Salk Shots

The second injection in the Salk polio vaccine series will be given next Monday. Individuals receiving the inoculations are expected to report to the medical office (Wingate) where they received the first injection.

For further information, students may refer to the instruction sheets distributed before the first inoculations.

Gallagher Calls Meeting Today With Mercury

Pres. Buell G. Gallagher has called a special meeting for this afternoon with the editors of Mercury to discuss the "future" of the magazine.

The meeting follows the Board of Higher Education's decision to allow Mercury the continued use of the College's name and seal.

Proposals Influence Decision

Declaring that the conference is at a normal procedure following action of the BHE, President Gallagher said he and the editors would discuss "where we're going from here."

The President, who was present at both meetings of the BHE Administrative Committee in which the Mercury case was considered, revealed that the four proposals made by Saul Sofer '57, editor-in-chief of the magazine greatly influenced the decision.

Backed by the Alumni Association, Student Council, and both campus newspapers, the proposals included the setting up of a new advisory board for Mercury and the establishment of a training program for staff candidates.

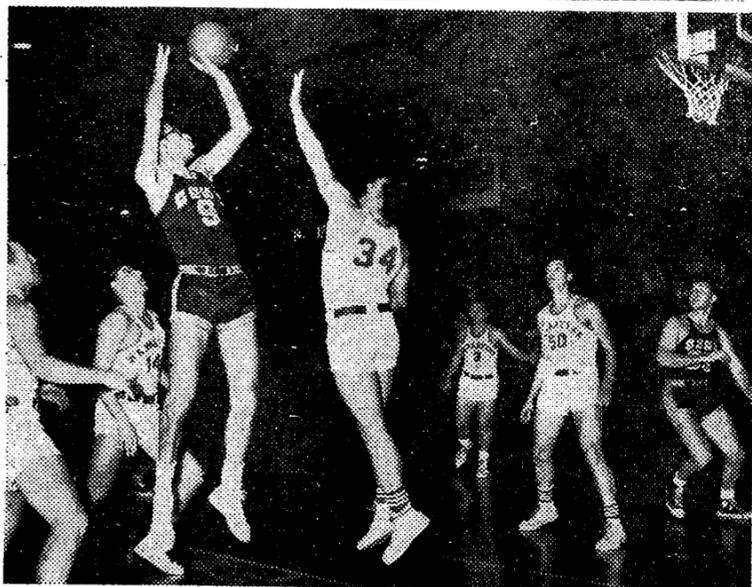

Alumni on New Board

The new advisory board will consist of three or four alumni of the College, nominated by the Alumni Board of Directors and approved by President Gallagher.

The President also revealed that he had personally urged the BHE Administrative Committee not to move the College's name and seal from Mercury as he has always

SFCSA May Deny 'CV' Facilities of Day Session

A member of the Student Faculty Committee on Student Activities sub-committee, which is investigating the legality of "Catholic Views" (CV), said Monday that the publication might be barred from using Day Session facilities for distribution.

Joel Resnick '57 explained that because of the constitutional separation of church and state, a religious publication cannot legally receive public funds.

"If it can be shown," he said, "that Catholic Views—which receives public funds in the form of Evening Session student fees—is a sectarian paper, we will be forced to recommend that it be prohibited from using College facilities during Day Session. This could include the use of distribution centers and bulletin boards."

"SFCSA has the responsibility of

protecting the name of the College," Resnick added.

Members of the sub-committee, who were appointed Friday evening by Dean James S. Peace (Student Life), SFCSA chairman, are Resnick and Prof. Herbert Taub (E.E.).

The sub-committee's investigation is separate from any studies which the Evening Session SFCSA or Student Faculty Fee Committee might

See Editorial on Page 2

make. Only if the ES Student Government grants student fees to CV will it be necessary for the Day Session committee to make a separate evaluation of the publication's legality.

Last semester, "Catholic Views" received about 280 dollars in student fees. In a column appearing in last Thursday's edition of *The Campus*, copy editor Fred Jerome asserted that the publication would apply for over five hundred dollars this term.

Last Friday, a representative of Catholic Views requested that copies of the bulletin's constitution be mimeographed with its name changed to "Collegiate Views."

By Bernie Lefkowitz

If there's a place in the scorer's book for moral victories, the College's basketball team earned more than passing mention last night. Although they lost to Manhattan, 72-68, at the Fordham gymnasium, no team fought harder than the Lavender.

Behind by ten points midway through the second half, the Beavers fought back to take the lead only to lose it again in the closing minutes.

