Young Liberals Leave College After 8 Years

The Young Liberals, a College organization since 1948, has gone out of existence. It is the second political club to disband within the past week.

"If it weren't for the membership requirement, the club would probably have stayed on campus," a former member declared.

The Young Progressives of America dissolved last Tuesday because they were unable to submit the required twelve names.

Formed around the campaign for Harry S. Truman, the Liberals achieved peak membership—over 100—in 1951, during their party's successful drive to elect Rudolph W. W. City Council President.

The club's biggest campaign was to maintain the five cent subway fare for college students in 1949 when the fare was raised to ten cents. It distributed petitions against the increased fare, lobbied at the Board of Estimate, and held meetings and rallies on the campus.

Speakers at the College, including Senator Herbert H. Lehman, Joseph P. Kamp, and Franklin Roosevelt Jr. were sponsored by the club. It also carried on a petition drive for the 18 year old vote.

Last semester, with four other political clubs, the Young Liberals went off campus to protest compulsory membership lists.

Explaining the declining membership, the former member said, "The Liberal Party has lost much of its appeal for young people by echoing the Democratic Party."

Off to Ithaca

Photo by Kosner

Eli Sadownick '58, Campus editor-in-chief, flew up to Ithaca this morning for a press conference of college editors with Vice-President Richard M. Nixon. The conference will be nationally televised from the Cornell University campus over the CBS network at 9 this evening.

Sadownick was chosen in an informal drawing to represent four of the College's five undergraduate newspapers. The publications participating in the drawing were Observator Post, Main Events, Ticker, of the Baruch Center, and The Campus.

Librarian Unsurprised by Evaluation

College officials feel that the new Morris Raphael Cohen library, now under construction on the South Campus, will alleviate some of the conditions criticized by the evaluating committee.

By Barbara Rich

The majority of adverse comments made by the Middle States Evaluation Committee concerning the College's library did not surprise the head librarian.

Mr. Jerome Wilcox (Librarian) noted that the "Association has brought to the attention of the faculty and the student body problems that have concerned the library for many years."

The report stated that the space allotted to library facilities is very inadequate and poorly situated. Mr. Wilcox felt that this was not true in the case of several of the specialized libraries.

"It is true," he said, "that years of inadequate physical facilities of the library have handicapped the faculty in the use of its resources. Where physical facilities have been favorable, such as in the technology, education and music library, this has not been the case."

Students 'Resourceful'

Mr. Wilcox also noted that the situation would be worse if the students were not "so resourceful." Had the students at the college "been less resourceful and less eager to learn," he commented, "the situation outlined in the report would have had a harmful effect on their education."

The Committee, in its report, also made reference to the faculty's limited conception of the place of a library in the educational scene.

Faculty Plays Big Role

Mr. Wilcox said however, that the faculty has played an important part in the development of the library.

"It is hoped that in the new building they will utilize the resources of the book collection and the bibliographic knowledge of the staff to its fullest extent," he concluded.

Dean Morton A. Gottschall (Liberal Arts) said the whole report, as well as those comments made about the library, deserves consideration and study.

Moreover, Dean Gottschall has spoken to the department heads, and has suggested that each department meet with library members.

The meetings are to initiate ways and means of effecting closer contact between the departments and the library.

"The students at the College have at their command the facilities of the New York Public libraries. Whereas in a small town the only library available to students is their own," he commented.

Many Books in Storage

"It must be realized that a good many of our books are in storage and cannot be utilized. We all hope that this will be remedied within another year," he concluded.

The Evaluation Committee also stated in its report that the completion of the Morris Raphael Cohen Library, which is still in the process of construction, will correct the evils that are now present. They feel that the present situation is so bad that something should be done to "temporarily" alleviate the problem.

Miss Venus Will Be Crowned At Cabaret Night, November 3

Cabaret Night will see the emergence of a new star at the College: Miss Venus.

The crowning will take place Saturday evening, November 3, when the '59 Class Council will inaugurate a trend by sponsoring the first major social function to be held in the Finley Center Grand Ballroom.

