Pair Arrested After Attempt To Steal Purse

Two men believed responsible for the string of petty thefts that has plagued the College since the semester opened were arrested by police Thursday.

No reports of stolen articles have come to the Department of Student Life since the men were apprehended. An average of three wallets per day had been reported missing during the semester's first three weeks.

An alert student, who asked that his name be withheld, noticed the pair snatching a handbag from 318 Shepard, where a biology laboratory was in progress. He followed the two men as they fled out of the building to St. Nicholas Terrace. There he hailed a passing patrol car which gave pursuit.

The fugitives, whom police suspect are dope addicts, were captured after a short chase. The handbag, which they had hidden behind a radiator in Shepard Hall, was later recovered by police.

Since the men were not caught in the act of pilfering the purse, College officials could press only loitering charges against them. They are now serving thirty day sentences at Riker's Island.

G&S Auditions

The Gilbert and Sullivan Society is casting for lead and chorus roles for its production of the "HMS Pinafore." Auditions and rehearsals will be held Tuesdays and Thursdays from 6 to 8 in 440 Finley.

Professors Ready Reactor For Lab Use This Term

By Barry Mallin

Three professors at the College—all experts in the field of atomic energy—are now conducting preliminary experiments with the College's sub-critical atomic reactor in order to ready it for student use by the middle of this semester.

Once the experiments are concluded and a syllabus prepared, approximately fifteen classes from the Engineering, Physics and Chemistry Departments will begin utilizing the reactor in classroom work. It will be used primarily for instruction in nuclear physics and power courses.

No Radiation Hazard

Dr. Morris Kolodney (Chemical Engineering) director of the project, emphasized that the machine is completely safe and will not produce any dangerous quantities of radiation.

The three-man team, composed of Dr. Kolodney, Prof. Sherwood B. Menkes (Chemical Engineering) and Dr. Harry Soodak (Physics), started their technical groundwork last semester upon completion of the reactor.

Designed by Dr. Kolodney and Dr. Soodak, the machine was constructed at a cost of eight thousands dollars.

Material Chiefly Uranium

The nuclear material used by the reactor, consisting chiefly of 5500 pounds of uranium, is valued at more than one hundred thousand dollars.

DR. JEANNE NOBLE Eye-witness in Little Rock

Nine Negro students leave Central High School after third day of classes. Paratrooper leads the way.

Dr. Jeanne L. Noble (Student Life), who viewed at first hand the turbulent events accompanying the desegregation of Central High School in Little Rock, Arkansas, believes that President Eisenhower's actions were "his first sensible stand on race relations."

"An important precedent is being established at Little Rock," she said. She believes that the Federal intervention will make clear that "the law of the land is the law of the land" and as a result the desegregation of public schools in other states will be facilitated.

The tall, slender guidance work-

er has studied in detail the subject of educational opportunities for Negro women. Her Ph.D thesis on the topic won a research award from Pi Lambda Theta, the Honorary Society for Women in Education. She has also published a book titled "The Negro Woman's Education."

Stayed with NAACP Head

During the summer Dr. Noble directed a guidance workshop at Tuskegee Institute in Alabama. Afterwards she went to Little Rock. She stayed at the home of Mrs. Daisy Bates, the chairman of the Arkansas chapter of the National Association for the Advancement of Colored People.

The nine Negro students about whom the furor had been raised were introduced to her. Impressed by their "mature adjustment to the difficult situation," she described them as: "... normal, ordinary youngsters who do not have a chip on their shoulder and who will be glad when all the publicity is over and they can start studying. All they want now is to be accepted intellectually. They are prepared for possible social ostracism."

More Than Toleration

There have been many instances where the white students at Central High School have more than just tolerated the negro boys

(Continued on Page 3)

Flu Causes Delay Of 3rd Salk Shot

The city-wide Asian flu epidemic has caused a postponement of the third anti-polio inoculations at the College. The Salk shots were scheduled to be given the week of October 14.

Dr. Abner Stern, chief College physician, said that the inoculations will be delayed until the epidemic has abated. He explained that many persons at the College would have missed their shots because an estimated thirty per cent of the city's population is expected to contract the disease within the next eight weeks.