The loss ended the Lavender win streak at six and was the Beavers

fourth loss against eleven wins.

The Manhattan attack in the first half was led by Angelo Lombardo. The 6-4 center tallied the majority of his goals on short jump shots from around the keyhole. Johnny O'Connor, however, was the man who may have been responsible for the Lavender loss even as early as the first half.

Levy Taken Out

It was the speedy guard's driving lay-up attempts that necessitated Syd Levy's coming out to try and stop him. With seven minutes to go in the half, Levy had accumulated three personal fouls and Coach Dave Polansky took his big center out of the game.

At this point Manhattan began pulling away and with only a few minutes left to go in the half, led by ten points. Polansky sent Levy back in and the center hit on a three point play to cut the Manhattan lead to seven as the half ended.

The five that finished the game for the Beavers seemed far removed from the team that started. And it was when two Lavender mainstays were on the bench at the conclusion of the contest that the overall balance and team effort were exhibited.

Rose Injures Leg

With ten minutes left to play, Levy, the Lavender high scorer with 17 points, fouled out. Two minutes later, and with the score tied at 56 all, Marv Rose pulled up lame and had to be removed from the game. Bill Lewis, his replacement, hit on two one-handers; and

DesGrey Cites League Plans As 'Premature'

By Ed Kosner

Proposals that the College join other local quintets in a Metropolitan Basketball League were termed premature yesterday by Dr. Arthur DesGrey, faculty manager of athletics.

The league was advocated most recently by New York University's Federation of Undergraduate Student Council, which donates a trophy to the winner of what is presently known as the "mythical met championship." NYU, Manhattan, St. John's, St. Francis, Fordham, Wagner and the College are among the teams which would participate in the proposed league.

Needs More Details

Although Dr. DesGrey said that a College representative—most probably the president of the Student Athletic Association—would attend a meeting on March 22 to discuss the possibility of forming a formal Met League, he indicated that further details would have to be determined before he could present the proposal to the Faculty Athletic Committee.

"Such important considerations as where League games would be played, how the gate receipts would be handled, and the possible necessity of dividing the conference into two divisions are among the factors that would have to be ascertained before we could give this league serious consideration," Dr. DesGrey said.

Groups Advance Plans

Plans to formalize the "Subway Championship" have been put forward by several groups within the last few years. Attempts to generate enthusiasm in local basketball, deflated severely by the scandals, are made periodically by basketball writers, coaches and undergraduate editors.

At present, the College competes in the Municipal League, playing six games each season against the other city colleges. The Municipal League games constitute one-third of the Lavender basketball schedule.

Chief Ireland Rabbi To Talk Tomorrow

The Chief Rabbi of Ireland, Dr. Immanuel Jakobovitz, will speak tomorrow in Hillel House on the topic, "The Sabbath Concept in Our Time."

Founder of Stratford College in Ireland, Rabbi Jakobovitz has travelled extensively throughout Europe and Israel, and has been honored by the Irish government for his active participation in international Jewish affairs.

Exemption System Changes Approved by Faculty Council

The Faculty Council voted last Thursday to revise the present system for exempting students from prescribed courses.

A number of modifications were produced to stimulate undergraduate participation in the exemption examinations program.

The most important revision concerned the rule whereby students exempted from a required subject are unable to substitute the credits as an elective.

Under the new plan, if a student earns a high score he will be allowed to receive credit for the prescribed course or take an elective in its place.

If a lower, but still satisfactory score is received, the student will be allowed to replace the mandatory subject with an elective.

The Faculty Council voted to hold

exemption examinations under special circumstances in February as well as September.

According to Assistant Dean, Sherburne Barber, (Liberal Arts) undergraduate enrollment in the exemption program has been small since its inception in 1955. So far, 189 students have applied for the tests. Only 31 qualified.

"This program," the dean said, "represents a fine opportunity for gifted College students to work at a higher level."

The School of Liberal Arts and Sciences offers exemptions in all prescribed courses. Students applying for the examination can obtain additional information in 111 Shepard beginning in March. A maximum of nine credits may be earned through implementation of this program.