Contestants for the title will be judged on the basis of facial features, poise, personality and general appearance. All coeds wishing to display their charms at the affair may do so by obtaining application blanks now in 337 Finley.

Judges for the contest will consist of members of the faculty and Violet Pollack '58, College Carnival Queen. The winner of the Miss Venus competition will automatically be sponsored by the '59 Class Council in the Carnival Queen contest to be held next May.

Candlelight and the romantic music of Marv Adler and his Society Orchestra will set the background for Cabaret Night festivities. Heading the list of entertainment will be a dance contest and a floor show. Arthur Genen, sophomore presi-

GFCSA Meeting Results In No Decision on Lists; Must Report Next Week

The General Faculty Committee on Student Activities was unable to reach a decision yesterday on the question of compulsory membership lists at the College.

Liaison Among Local Colleges Being Planned

Closer liaison between the city's public and private colleges is being planned.

Representatives of the colleges in the city, with a combined enrollment in excess of 170,000, met at Columbia University October 5 to map plans for a co-ordinated educational program.

A co-ordinating committee headed by Dr. George N. Shuster, president of Hunter College, has been established to put the project into operation.

Cost of the program—the exact amount needed is not yet known—will be underwritten for the first year by the Municipal government. Deputy Mayor John J. Theobald stated.

A major function of the co-ordinating committee will be to establish a clearing-house to help in the exchange of information relating to educational problems in the city. It will also help coordinate research projects among the colleges, and aid in the development of cooperative use of faculty members.

At present, some of the colleges make use to a limited extent of the co-operative exchange of teachers. The new program would expand and coordinate this program.

After meeting behind closed doors for over three hours, the committee members refused to disclose what had taken place during the session.

GFCSA is scheduled to report to the General Faculty next Wednesday on the lists issue. Prof. Michael Krause (History), chairman of the committee said that the nine-man group would hold another meeting, "or the equivalent of a meeting" before making its report next week.

Removed Safeguards in May

Last May, GFCSA voted 5 to 4 to eliminate all safeguards from membership lists. The General Faculty, which has final authority at the College, then sent the entire question back to GFCSA for reconsideration.

In a letter to Dean Daniel F. Brophy, chairman of the Department of Student Life and a member of GFCSA, Howard Schumann, '58, Student Government vice-president, had urged that the dean disqualify himself from voting on the issue because his department had openly advocated lists. Professor Krause said, however, that no votes were taken at yesterday's meeting.

Might Settle Issue on Phone

Explaining what he meant by "equivalent of a meeting," Professor Krause indicated that "if it is possible to settle the issue over the telephone, we will do it that way."

GFCSA is the most important committee of the General Faculty. It determines general policy between meetings of the faculty body, however all its decisions are subject to review by the parent organization.

The membership list issue will be aired for the last time at next week's hearing before the General Faculty.

In recent weeks, organizations, including the American Civil Liberties Union, the New York Chapter of Americans for Democratic Action and the New York region of National Student Association have come out against compulsory lists.

Fulbright Award

Applications for Fulbright and other foreign study scholarships are now available in 119 Shepard, according to Prof. William E. Colford, the College's Fulbright and Foreign Study Adviser.

Applicants must be United States citizens, in good health, and must receive their baccalaureate degree by August 1957. They must also have an excellent academic record, a good knowledge of the language of the country involved, and an acceptable project for study abroad.

Faculty members may apply for the scholarships by applying directly to the Conference Board of Associated Research Councils, 2101 Constitution Avenue, Washington 25, D.C.

Violet Pollack, last year's Carnival Queen, will be one of the judges of the Miss Venus contest.

dent and originator of Cabaret Night, emphasized that "the social is open to all students at the College." He added that "those wishing to obtain favorable locations should make reservations early."

Busy Profs Take No Rest; Print Books Over Summer

While students at the College were trying to forget the rigors of last semester's finals, two professors were busy publishing books:

Profs. Marvin Magalaner (English) and Aaron Noland (History) both published books that hit the stands during the summer hiatus. "Joyce: The Man, The Work, The Reputation," Professor Magalaner's book, deals with the history of James Joyce's reputation and analyzes all of the writer's works. The analysis of the controversial author also includes the effect of his environment on his work. The book was written by the professor in collaboration with another author.