An official in the Registrar's Office said Friday that twenty students had called the office last week reporting cases of upper respiratory infections. In addition, he noted that "for everyone who calls, at least six

(Continued on Page 2)

SFCSA Vote Set For 11 Tomorrow

By Wally Schwartz

Voting will begin tomorrow at 11 to elect three student representatives to the Student Faculty Committee on Student Activities. Seven candidates are vying for the three vacant positions.

Ballots will be distributed in classes during the hour by members of Alpha Phi Omega and the Student Government Elections Agency. In addition, booths will be set up in the Finley Center entrance and opposite Knittle Lounge in Shepard Hall.

The two students receiving the highest number of votes will be elected to one-year terms on the committee; the third will serve for one semester.

Competing for the offices are Marvin Adler '59, Ralph Dannheisser '58, Henry Gassner '58, Harold Gott-helf '58, Harold Klein '58, Michael Rizzo '58 and Eli Sadownick '58.

Charters Student Groups

SFCSA is the highest policy group on the campus on which students may serve. Its responsibilities include serving as an appeal group in cases involving student activities and establishing and upholding regulations for outside speakers and organizational publicity.

The committee charts all stu-

dent groups and assists in establishing regulations governing all student organizations.

The election will fill three of the five student positions on the ten-member committee. Bart Cohen '58, Student Government president, and Joe DeMaio '58 now hold office and will continue until next semester.

Organized in 1945

Last term's elections were cancelled because of a lack of publicity and candidates. This semester voting was originally scheduled for September, but was postponed twice to provide better publicity.

The Student Faculty Committee on Student Activities was organized in the fall of 1945 in an effort to give students greater control in conducting their affairs. Until a year ago when school-wide elections were first instituted, student representation consisted of leaders of Student Council, the senior class, House Plan, and the Technology Intersociety Interfraternity Council.

This will be the third school-wide election for student representatives on the committee. More candidates are running this semester than in either of the previous campaigns.

The candidates are:

- Marvin Adler, chairman of the Public Affairs Forum and Forum

Limestone Beaver to Grace Site of New Cohen Library

By Ed Kosner

There's nothing like a statue or two to give a library distinction.

Two stone lions lend dignity to the New York Public Library at Forty-second street and the College's new Morris Raphael Cohen Library, appropriately enough, will be embellished by a limestone beaver.

A graduation gift of the Class of '56, the one-and-one-half ton rendering of the College's mascot is the work of Robert I. Russin '35, Professor of Art at the University of Wyoming.

Public Relations Model of Beaver Statue

When finished later this semester, the monument will be shipped to New York and unveiled at its new site near the library with appropriate pomp.

Professor Russin is now completing the statue at his studio in Wyoming. He is working from drawings, photographs and observations of beavers paddling about in ponds near the University's campus. Wyoming beavers, luckily, are identical to the local variety.

The statue will be almost five feet high, three feet wide and two feet deep. It depicts a beaver, crouched on a pedestal, holding in its forepaws a shield inscribed "1956."

Beavers have been intimately connected with the history of the city since the beginning: the early Dutch settlers established a lucrative trade in beaver pelts with the local Indians. A beaver appears on the seal of the City of New York and the creature has been the college's official mascot and unofficial symbol for more than two decades.

The beaver was selected in 1934 in a contest run by The Campus. The choice was made by Pres. Frederick B. Robinson, who based his decision on the animal's reputation for intelligence and industry and its role in the city's history and seal.

The SFCSA Election

The significance of tomorrow's special election to the Student Faculty Committee on Student Activities cannot be overestimated. In addition to the intrinsic importance of SFCSA, the pending election will mark only the second time that a school-wide balloting will be held for student members of the Committee. With this newly gained democratization of the election system at our disposal, it is all the more important that the best possible representatives be elected to SFCSA.

To begin on an encouraging note, this is the first election in recent years where the candidates have substantially outnumbered the vacancies. Of the seven opposing candidates, two stand out, Eli Sadownick and Michael Rizzo. There is little to choose from among the other five. It probably will not make too much difference which one of them is the third man elected tomorrow, but Sadownick and Rizzo deserve special acknowledgment and your votes.

Eli Sadownick is one of the most capable student leaders at the College. He is perhaps best known through his four year association with this newspaper, but his reputation extends beyond the pages of *The Campus*. He is respected throughout the College as a conscientious, courageous proponent of the reputation of City College, and the welfare of all of its students. Eli Sadownick will bring to SFCSA an open mind, a liberal attitude and a sober consideration of each issue on its individual merits.