The Facts on CV

On Friday, spokesmen for CV accused THE CAMPUS of distortions of fact in Fred Jerome's column, "Whose Views?" which appeared in Thursday's edition of this newspaper. Richard O'Malley, an editor of the publication when it was known as Catholic News, three years ago, and an influential staff member at present, denied in Observation Post:

- that all members of CV are required to join the Newman Club;
- that Father William J. Mulloy, advisor to the Newman Club, attends meetings of the CV staff and makes strong "suggestions" as to the content of material appearing in the publication. "Father Mulloy almost never attends CV meetings," O'Malley asserted;
- that CV had received at least one financial gift from the Newman Club. He admitted, however, that the Catholic organization had given 22 dollars to CV in December 1955, before it was chartered as an undergraduate newspaper of the College's Evening Session;

While we feel that the facts in this case should be investigated thoroughly by appropriate College authorities before CV's request for over five hundred dollars of student fee monies is granted, rather than merely debated in the College press, Mr. O'Malley's charges are now a matter of public record. We feel it our responsibility, therefore, to offer further evidence in substantiation of the material presented in Mr. Jerome's column.

We are confident that Mr. O'Malley, as a student at the College and a former editor, speaks in good faith, but:

- A member of THE CAMPUS staff, who joined CV two weeks ago, in order to obtain otherwise inaccessible information on the operation of the publication, was told by the self-same Mr. O'Malley, "I must insist that you all be members of the Newman Club." The remarks were addressed to the assembled staff of CV.
- At the same meeting, Father Mulloy read, and made editorial suggestions concerning at least three articles tentatively scheduled for publication in the next edition of the bulletin. Even should Mr. O'Malley's assertion that Father Mulloy "almost never" attends meetings of the publication be true, the mere presence of a member of the Roman Catholic clergy at even one meeting of a group that now so indignantly proclaims independence from its sectarian past seems less than appropriate. "Almost never," Mr. O'Malley? Well, hardly ever.
- Mr. O'Malley claims that he was misquoted by Observation Post, and admits that CV received financial aid from the Newman Club after the publication was appropriated student monies. Mr. O'Malley must have been misquoted for, as he should remember, CV's masthead in November 1955, carried the phrase "Supported by Student Fees" along with the statement, "Published by the Newman Club."

As if the above were not damaging enough to the pious independence of CV, we cite the preamble to the constitution of C(atholic V)iews) on file with the Evening Session Student Government. It reads:

We, the student members of the Newman Club, in order to make known catholic views on current topics on the campus of the City College, hereby establish "Catholic Views" as an undergraduate student newspaper.

Last Friday—one day after Mr. Jerome's column appeared—a representative of CV contacted the ES Student Government mimeograph division. He asked that copies of the CV constitution be prepared in which the publication's title would appear not as "Catholic Views," but rather as "Collegiate Views."

It was an interesting, if not altogether unexpected footnote to the increasingly curious CV story.

If CV is to continue to publish with student fees as an undergraduate newspaper of the College's Evening Session, it must actually sever all ties with its former patrons. Should the editors of CV refuse to demonstrate their legitimacy by consummating this action, their only alternative is to publish as an official organ of the Newman Club and to surrender their student fee subsidy.

Letters

LETTER TO MIKE RIZZO

To the Editor:

I realize and recognize your plight. You were president of the Class of '57 for two semesters, won one election this term and lost the second by sixteen votes. I also understand your feelings—the hurt that must have been involved in your defeat.

But for the benefit of the class, and your personal reputation, may I recommend an end to this political haggling. The election has long since ended. By contesting it you have opened a thorough investigation into election procedures and aroused student interest in elections. But your primary purpose of ousting me from office has failed.

Legally, you have found that I am entitled to the presidency. Practically, you know very well the great strides and accomplishments that the class has made both socially and financially.

Therefore, for the benefit of all concerned, I invite your interest and support in activities of the Class of '57, and hope that the political wars will end.

Martin Pollner
President, Class of '57

CORRECTION

To the Editor:

With reference to a specific meeting with Prof. Kenneth Clark (Psychology) and a group of Chilian students, which was reported by your newspaper, I would like to call your attention to the fact that a statement that you attribute to Professor Clark was actually made by Charles Waldauer '57. The statement was "until the Korean War, Negro units were not permitted to fight in the front lines."

Joe DeMaio '57

TIIC Symposium Set for March 2nd

The Technology Inter-society Inter-fraternity Council will sponsor a Personal Development Conference at the College on March 2.

Members of the faculty and several students will hold a symposium on the attributes of professional success.

The three main topics of the conference will be Etiquette, Human Relations and Personal Communications. Each technical organization will be allowed to send three members to the meeting.

Plans have been made for three more conferences, similar in nature, to be held on Thursdays.

Leonard Appel '58, director of the development conference said, "This is a dynamically new concept in personal development. By having this conference we will be able to get the students to know and become aware of the basic attributes of professional success."