To Edit Book

Professor Magalaner has been asked by the James Joyce Society to edit a book to appear in February. The manuscript will include a collection of various articles written about Joyce.

In addition, the professor is beginning work on another book dealing with the early works of the controversial author.

The professor maintains that "People who read Joyce are either violently annoyed or violently excited by him, but they are not neutral."

Beginning with the aftermath of the Paris Commune, Professor Noland's book examines in detail the modern history of the Socialist Party in France.

Socialist Views Outlined

The book, "The Founding of the French Socialist Party," covers the years from 1893 to 1905. In it, the professor identifies the various forerunners of the Socialist party and outlines their views. He then traces the forces that brought them together.

Many of the issues that separate the French Communist and Socialist parties from one another today, originated in the period dealt with in the book.

Printed by the Harvard University Press, the book is a Harvard

Prof. Marvin Magalaner has been asked to edit a book on the Irish novelist James Joyce.

Historical Monograph. According to the professor, "These monographs are intended for a limited group and usually do not enjoy wide circulation."

Of Prime Importance

Professor Noland chose this particular topic because he felt it was of prime importance in the development of France and the world. "It was," he said, "one of the most important developments in the world."

To write this book, the professor took three trips to Europe. He has been collecting material since 1948, when he began graduate work on the subject.

When asked about the students abroad as compared to those at the College, the professor replied, "They are not as well rounded, but perhaps they are more dedicated."

Professor Noland is beginning work on another book that should be on the market in two years.

—Rich

Sociology Projects Satisfy Work-Shirking Student Body

Sessions at Clinics Shed Light On Child-Care

By Alice Nadel

To most students at the College, the term "Sociology Project" means just one thing: an "escape" from a term paper. These projects are usually undertaken by Sociology 5 students as an alternative to the dreaded paper but, as Rosalie DeMaiois '59, phrased it, "While working on a project you find out more about yourself than anything else."

Under the auspices of the College's division of Criminology and Social Problems, the projects include work with both physically and emotionally handicapped children, as well as with the delinquent and underprivileged.

Spend a Few Hours Each Week

Students undertaking a project spend a few hours each week with these youngsters for an entire semester, but may continue their work after the term is over.

One of the projects involving emotionally handicapped children is known as the "Social Service Aide" program. It consists of a student accompanying a child to and from sessions at a clinic.

Since the student is with the child immediately preceding and following treatment, he serves as the sole liaison between the family and the clinic, and reports observations of the child's progress to a social worker.

Miss DeMaiois, who worked on this project last semester, found that she was accepted by the family as a friend, whereas a social worker would have been regarded in the same light as a doctor and, consequently, treated in a detached manner.

She evaluated the most important contribution an aide can make as that of "serving as an inspiration, setting an example for the child and giving him a sense of belonging."

'Self Realization'

In addition, she said that the experience can be one of "self-realization, for while you learn about the child by how he reacts to you, you also learn about yourself by how you react to the child."

A somewhat unique project involving the physically handicapped is the one connected with the Handicapped Children's Home Service, a non-profit organization dependent upon the services of community volunteers and college students.

Through this program, a student visits the home of a physically handicapped child and, through planned activities, teaches him to put his leisure time to creative use.

Shirley Pearl '59, who chose this project last term, maintained that its main value lay in "making the child feel he is not different from other children and encouraging him

Letters

CONFIRMATION

To the Editor:

Your editorial entitled, "One For Three" which appeared in the October 11 issue of the Campus merely confirmed the opinion I have always held of you.

Jared Jussim '56
Former SG President

Students participating in a Sociology 5 project observe a social worker interviewing a child. They are making their observations through a one-way glass partition.

to have contact with those of his own age.

One of the projects dealing with juvenile delinquents is carried out in conjunction with the Essex County Parental School. The latter is a detention home for youngsters who are awaiting Juvenile Court disposition.

The student's participation involves mainly group work, in which specialized activities are geared to the individual children.

Perhaps the most demanding, and consequently rewarding, project is the one concerning children afflicted with Cerebral Palsy. As a result of working in this program, the student learns directly about the problems of the handicapped, one of the most important of which is the integration into and acceptance by the community.