Sadownick opposes membership lists, favors the appearance of speakers of all points of view here, and sees the necessity of more cooperation between the College of Liberal Arts and the School of Technology. On the basis of his record and his relevant opinions and attitudes, Eli Sadownick should make an outstanding member of SFCSA.

The sum of Michael Rizzo's achievements as an undergraduate is staggering; he is more than qualified for the position he seeks. To list his qualifications would take half of this column—from Junior Class president to producer-director of the World University Service's fund raising show. Like Sadownick, Rizzo will bring to his position a keen awareness of current problems, gained at first hand over a period of three years as an outstanding leader at the College.

Although there are five others running for the third vacancy on the Committee, none seems especially desirable. Harold Gotthelf and Hank Gassner, are unfamiliar with the functions of SFCSA; Ralph Dannheisser has displayed a remarkably lackadaisical outlook during his term on Student Council; Marvin Adler did not even bother to submit his statement and qualifications to *The Campus* and Harold Klein's view of the Tech School as a special interest group seems rather shortsighted.

The Campus urges the election of Eli Sadownick and Michael Rizzo to the Student Faculty Committee on Student Activities.

Statements of Candidates

MARVIN ADLER
(no statement submitted)

RALPH DANNHEISSER

Serving in my various positions on *Observation Post* and on the Student Council has kept me in close contact with a wide range of problems at the College. This three years of experience should help me to decide intelligently on any issue brought before the SFCSA.

HENRY GASSNER

SFCSA is the highest body of authority at the College in which students take part. However, the exact function of this committee has always been vague. In order that the SFCSA and the student body may act intelligently, it is imperative that the committee reexamine itself and determine exactly what its role is.

HAROLD GOTTHELF

As chairman of Student Government's Civil Liberties Committee, I represent the interests of all students and not those of a large but limited campus organization. Remember, student members of SFCSA, indifferent to academic freedom, sold out the student body on the issue of compulsory membership lists. Let us not have any more backward steps!

Flu

(Continued from Page 1)

more come drifting in with medical notes."

Only sixty to one hundred students had called in sick all last term, the spokesman said.

Mr. T. E. Levine (Public Relations) said Friday that the College had made an "informal check" which revealed a number of isolated flu cases on campus. "Several instructors reported a slight rise in absenteeism and attributed this to the Asian flu," he noted.

He added, however, that the epidemic "hasn't reached such serious proportions here as in the public schools."

—Foege

I have been engaged. It is my desire to use this experience to serve you on SFCSA. As a member of this committee I will try to bring about legislation which will be beneficial to the students and the College as a whole.

The only way you can be assured of a strong voice on any body is by voting for the best possible representative. The decisions of SFCSA can have an important bearing on many extra-curricular activities. Choose wisely is a cliché but it still applies here. My decisions will not be hasty.

Letters to the Editor

'GREAT SAVING'

To the Editor:

I have long felt a sense of inconvenience resulting from the existing procedure of obtaining student identification cards at the College.

After due and careful consideration I have arrived at what I think would be a method which if put into effect, would result in a great saving in time and money to both students and faculty.

Under the existing system, new cards are issued to each student each term. This is obviously a duplication of effort. If cards were issued to entering students which had, in addition to the other pertinent information, a number of small blocks at the bottom, listing with the semester of issuance, these blocks could be punched at the end of each term. Should a student leave school, or in any way interrupt the normal sequence of his attendance, his card would be confiscated and re-issued to him upon his return with appropriate notations to explain the discrepancy.

Although I speak for myself alone in this letter, I'm sure, from

comments I have heard around school, that the adoption of such a system would meet with approval.

Dr. Noble Views Integration At High School in Little Rock

(Continued from Page 1)

and girls. During every lunchtime white students have invited Negroes to eat with them and one girl was even asked to join a social group, Dr. Noble noted. She believes that many students who walked out of the High School were intimidated or forced to do so.

