assumption is, quite simply, that the student, at the time of his graduation from preparatory school, knows what kind of life he is going to lead during his subsequent years at college. Regardless of the relative merits of students as prophets, there is little correlation between the type of life by any given student during his prep years and the type of life led by the same student during his collegiate career. Prep school, because of the brevity of his stay there and because of the mental changes commonly undergone during the years of adolescence, leaves the normal student in a highly uncertain state of mind, and under such circumstances it is hardly fair to expect him to know what he wants.

The present form of collegiate curriculum though we do not set up to defend its avow ed deficiencies, attempts to cope with this situation in the most practical and economical way. It offers to the student, during the most important, formative years of his life, a taste of cultural education, a taste of extra-curricular activity—which, though per-haps "over-emphasized", admittedly serves an important purpose-, and, lest too much valuable time be squandered in indecision, offers the student, in his latter years, the opportunity to begin intensive 'bread-andbutter" training. It is a parent fact that most Smalbach '31, Samuel Gise '32, Richard students shape their collegiate lives only Greenblatt '33, Bernard Harkavy '33, Louis after and with the aid of these preliminary Konowitz '33, and Sidney Paris '33.

tastes. Though the system does not fit each type of student perfectly, it is a praise-worthy attempt to fit all of them adequately, and until a better solution than Professor Snedden's is presented, it will continue to hold sway.

#### THE MICROCOSM

THE 1930 Microcosm has gotten off to a flying start. With splendid support from the Senior class and a wide-awake business and editorial staff, the next edition of the annual bids fair to break away from the bugaboos of mismanagement and consequent delayed issues which have haunted Micro-

cosms of previous years.

The goal of the staff is the appearance of the finished product in May in order to add to the last few joys of Commencement. To this end, the ground work for the entire book was laid during the summer. To this end also, payments have been exacted in what to many seniors must have seemed premature fashion. But when these self-same seniors realize that the purpose of this early payment is to facilitate the appearance of their Microcosm before Commencement, surely they should be only too eager to give their cooperation towards achieving this common goal.

It is superflous to repeat what the Microcosm means or should mean to the average senior. Whether he has or has not participated in extra-curricular activities he must value any permanent remembrance of his undergraduate years. The yearbook is certainly the most colorful and vivid memento he can acquire. Upon those seniors who have not as yet made their initial payments we urge the above considerations.

#### "FROM ELECTRONS TO GALAXIES"

OUR interest in the infinite and dimly explored is great. When man unfolds his knowledge of the material heavens the spectacle takes on much of the dramatic. It is not so much the actual information as the contemplation of life that the story of the stars give us.

Professor Shapley has said that human if every individual were escorted by an Angelic host." And if his human life has been millions of years in the making, man may justly marvel at his role in the eternal

### IN DEFENSE OF LEARNING

PRESIDENT ARTHUR G. RUTHVEN, who by the grace of Providence and divers other lesser satellites supplanted Dr. Clarence Cook Little at the University of Michigan, issued to the press last week a statement which in expanded form might amazingly well serve as a definition of the versity.

According to Dr. Ruthven, the position of the student in the modern university is that "of an employee in a large manufacgaged in making wheels. As long as this employee turns out good wheels, he is qualified for his job. But if he should come drunk to work one day, he would be dismissed.'

Dr. Ruthven in this compact paragraph presents an excellent view of the transition of the modern university from the institutions of the last century. Catching what has been variously called "the spirit of the Machine Age", the modern university takes unto itself an impenetrable phalanx of instructors, an intricate and devious system of curricular classification, and an administration staff fashioned after the style of Oliver Cromwell's invincible legions. It then proupon the precarious business of in stilling into the skulls of some five or ten thousands of students the cultural advance ment and mental enlargement which was the vision of Francis Bacon and John Henry Cardinal Newman.

And the situation is nothing short of deal. The process of education rolls along with the efficiency and scientific precision of calculating machine. Only when some stu dent wearies of producing one of President Ruthven's wheels, and turns his fancy to something else is there discord. And then as in the case of the drunken factory eraployee, that student must go.