Although the student works in

conjunction with a case worker all times, it must be emphasized that the former, being unqualified never undertakes therapy himself during the course of any project.

Engineering Poll Finds 'Tact' a Must

A survey conducted by the College's placement office revealed "the ability to get along with others" necessary for success in engineering as in other fields.

The study polled two hundred thirty chemical engineers, graduates of the College's School of Technology during the ten-year period 1945-55.

The study showed that engineered human relations on a par with technical knowledge as a factor in promotions and salary increases.

The engineers were asked for information on academic and professional achievement, job distribution in civil service and private industry and engineering salary scales.

Enthusiasm, ability to supervise quantity of work production, ability to communicate with others in speech and writing and the ability to handle added responsibility were other factors listed in the study.

HP Dance

House Plan will sponsor a dance today at 3 in 350 Finley. All House Planners who would like to learn to dance or can teach dancing are welcome to attend. Refreshments will be served.

IT'S FOR REAL! by Chester Field

SECRET YEARNINGS!

Oh, why must I be civilized instead of being me?
 I'd like to be a beast and kiss each pretty gal I see
 I'd like to kick that brain next door,
 it's been my favorite dream
 And when I'm low I'd like to lie
 upon the floor and scream!

MORAL: When you want to let go, enjoy the real thing

Relax and enjoy a Chesterfield King!
 The King of them all for flavor that's real
 For deep satisfaction you honestly feel...
 Made to smoke smoother by Accu-Ray
 Beg... borrow... or buy 'em,
 but try 'em today!

Take your pleasure big... Smoke for real... smoke Chesterfield!

College Calendar

ASME-SAE-ASTE
Stork of the Drafting Department will speak about tools tomorrow at 12:30 in 017 Harris.

Astronomical Society
meet tomorrow in 124 Shepard at 12:30. Free passes to the Hayden Planetarium will be given to those joining at meeting.

ASCE
films entitled "Foundations and Cretes" and "Municipal Sewerage Treatment Process" will be shown tomorrow in 020 Harris.

Teriology Microbiology Society
meet tomorrow in 313 Shepard at 12:30. This meeting will feature a talk by Root on "Some Aspects of Cell Biology."

askerville Chemistry Society
have as its speaker Dr. Levitz of Medical School who will talk on thesis of C14 labelled Female "Sex ones" tomorrow 12:30 at Doremus.

Beaver Barbell Club
meet tomorrow at 12:30. All new and members must pay dues by or on Oct. 17.

Biological Review
will meet tomorrow at 12 in 316 Shepard.

Biological Society
Dr. Wehr will speak about Chemistry and Serology. This is a which is not only interesting, but currently in the news in reference to lung and cancer. Tomorrow at 12:30 in 316 Shepard.

Christian Association
meet tomorrow at 12:15 in 424 Finley. A film will be shown.

Class of '58
meet in 010 Finley tomorrow at 12:30. A vacancy on Student Council. All interested persons are welcome.

Class of '60
have an organizational meeting for Freshman Dance tomorrow in 428 Finley at 12. Everyone is invited. Positions on committees are available.

Debating Society
discuss discontinuing direct foreign aid. Come listen and join our debate. Preparations being for our intercollegiate trips. Tomorrow at 12:30 in 427 Finley.

Dramsoc
present Larry Lehman in various plays. Production committees for "Bell and Candle" will start to function. Interested in publicity, business and craft are urged to come to 327 Finley tomorrow at 12:30.

Education Society
meet tomorrow at 12:30 sharp in 010 Harris. Dr. Barron (Sociology) author of "Juvenile Delinquency and American Society" and Prof. Brothman (Sociology) Prof. Miller (Education) will speak on "New York School's Responsibility in Delinquency." An open forum will follow. All invited.

El Club Iberoamericano
give a dance. Everyone bring your favorite record, and prepare to be in the contest. Music, conversation, fun, and a social hour. Spanish is welcome. Tomorrow in 302 Downer at 12:15.