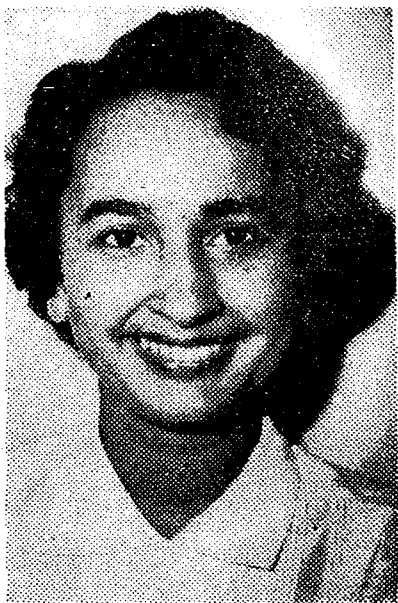

She gives credit to the High School's teachers and administrators for their part in the affair. "The teachers were not emotionally involved. They merely accepted the Negro children as they would other students, and did not try to moralize or preach about what was going on outside the school."

There was also ample opportunity to see the mob activity outside the school building. "Many of the white boys who were running around with placards and shouting were not impassioned," she recalled. "Most of them were just out for some devilment."

Many in the mob were not even citizens of Little Rock, she noted. Some travelled long distances by car to get there. The crowd was unruly because of the agitation of only a few persons, she observed.

Dr. Noble places the blame for the crisis squarely on Gov. Orval E. Faubus.

In advocating immediate integration as opposed to "gradualism" Dr. Noble supported the views of Prof. Kenneth B. Clark (Psychology). Dr. Clark's ideas were presented in a letter published in the New York Times of September 15.

Public Relations
DR. JEANNE NOBLE

Dr. Noble said: "What is more gradual than selective integration. Only nine handpicked Negro students entered the school. The only thing more gradual than that is to have no one enter and that is not gradualism—that is nothing."

SG to Offer Course In Driver Education

A driver education course sponsored by Student Government will be reinstated at the College within a few weeks.

Last week SG accepted a bid for a thirty hour driving course offered by the Fordham Driving School. The price of the course will be fifty dollars for students who have a car. There will be a five dollar increase if it is necessary for the school to provide an automobile.

Applications are now being accepted for the course and can be left in the SG letter box in 151 Finley or in box 2B of 332 Finley.

Film Program

Student Government will present next week "East of Eden" starring James Dean and Julie Harris. This will be the first in a series of films to be shown each Monday and Tuesday at 3 in Townsend Harris Auditorium.

The program, which will continue through December 11, will present such features as: "Mister Roberts," "A Star is Born," "Executive Suite," "The Great Caruso," and "Blackboard Jungle."

Prof. Analyzes Hoffa Control

James R. Hoffa, president-elect of the International Brotherhood of Teamsters, will still hold enough power to control the union even if he is jailed for corruption, Prof. Robert D. Leiter (Economics) asserted Thursday.

Speaking before the Economics Society, Professor Leiter charged that the selection of delegates to the recent Teamster convention in Miami was "definitely tilted" toward Hoffa. He further charged that Hoffa himself picked delegates from sixteen Teamster locals and that he, along with Dave Beck, retiring president of the union, was responsible for the appointment of twelve per cent of the delegates.

The McClellan Senate Investigating Committee, the economics professor said, has clearly shown that Beck has and had no moral right to lead any union. Beck was "the businessman's darling" during his period of presidency, Professor Leiter declared.

Professor Leiter is a member of the Federal Mediation and Conciliation Service as well as the Panel of Arbitrators of the American Arbitration Association. He recently published a book describing his three-year study of the Teamsters' Union.

WHAT EVERY YOUNG COED SHOULD WEAR

Gather round, girls. Flip open a pack of Marlboros, light up, enjoy that fine flavor, that good filter, relax and listen while Old Dad tells you about the latest campus fashions.

The key word this year is *casual*. Be casual. Be slapdash. Be rakish. Improvise. Invent your own ensembles—like ski pants with a peek-a-boo blouse, like pajama bottoms with an ermine stole, like a hockey sweater with a dirndl.

(Dirndl, incidentally, is one of the truly fascinating words in the English language. The word originated on June 27, 1846, when Dusty Sigafoos, the famous scout and Indian fighter, went into the Golden Nugget Saloon in Cheyenne, Wyoming, to see Lily Langtry. Miss Langtry did her dance in pink tights. Dusty had never seen anything like that in his life and he was much impressed. He thought about her all the way home. When he got

When he got home his wife Feldspar was waiting

home his wife Feldspar was waiting to show him a new skirt she had made for herself. "How do you like my new skirt, Dusty?" asked Feldspar. He looked at the large, voluminous garment, then thought of the pink tights on Lily Langtry. "Your skirt is darn dull," said Dusty. "Darn dull" was later shortened to dirndl, which is how dirndls got their name.)