Mercury

(Continued from Page 1)

avored the continuance of the magazine.

According to Sofer, the publication's next issue will appear sometime around April Fool's Day. "We have almost all the story material we need," said Sofer, "but we're still short on drawings and cartoons."

As part of their plan to attract more writers, the Mercury editors are planning to sponsor a short story contest. The winner will receive a prize of fifteen dollars, while the runner-up will be awarded ten dollars. It has not yet been determined who will judge the contest, but the editors are hoping to get Jean Shepherd, radio's Night Man.

College Calendar

Academic Freedom Week Committee

Will meet tomorrow at 12 in 436 Finley.

AICHE

Dr. James Shewmaker of Esso Research will speak on "These Peaceful Atoms" tomorrow at 12:30 in 103 Harris.

Crew Relaxes As Fires Burn

Alert Squad Keeps 24 Hour Vigil

By Barbara Rich

Firemen at the College don't slide down poles. Instead, they recline on battered chairs and watch the fires burn.

In the depths of Finley Center, the six man boiler room crew—including a stationary fireman and a chief engineer—keep an around-the-clock-vigil over the heat control system.

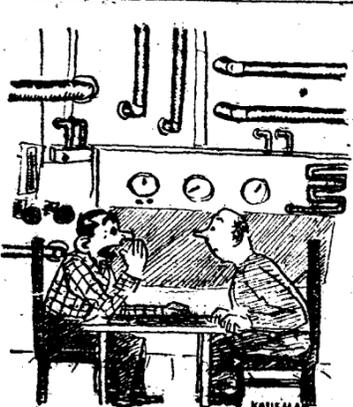

The men, who work on rotating eight hour shifts, have provided the break room with the comforts of home. A refrigerator, painted silver to match the walls and the boiler, stands in one corner. Frying pans hang from racks above a scratched white porcelain table.

A small and shaky stove is lodged between the refrigerator and the boiler. Not the latest model in gas stoves, the four burner was taken from a building that was part of a convent, when Manhattan housed a convent.

The deafening roar made by the machines and boilers does not faze the engineers or their assistants.

"You get used to it," Dave Jelink, fireman, bellowed above the noise. William Wehrt, another fireman, nodded this, however. Mopping his brow with a red handkerchief, he added, "When you get home it's hard to talk in a normal voice, so it sounds as if you were still in boiler-room."

In addition to watching the boiler, the members of the crew act as

general maintenance men around the College. They pack valves, replace gaskets and do other odd jobs.

Being a tidy crew, they take periodic trips to the inside of the boiler to brush the soot off the tubes. As Jelink noted, oil burners can be temperamental. "You never know when something will go wrong," he

Decorate Quarters In Finley Depths

The men who provide the heat for the North Campus, have a harder task in keeping the machines going. Using coal instead of oil, they have to shovel fuel into the furnace 24 hours a day.

Before being transferred South, the Finley Center teams worked as North Campus coal shovelers. Mr. John J. White, chief engineer, worked up North for seven years, keeping a practiced eye on the operation of the furnace.

In his earlier days, Mr. White did construction work, but during the 30's became interested in boilers. "Actually, it was the depression that made me turn from the heights of the building line to the depths of the engine room," he concluded.

Brotherhood Week Bids Offered To Lodge, Kempton, Marshall

Henry Cabot Lodge, Jr., United States delegate to the United Nations; Thurgood Marshall, Chief Counsel for the National Association for the Advancement of Colored People; and Murray Kempton, columnist of the New York Post, have been invited to speak at the College on March 7, during the observance of Brotherhood Week.

Should they accept, all three will participate in a Symposium on "American Brotherhood - as We Preach and Practice It," which will be part of a week-long program of activities, beginning on March 4.

An exhibit of "The Family of Man," coordinated by photographer Edward Steichen, will be on display in Lincoln Corridor throughout the week.

Karen Gordon '59, chairman of the Brotherhood Week Committee, said that "the advances in the area of integration make this

Brotherhood Week a celebration as well as a solemn observance.

AF Week Plans Set

A week of forums and debates, as well as an extensive cultural program has been scheduled for this year's Academic Freedom Week at the College, beginning April 29.

The highlight of the week, Hyde Park Day, will take place on Thursday May 2. "Several speakers of opinions not usually represented on the campus, will be invited to present their views," according to Gerald Dworkin '59, chairman of the Student Government AF Week Committee. Plans are being made to obtain the South Campus lawn for the event.