Hubert and Sullivan Society
and S. still needs males and females for production of "The Gondoliers." Cast of entire cast tomorrow from 2 and 6 to 9 in 3500 Finley. Tuesday and Wednesday rehearsals cancelled.

Government and Law Society
present Prof. Bertel M. Sparks, Chairman of the Committee on Admissions of U. Law School. He will speak on "School Admissions" in 115 Wagner tomorrow at 12:45.

Hiking Club
to our meeting at 12 tomorrow. Like this week-end is to the Schunemountains in the Hudson Highlands. One is welcome.

Varsity Christian Fellowship
have a Bible study at 12:30 tomorrow in 017 Harris.

Italian Club
meet tomorrow at 12:15 in 016 Harris.

Logic Society
present Prof. Tarter (Philosophy) speaker on "Pseudo-Nim Theme and Variations" at 12:30 in 224 Wagner.

Musical Comedy Society
organize and plan for the forthcoming term. Anyone interested in singing or stage work come to 320 Finley tomorrow at 12:15.

NAACP
hold a meeting tomorrow at 12:30 in 017 Harris. There a Negro "Pro-City College" will be the topic discussed. Everyone invited.

Philatelic Society
meet in 310 Finley 12:30 tomorrow.

Physical Education Society
present a film on gymnastics at 12:30 in 115 Harris.

Physics Clinic
presentments for the Physics Clinic will be at tomorrow's meeting of the Society at 12:30 in 105 Shepard. Those needing help should attend.

Physics Society
College's new subcritical reactor discussed before the Physics Society. Prof. Harry Soodak (Physics) at 12:30 in 105 Shepard. Check bulletin board near 6 Shepard for latest information. All are welcome. Important: members interested in the Brookhaven visit attend tomorrow's meeting.

Russo-American Society
meet in 321 Finley tomorrow at 12:30. All interested are invited.

TIC
hold a meeting tomorrow in 217 at 5:45. The subject will be the "Speaker's Club." Dr. Wayne A. Nicholson will be the guest speaker.

AS THOUSANDS LISP:

'Rain in Spain', Pain to Profs

By Carol Bloksberg

"The rain in Spain stays mainly in the plain," but a certain four members of the Speech Department couldn't be less concerned with the geological aspects of that statement.

Prof. Frank Davidson one of four speech instructors who give the oral exams.

Profs. Frank C. Davidson, Victor A. Fields, George E. Haefner, and R. C. Pennington, are the men who give oral English examinations to students majoring in Education at the College, and most often they are the men responsible for failing a large percentage of the candidates.

To be more precise, the number of students that pass this exam upon taking it for the first time is so small that it is now considered more of a diagnostic than a test. It is used as a criteria for correcting speech defects. However, just about everyone who wants to, does pass eventually.

Contrary to popular belief, those well-spoken gentlemen do not derive pleasure from failing avid prospec-

of a student as, "the professor with a dictionary for a heart."

The ten minute examination consists of an interview and a reading. The items stressed are: articulation, grammatical usage, voice projection, personality, manner, and dress. Chewing gum, smoking, and showing up for an interview in slacks tend to place "the fair lady" in an almost positive failing position.

It is true that for these men who have to listen to a series of grating and often unpleasant voices many hours a day, there is little humor to be derived from their profession. But occasionally an incident will occur that is designed to break the laugh resistance of the staunchest speech improvement advocate.

The average two legged creature pronounces the word biped as bi-ped. There are those however, who come across the word while reading a passage during their oral exam and come up with the brand new word bi-ped, pronounced like wiped.

Sticklers!

HERE'S A STICKLER!
WHAT IS A JAIL AT LIGHT-UP TIME?
(SEE PARAGRAPH BELOW)

IF YOU HAVE recently become a smoker (duffer puffer), ask any old-hand Lucky smoker (prudent student) why he settled on Luckies. Bet anything he says they taste better. You see, Luckies' fine, light, naturally good-tasting tobacco is TOASTED to taste even better... cleaner, fresher, smoother. So, when it's light-up time, light up a Lucky. You'll say it's the best-tasting cigarette you ever smoked. Okay—what is a jail at light-up time? Answer: Smoky Pokey. Isn't that criminal?