But I digress. We were smoking a Marlboro and talking about the latest campus styles. Casual, we agree, is the key word. But casual need not mean drab. Liven up your outfits with a touch of glamor. Even the lowly dungaree and man-shirt combination can be made exciting if you'll adorn it with a simple necklace of 120 matched diamonds. With Bermuda shorts, wear knee-cymbals. Be guided by the famous poet, Cosmo Sigafoos (whose cousin Dusty invented the dirndl), who wrote:

*Sparkle, my beauty,
Shimmer and shine,
The night is young,
The air's like wine,
Cling to a leaf,
Hang on a vine,
Crawl on your belly,
It's time to dine.*

(Mr. Sigafoos, it should be explained, was writing about a glowworm. Insects, as everyone knows, are among Mr. Sigafoos' favorite subjects for poetry. Who can ever forget his immortal *Ode To a Boll Weevil*? Or his *Tumbling Along with the Tumbling Tumblebug*? Or his *Fly Gently, Sweet Aphid*? Mr. Sigafoos has been inactive since the invention of DDT.)

But I digress. We were smoking a Marlboro and discussing fashion. Let us turn now to headwear. The motif in hats this year will be familiar American scenes. There will be models to fit every head—for example, the "Empire State Building" for tall, thin heads; the "Jefferson Memorial" for squatty heads; "Niagara Falls" for dry scalps. Feature of the collection is the "Statue of Liberty," complete with a torch that actually burns. This is very handy for lighting your Marlboros, which is terribly important because no matter how good Marlboros are, they're nowhere unless you light them.

Whatever you wear, girls—and men too—you'll find the perfect accessory is Marlboro, whose makers take pleasure in bringing you this column throughout the school year.

Schlisser Paces Beaver Attack With 2 Goals - Bonnet Scores

By Bob Mayer

Displaying peak form in its opening game of the season, the College's soccer team coasted to a 3-0 victory Friday over a highly-touted Rensselaer Polytechnic Institute squad at Lewisohn Stadium.

A large partisan crowd saw the Lavender eleven score twice in an exciting first period and extend its home unbeaten streak to sixteen games. The Beavers have not lost at the Stadium since October of 1953.

Wrap-around Defense

Added speed, extra reserve power and a wrap-around defense enabled the Beavers to shift smoothly into the world of major competition. Many observers felt that the per-

formance—coming against one of the ranking teams in the state—surpassed any turned in by last year's championship outfit.

The Beavers showed mid-season form, consistently out-running, out-hustling and out-thinking their opponents. They controlled the ball and set the pace throughout the contest.

Schlisser completed the scoring at 7:20 of the third period, registering unaided during a melee near the RPI goal.

Meanwhile the Lavender defense was living up to its advance billing as "the best in the College's history." Led by center-halfback Johnny Paranos, the Beaver back wall thwarted most RPI offensives before they could materialize. Only once did the Engineers break through for a shot at the unguarded goal, but they muffed the chance with an erratic kick.

Manfredi Makes 7 Saves

Lavender goalie Leon Manfredi had to make only seven saves, six of which were routine. On one play, however, the visitors came as close to scoring as they possibly could without denting the nets. The Beavers were charged with a personal foul early in the final period, and RPI's leading scorer, Sandy Csobaji, was awarded a direct kick. Csobaji booted the ball on a line toward the far corner of the goal, but with a headlong dive Manfredi was able to deflect it off the post.

The Beaver attack was hampered somewhat by the loss of co-captain Billy Sund. Sund saw only limited

action because of an infected toe. Coach Harry Karlin substituted freely during the last period, giving his men practice at unfamiliar positions in case injuries force a change in the line-up.

Obviously pleased with his squad's performance, Karlin said, "we proved to the boys upstate that we deserved the championship, and gave notice that we're after another one."

The booters will meet an alumni squad at the Stadium Saturday. They return to regular competition a week from tomorrow with a Metropolitan Conference game at Long Island University.