What a MATHEMATICIAN can do at IBM

Mathematics is an ancient but ever-advancing science that contains many forms. It shouldn't surprise you then that if took some time before John Jackson discovered the one brand of mathematics that seemed custom-tailored to his ability and temperament. John is an Applied Science Representative, working out of the IBM office at 122 East 42nd Street, N. Y. C.

First of all, what's it all about? What does a fellow like John Jackson do all day? In his own words, "I keep in touch with the executives of many different companies—advising them on the use of their IBM electronic data processing computers. I personally consult with these customers, and analyze their scientific and technical problems for solution by IBM. Occasionally, I'm asked to write papers, and give talks and demonstrations on electronic computing. All in all, it's pretty fascinating . . . something new pops up every day." In other words, John is a full-fledged computing expert, a consultant . . . and a very important person in this

The aircraft people decided that they couldn't afford to wait that long, so they called in IBM. After discussion with top executives, John helped to map out a computer program that saved the organization over 100 days

Mapping out a computer program

of pencil-chewing, nail-biting arithmetic. Later, for this same company, John organized the establishment of computer systems for aircraft performance predictions . . . for data reduction of wind tunnel tests . . . and for wing stress analysis. At the same time, he worked with this company's own employees, training them in the use of IBM equipment. John still drops around to see that everything is running smoothly.

Another service that John performs is the constant reappraisal of each customer's IBM operation. Occasionally, a customer may tie himself in knots over a procedural "sticker." Periodically, in fact, John brings IBM customers together . . . just to talk over what's happening in each other's business—how everybody else handled that old bugaboo in any industry . . . details.

New field for Mathematicians

John is exercising his mathematical know-how in a field that was practically unheard of ten years ago. Even now, this kind of work may be news to you. It was to John Jackson a few years back when he was an undergraduate at the University of Colorado. At that time, he was considering actuarial work or mathematical research. But John liked the excitement and diversification of science and industry and he wanted to use his

mathematical background in both of those areas. It was not until he was interviewed by IBM that field computing whetted his scientific appetite. A few months later, John launched his own IBM career as an Applied Science trainee.

Promotionwise, John has come a long way since that time. He's now an Applied Science Representative in one of the busiest, most responsible offices in the IBM organization . . . mid-town Manhattan.

With his wife, Katherine, and daughter, Lisa, 20 months, and John,

Discussing a problem with colleagues

Jr., 6 weeks, he enjoys his suburban Port Washington home. He's happy and he's satisfied. And then, too, John knows a few vital statistics about IBM . . . such as the fact that the Applied Science Division has quadrupled during the past three years, and that in 1956 alone, over 70 promotions were conferred. If ever a future held promise, here is one.

IBM hopes that this message will help to give you some idea of what a mathematician can do at IBM. There are equal opportunities for E.E.'s, M.E.'s, physicists and Liberal Arts majors in IBM's many divisions—Research, Product Development, Manufacturing Engineering, Sales and Technical Services. Why not drop in and discuss IBM with your Placement Director? He can supply our latest brochure and tell you when IBM will next interview on your campus. Meanwhile, IBM will be happy to answer your questions. Just write to Mr. P. H. Bradley, IBM, Room 8701, 590 Madison Avenue, New York 22, N. Y.

Calling on a customer

coming age of automation through electronics.

Since the IBM laboratories are always devising easier and faster ways to solve the problems of science, government, and industry, an Applied Science Representative can never say he's learned his job and that's the end of it. At least once every two months, he attends seminars to be updated on the latest developments in engineering and operations research.

Introduces new methods

During the two years that John has spent with IBM in Applied Science, he has guided innumerable IBM customers to new and better ways of doing things electronically. For example: about a year ago, a leading aircraft manufacturer wanted to experiment with a radically different design for a nuclear reactor. Although the basic format had been established, the project still required many months of toil with mathematical equations.

Jaspers Stop Cagers To Snap Win Streak

(Continued from Page 1)

Rose's absence was not as disastrous as it first appeared.

After two minutes had gone by in the second half, the College trailed 49-39. With O'Connor and Lombardo scoring with amazing consistency for the Jaspers, the outlook appeared none too bright for the Lavender. But eight minutes later the score was tied 54-54, and Bob Silver was fouled under the Manhattan basket. He made both his shots and the Beavers led 56-54.

Silver Gives Beavers Lead

It was Silver who again put the Lavender ahead, 66-65 when he scored from the foul line with 4:55 to go. O'Connor and Jerry Paulson then put the Jaspers ahead for good. O'Connor's driving lay-up and a jump shot gave the Kelly Green a 70-66 lead with less than two minutes to play.