"IT'S TOASTED" to taste better!

DON'T JUST STAND THERE... STICKLE! MAKE \$25

Sticklers are simple riddles with two-word rhyming answers. Both words must have the same number of syllables. (No drawings, please!) We'll shell out \$25 for all we use—and for hundreds that never see print. So send stacks of 'em with your name, address, college and class to Happy-Joe-Lucky, Box 67A, Mount Vernon, N. Y.

LUCKIES TASTE BETTER CLEANER, FRESHER, SMOOTHER!

Crossfield, Harrier Co-captain Paces Team in Opening Wins

First for Lavender Against Knights, Hawks, B'klyn

Good athletes are seldom born—most acquire their skills only through constant practice. Randy Crossfield, co-captain of the College's cross country team is one such athlete.

Randy, an upper junior in the School of Technology, has been running crosscountry for just a year. Thus far this season he has led the harriers to victory in a triangular meet against Hunter and Queens and a dual meet against Brooklyn. Competing against the Kingsmen Saturday, Randy came in first with a clocking of 29:10.

Spotted After Workout

He joined the team last fall, when harrier coach Harry deGirolamo took notice of him after a Lacrosse workout. When the workout ended Dr. deGirolamo called Randy over to the side and asked him to come out for the cross country team. That's just what he did. And by consistent and determined practice he has become the number one man on this year's Beaver squad.

Born in Havana, Cuba, Randy came to this country at the age of

Randy Crossfield, co-captain of the cross country team is an engineering major.

six. He attended elementary school in Manhattan and then moved to Queens where he went to Junior High School 16.

Performed in School Band

At Brooklyn Technical High School Randy played football for a year and a half and also performed in the school band. He found his first two years of college work rough but now says it has become a little easier.

Upon graduation from college he hopes to go into aviation as a mechanical engineer. At the College Randy is a member of the Society

JHS Gym Teacher Encouraged Him In Athletics

for Automotive Engineers and the Varsity Club.

Determined Individual

Where it not for a gym teacher's advice in Junior High School Randy might not be competing for the Lavender today. The teacher encouraged Randy to go out for athletics and conditioning exercises. He followed this advice to the letter.

Today, Randy is one of the hardest workers on the cross country squad. He is extremely modest and is very well liked by his team mates. Most of all, Randy Crossfield is a very determined individual.

—Winner

Booters Ready For Traditional West-Point Tilt

An Army soccer team, seriously hurt by the loss of three top players, will meet the College's team on Wednesday October 24 at West Point. In the two previous meetings between the teams the Beavers have won one and lost one.

The Cadets opened the season losing to Ithaca by a 4-1 count and officials at the Point feel that the ineligibility of Bruce Turnbull and Wally Summers was directly responsible. In addition, captain Charlie Heinze resigned from the Academy last summer.

In their next two games the West Pointers defeated Panzer, 3-1, and Colgate, 4-1, indicating the team is not as weak as is supposed. Other Army opponents are Penn State and Brockport State Teachers, the two leading teams in the country.

Bob Puff, an inside right, and Tom Carpenter, center forward, appear to be the squad's mainstays. Both are up from the Junior Varsity while Rudy Letona at outside left is a yearling with little experience in American soccer. Letona is a native of Guatemala and is just adapting himself to a different type of play.

Novak Masonovich, Johnny Koutsantanou's replacement at center forward, has already scored nine goals this season and if he follows his predecessor's pattern he will be a thorn in the Cadets' side.

Aside from Masanovich only a few members of this season's team played at the Point before. Among these are co-captain Wolf Westl and Robert LeMestre, Fred Bonnet and Eli Root.

In the first game of the series in 1954, the Cadets successfully stopped Koutsantanou and Morris Hocherman by bunching in front of the goal-mouth. Last year however, the Lavender defense, aided by a driving rain and mud, was able to hold the Black Knights off after taking a 3-2 lead.

Sports In Brief

FENCING: The fencing team needs managers. Anyone interested in the job can see coach Edward Lucia in the fencing room in Lewisohn Stadium any day after 3.