#### BALLADE OF ADVICE

To Lower Seniors, Upper Juniors, and Others in the Process of Filling Out Elective Cards - By One for Whom Such Pleasant Duties Are Now Past.

Lectures are fair, and lectures are bum, And damned if ever there's much to choose, For take 'em even as bad as they come The worst of 'em give you some time for a snooze Or else your valuable time you can use In drawing of pictures or such sort of fun But there's one sort of learning the wise man eschews-It's the damned recitations I warn you to shun.

Now the drone of a prof. is a swell sort of hum, And most of us feel that we've nothing to lose, So to snappy orations or dull ones succumb, Whilst Morpheus smothers a bad case of blues. Of course, what I state here, ought not to be news, But it is - and I feel ere my writing is done I must honor the system which nurtures my muse-But the damned recitations I warn you to shun.

III

If ever you're feeling down-hearted and glum, And aching to go on a spree (I mean booze) You've spent your last cent, and your senses are numb There's one course the man-about-college pursues: He goes to a lecture and quietly woos The goddess of sleep (whom he always has won) Such is the system which makes me enthuse -But the damned recitations I warn you to shun.

Students, don't mess up your P's and Q's Remember the way that your programs should run: The call of the lectures you must not refuse, But the damned recitations I warn you to shun.

We have been asked to admit authorship of a joke about the measurement of virility, broadcast by Moe Richardson, under our name. We shall admit having begotten it at the same time as Moe admits having conceived it. Incomplete Exercise in Rhyming - Inspired by the One and Only Golden-Haired Moron — Which Exercise Might Have Been Continued Ad Nauseam -- but Was

> There one thing I'll swear Oh, maiden so fair, With the bright golden hair, The eyes sans compare, The sweet smile so rare -Dare I say it? I dare. You just answer my prayer.

I'd like you to know That wherever I go, (And it's so, oh, it's so) I'll feel full of wor Till in some way you show You no longer say "No," To my being your beau.

Oh, the matter's quite clear Since you know I'm sincere There's but one course to steer And there's nothing to fear After all, love's not Come, I must have you near Won'i you love me, my dear?

Further Inspiration from the Same Source, also Incomplete, and Consisting Merely of Two Lines to Serve as a Refrain for a Popular Song, said song as yet Not fraternity and boarding house table

There's nothing can please her, like having me squeeze

That Golden-Haired Moron of mine.

This love business (apropos of nothing, of course) comes in for quite a bit of attention, and Philo. 2 entered into the discussion with great gusto, yesterday. All we carried away from Room 307, however, was that though there is doubt as to whether the Love Urge is or is not innate, there is no doubt that it is not inert.

Telegram.

MISS CHARLOTTE TUTTLE, of the United States Attorney, is certainly a freshing young personality in a time when interest, not to say enthusiasm, for social ideas among college students is at so low an ebb.

Miss Tuttle spent last summer working and living as a factory worker in Chicago and she belongs to the Socialist Club in Vassar. She is a sincere little rebel who has discovered that life could be much finer if there were not so much misery, and she has had the courage to give expression to her idealistic views.

It was but a skimpy little meeting which she addressed in a Y. W. C. A. on Thursday night in behalf of the Ladies' Garment Workers Union, which is trying to organize girls and other employes of Fifth Avenue dressmaking establishments, but she was able somehow, by her prominence as the daughter of her father and by her own fine idealistic daring, to light anew the torch of liberty which the police had snuffed out in the outrageous arrest of girl picketers.

The country is in need just now Miss Tuttle's. And it may be that with the stock market crash, the of idealism and courage like this of pendulum may be swinging back a little from the inexorable post-war naterialism toward the social ideal ism which was gaining headway so well during Woodrow Wilson's first years in the White House.

It would be a fine thing if economics and sociology should again become the spontaneous subjects of conversation as in the pre-war days. Miss Tuttle is a fine, fresh spirit on the horizon. May there be many more like her.

VII. Man and his Relationships — Ralph J. Kamenoff.

VIII Organic Evolution—George G. Scott.