After Lombardo had added two foul shots to make the score 72-68 with 55 seconds left, Joe Bennardo stole the ball and passed it to Jim Mazzaferro. But the little playmaker missed a driving lay-up and the win was Manhattan's. Center Lombardo led the winners with 20 points, but it was Jack Powers who controlled the backboards. Despite Powers' rebounding, Silver, playing the pivot and rebounding strongly, kept the Lavender close.

After the game, Polansky termed silver's play "superb." A proud coach, Polansky praised his team's performance. "This is one of the great moments in our basketball history," he said. "You can't be satisfied after you lose a ball game, but these boys never gave up. When a team loses its high scorer and best corner man and comes back the way our club did, it's impossible to find fault with them."

Pres. Buell G. Gallagher echoed

Coach Dave Polansky praised his team for not giving up in last night's game.

Polansky's sentiments. "These men put on a great exhibition of spirit and fire. They had to overcome

Rutgers Bus

Fifteen seats are still available on the special student bus to the Beaver-Rutgers basketball game in New Brunswick, N. J. Saturday night.

Unless the fifteen signatures and the one dollar and fifty cents round trip fare is collected from those 31 students who have already signed up by this evening at 5, the junket will have to be cancelled.

Money will be collected in The Campus office, 338 Finley.

many obstacles, but I will not soon forget how they played tonight. To say anything but that I am proud and pleased with them would be a misstatement," he said.

Lavender Out-rebounded

The statistics emphasized the fact that the Jaspers have the best shooting percentage in the country. The Beavers made 25 out of 65 from the floor for 39 per cent. Manhattan hit for 26 out of 51 for 52 per cent. Due possibly to the absence of Levy and Rose, the smaller home team outrebounded the Lavender, 43-32.

Perhaps Prof. Nat Holman, who is on sabbatical leave, summarized the Beaver's efforts best when he commented, "They played their hearts out."

In the freshman game, coach George "Red" Wolfe's Baby Beavers were dunned by the Manhattan frosh, 83-68. The Beavers trailed by only three at the half and kept within reach during most of the second stanza but the Jaspers pulled away in the last few minutes to gain the win. It was the Wolfemen's twelfth loss in fifteen outings.

Steady Schefflan a Fixture As Guard for Beaver 'Five

By Vic Ziegel

No matter how the College's basketball team fares during the rest of this season, there's no getting away from the fact that the cagers have come a long way. The same holds true for Ralph Schefflan, a fixture at the guard position for almost three years.

Ralph in two full seasons of varsity play has been averaging close to

RALPH SCHEFFLAN

fourteen points a game—runner-up to scoring leader Syd Levy.

Although he was not on his high school team, Ralph did spend his free hours on the courts of the 178 Street YM & YWHA. It was in these "pick-up" games that Ralph perfected his deadly jump shot.

Coming to the College in 1955, Schefflan began his four and a half year basketball stint, playing for Evening Session squad. "I picked a lot of tricks from the coach, R. Wolfe, but most of the time it was more like a social club," he said.

Schefflan played varsity ball next semester. Nat Holman had returned to the coaching reins and Ralph saw action in every game of the schedule. In February of the year, Jack McGuire graduated and Schefflan took his place on the starting five. He has been a permanent member of that group ever since.

Presently winding up his varsity career with this year's surprise squad, Ralph offers this theory on the Beavers success. "The guys like Dave Polansky wanted to win, but badly they just went out and did it."

Ralph has turned in many "notch" performances but will always remember one game as his particular favorite. "It has to be the Frosh game," says Ralph. "Winning a game like that means so much when you know you're ranked as an underdog."

IT'S FOR REAL!

by Chester Field

LOUIE, THE LOUSE

He strolled through a keyhole into my house,
A dignified, well-bred upper-class louse;
He smiled in a most superior way
And said, "Man has just about seen his day.
If you'll take my advice for what it's worth
Treat insects nice, they'll inherit the earth!
Try to be beyond reproach
In your dealings with the roach . . .
Bedbugs, ants and spiders, too.
Don't forget . . . WE'RE WATCHING YOU!"

MORAL: Well . . . until Louie takes over, take your pleasure BIG. Smoke Chesterfield . . . and smoke for real! Packed more smoothly by ACCU-RAY, it's the smoothest tasting smoke today.

Smoke for real . . . smoke Chesterfield!