VARSITY BASKETBALL: Coach Dave Polansky needs managers for the coming season. Anyone interested should see Tom Reilly in the AA office.

Cross Country Captains

Rick Hurford and Randy Crossfield have been elected captains of cross country team for the present season. Coach Harry deGirolamo made the announcement last week.

Crossfield has led the harriers in both of their meets so far this and has recorded times better than thirty minutes on each occasion.

Hurford was a standout performer on last year's team that finished third in the Collegiate Track Conference Championships. Both runs are in their third season of varsity competition.

Crossfield is an engineering student and Hurford is majoring in commercial art.

Take a 2-minute preview of your path to RCA engineering

Specialized training program

Earn a regular professional engineering salary as you work on carefully rotated assignments giving you a comprehensive view of RCA engineering. Your individual interests are considered and you have every chance for permanent assignment in the area you prefer. Your work gets careful review under RCA's advancement plan and you benefit from guidance of experienced engineers and interested management. Following training, you will enter development and design engineering in such fields as Radar, Airborne Electronics, Computers, Missile Electronics. For manufacturing engineers, there are positions in quality, material or production control, test equipment design, methods. You may also enter development, design or manufacture of electron tubes, semiconductor components or television.

Direct hire

If you are qualified by experience or advanced education, your interests may point to a direct assignment. The RCA management representative will be glad to help you. Many fields are open . . . from research, systems, design and development to manufacturing engineering . . . in aviation and missile electronics, as well as radar, electron tubes, computers, and many other challenging fields.

. . . and you advance

Small engineering groups mean recognition for initiative and ability, leading on to advancement that's professional as well as financial. RCA further helps your development through reimbursement for graduate study under a liberal tuition refund plan.

Now . . . for a longer look at RCA

See your placement director about an appointment with an RCA engineering management representative who will be on campus . . .

TODAY, OCTOBER 17th

Talk to your placement officer today . . . ask for literature about your RCA engineering future! If you are unable to see RCA's representative, send your resume to:

Mr. Robert Haklisch, Manager
College Relations, Dept. CR-000
Radio Corporation of America
Camden 2, New Jersey

RADIO CORPORATION of AMERICA

Sportlites

By Michael Cook

Don't worry, no one is going to attack your school spirit today. No one is going to ask you to go to ball games if you don't want to go. It doesn't matter if you have no interest in an integral part of your school's program. Don't adopt a defense. No one really cares.

The fellows who play ball would like to see you in the stands. They would like to know someone is pulling for them—someone who doesn't have to be at the meets and matches, someone like a reporter or a scout from another school. The boys will play even if you don't show up.

And the boys are going to enjoy playing before empty stands almost as much as they would enjoy playing if the stands were full.

The members of the various teams are members because they want to participate. They have pride in their school and if they can help that school by playing ball, fencing, or swimming, they are going to help and nothing will stand in their way. I can't say that they don't get personal satisfaction out of it because they must. If they didn't they wouldn't be playing.

If personal satisfaction didn't enter into the situation then all athletes would have to be classed as Frank Merriwells, all out for dear old alma mater and to hell with the individual. That's not the way it works, but there is something else to consider. And that is the satisfaction that can be gained by the spectator especially when he is rooting for his college's team.

Unfortunately there are too many people who don't care about athletics at this school. I'm not interested in those people. Chastising them doesn't do any good. Calling names is just a futile subterfuge indulged in by fed-up sports editors. I want to talk to the people who haven't been initiated to sports at the College.

These people are the lower classmen who are about to be caught up in the apathy of their elders. I don't care if they are apathetic, but I want these lower classmen to come to some soccer games, basketball games, swimming meets and track meets before they make up their minds. Come out and see your classmates in action; get caught up in the feeling that must pervade at every competitive event. Experience the shouting, the hoping, the yelling, the winning and the losing.

After you have done what I ask then you are free to choose between disinterest and interest. You may choose and you have my respect because you have made an attempt and whichever road you pick is yours with a hearty "bon voyage."

That's all I have to say today. The next time my face pops up on this page I hope I'll be off on a different tack. I hope that I'll be able to say that more people are coming out to see the College in competition with other schools on an athletic field. But all I can do is hope.