IX Variation and Heredity — Henry Herbert Johnson.

X. The Future of Man — Axel Leonard Melander.

### HEARS BENSON LECTURE ON FALSE ADVERTISING

"Advertising will not come fully nto its own until we rid it of sweeppaid testimonial," declared John spaces." Benson, President of the American Association of Advertising Agencies in a lecture delivered last night before the Business Policy Forum of the School of Business of the Col-

He charged further that these practices have created a feeling of disrespect and impaired the force of advertising. He expressed the hope that in the future they will be corrected and advertising will again come into its own as a reliable buying guide.

After a slow start due to inadequate facilities, the Frosh and Soph classes of the Commerce Center, have scheduled a variety of affairs to take place in the near future.

The Soph Strut, with tackets selling at a dollar per couple, will be held tomorrow night in the Commerce gym. Preparations for a class smoker will be completed after the strut has been run off.

An excellent meal, a class key, and soph-baiting are offered by the Frosh-Feed Committee for the afmonth's time.

Comfor the College's Science Survey ets, unlike meteors and shooting stars, have regular orbits which they complete every three or four years. Expounds Satellitic Systems

One degree larger than the meteoritic associations on Professor Shapley's scale come the satellitic systems. These consist of associations of satellites centered about fairly Marian Nixon. large bodies, such as our earth, and cess of evolution that began in the infinite nast" peaks the prefer the first is the earth-moon type, in which the dimensions of the central formance in "Weary River" body and the satellite are alike, or nearly so. Secondly comes the Jovian type, of which Jupiter is a good example. In this class the central bodies are surrounded by two or more small, but distinct, satellites. Thirdly comes the Saturnian type.

At the extreme lower end of the scale of sizes are the corpuscles, the smallest bodies of matter known to man. The three kinds of corpuscles are protons, or positive electrical charges; electrons, or negative electrical charges; and quanta, or minute units of radiated energy. Nothing smaller than the quanta has as yet been discovered, nor, to jump to the other end of the scale, have we yet determined the presence of anything larger than the universe.

At both ends of his system, therefore, Professor Shapley leaves blank spaces in justification of which he explains, "In twenty or thirty years despite current dogma which says that the limit of knowledge has been reached, science will have advanced ing claims, unfair inferences, and the far enough to fill in these blank

# "Under the Goal Posts"

By EDWIN B. DOOLEY

Recent All-American Quarterback from Dartmouth

INDER the Goal Posts" is Eddie Dooley's new daily football column in The Sun.

A recent All-American quarterback, and one of the greatest forward passers and triple threat men the game has ever known, Dooley naturally understands and writes about the game as few men can.

In this chatty column he tells about the various college elevens with the easy familiarity of an expert ... analyzes their strength and weakness, studies and compares their individual tactics, matches their possibilities, and gives accurate close-ups of their coaches and players. \*

For advance news and comment on college football, read "Under the Goal Posts" every day in

Pop Warner is a great ceach, but his predictions usually go astray. He told the writer that Army would win last season in the game with Stanford, but the Palo game with Stanford, but the Palo Alto eleven crushed the Army machine to powder. This year Pop claimed that the Cardinals look.d invincible to him. He said he never had a better team, and implied that Stanford would go implied that Stanford would ke through the scason without a de-feat. Southern California, also boasting one of the greatest teams it has had in years, managed to win over the Warner-coached out-

This paragraph, from a recem the entertaining, gossipy style of Dooley's writing in his daily football column, "Under the Goal Posts."

Schneer and Weiner Outstanding

The Jayvees, however, developed in Harry Schneer perhaps the outstanding find of the year. Schneer, who was promoted to the Varsity squad after the third game, weakned the Jayvee atack to a great extent. Another player who stood out consistenly throughout the year was "Mush" Weiner, captain and center, who ought to make valuable varsity material next year.

Dreiband was faced at the beginning of the year with the task of moulding an eleven out of mostly inexperienced material, and with less than two weeks of practice behind it, the eleven dropped its first game, 33-0, to the powerful Mt. Vernon High eleven.