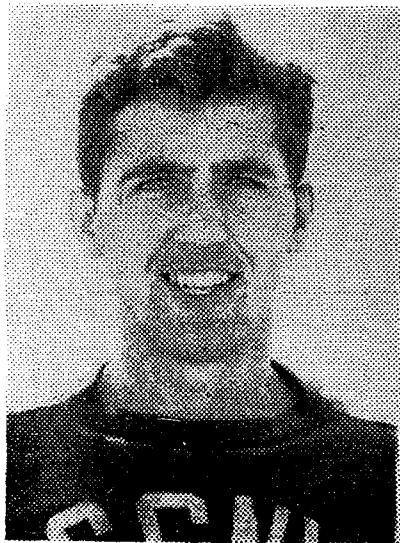

Line Score

RPI	0	0	0	0-0
CCNY	2	0	1	0-3
Goals—Schlisser (2), Bonet.				
Assists—Wachter, Minnerop.				

CAMPUS photo by Levine

Inside-left Gabe Schlisser passes to teammate Billy Sund (9), as RPI defensemen Roberts (3), Bauer (22) and McEwan (9) close in. Schlisser led the booters' attack with two goals. The action took place in the third quarter of Saturday's opening game at Lewisohn Stadium. The Beavers defeated RPI, 3-0.

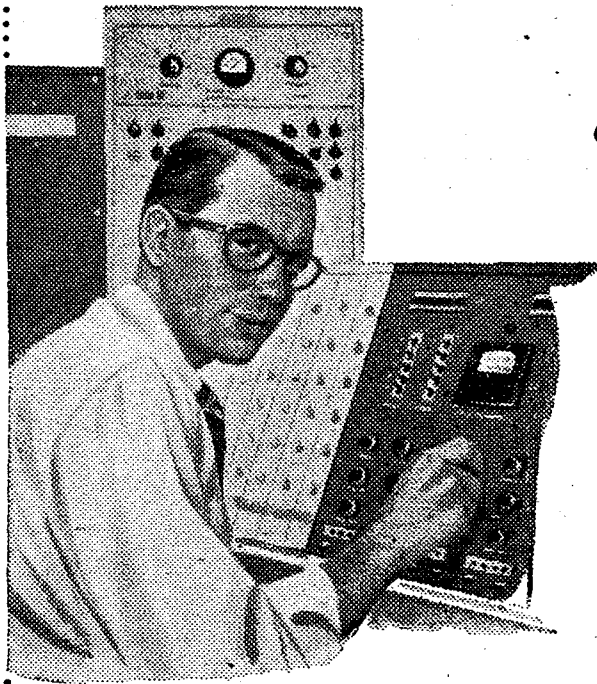

CAMPUS photo by Levine
Heinz Minnerop passed to Fred Bonnet for the Beaver's second tally in the first stanza.

De Girolamo Lauds Harriers' Showing

The College's cross-country squad has shown more strength in pre-season practice sessions than last season's undefeated team did at the same stage, according to Coach Harry de Girolamo.

"I am very pleased with the team's showing so far," Dr. de Girolamo said, "particularly with my three top men, sophomore Bob Cleary and co-captains Ralph Taylor and Randy Crosfield."

The three men placed fourth, fifth, and sixth, respectively in a practice meet held Thursday against a top-flight Columbia team. All broke thirty minutes, and, according to the coach, looked very impressive for this time of the year.

CONVAIR

POMONA

POMONA, CALIFORNIA

CONVAIR IS A DIVISION OF GENERAL DYNAMICS CORPORATION

BETA DELTA MU FRATERNITY was organized more than a decade ago by students who felt that existing fraternities throughout the country were too narrow-minded and infantile, and lacked the essential quality of brotherhood. With the fundamental ideas of friendship, loyalty, and understanding as its foundation BETA DELTA MU was born and has since grown until today it is recognized for its dedication to inter-racial and inter-religious unity and amity.

BETA CHAPTER is the second chapter in the BETA DELTA MU NATIONAL ASSOCIATION which is comprised of chapters in the leading city colleges and other higher institutions. Members of Beta Chapter are drawn from every department of study at the college.

Although we participate in many school functions, Beta Chapter is primarily a social fraternity. Our fraternity house located in Brooklyn, is the site of a full program of dances, parties, and stag nights and serves as the starting and congregating point for dates and outings all year round.

You are cordially invited to our fall semi-annual smoker, Friday October 11, 1957 8:30 P.M. at our fraternity house 42 Flatbush Avenue (near Fox Theater.)
