Delay Completion Of Library Again

Wilcox Anticipates Partial Opening Next Week

By Barbara Ziegler

Complete facilities of the Morris Raphael Cohen Library will not be available until some time next semester, according to Prof. Jerome Wilcox, (Librarian).

Officials had originally expected the Library to be in full operation by the middle of November.

Professor Wilcox said, however, that the Library will begin functioning on a limited basis next week, when the first floor reading room and the reserve collection will be ready for student use.

Opening Day Indefinite

The exact day of the partial opening is indefinite since recent rains caused a further delay in construction. The building still lacks a front door and a driveway.

Completion of the Library's circulation and general reference rooms is expected by Thanksgiving, but special divisions, such as humanities and social studies, will not be ready until next term.

Beginning next week, the Technology Library will be housed in Great Hall. Reserve books will also be distributed from Great Hall until they can be transferred to the Cohen Library.

Bound and current periodicals are presently available on the first floor of the Bowker Library.

Strikes Cause Delay

Repeated delays in the opening of the Cohen Library stemmed from inclement weather and two labor disputes. A cement strike in the early summer crippled construction work on the building. Mr. Samuel Goldstein, superintendent of construction, said he had to work with a skeleton crew for three weeks.

A strike in the steel industry halted production of book shelves and supports. As a result, Library officials didn't receive the shelves until this week, although the shipment

Irani to Inaugurate Series of Lectures

Prof. Kaikhosrov Irani (Philosophy) will introduce a new series of lectures tomorrow with a talk on "Methods and Concepts in the Social Sciences" in 217 Finely at 10.

The lectures will deal with the content and substance of the social sciences, Prof. Robert Solo (Economics), who organized the series, explained last week.

There will be from nine to fifteen lectures in the series, covering such topics as interaction of the social sciences and the nature and content of economics, social geography, political science, international relations, history, social psychology and anthropology.

DR. JEROME WILCOX

had been scheduled to arrive in August.

When told that the Library would not be fully completed until next semester, Pres. Buell G. Gallagher said that the delay was "immensely disheartening."

Shuster Discounts Chancellor Rumor

By Ken Foege

A report that Dr. George N. Shuster, president of Hunter College will be named Chancellor of the Municipal Council was called "completely erroneous" by Dr. Shuster yesterday. He added that he would not accept the position if it were offered to him.

The story announcing Dr. Shuster's "appointment" appeared in Tuesday's edition of *The Ticker*, undergraduate newspaper of the Baruch Center. The paper quoted "highly informed sources" as the basis of its information.

The position of chancellor was created during the summer by the Board of Estimate. Nominations for the position are to be made to the Board of Higher Education by the Municipal Council of city college presidents. The BHE will then elect a chancellor.

Pres. Buell G. Gallagher, chairman of the Council, also disputed *The Ticker's* report. "The story has no foundation in fact," he said. "It is an interesting rumor." Dr. Gallagher added that the Council has made no nominations to the BHE as yet.

Maude Stewart, director of public relations for the BHE, called the story "nothing but fiction." No recommendations have been made to the Board, Miss Stewart said, "so of course the story is untrue."

When informed of the reaction to the story, Morton Horwitz, news editor of *The Ticker*, reaffirmed the report. "We still think that Dr. Shuster will be named," he asserted. "It won't happen before the end of the year."

Rizzo, Sadownick Win Year Terms on SFCSA

By Wally Schwartz

Michael Rizzo '58, Eli Sadownick, '58, and Marvin Adler '59, were elected to the Student Faculty Committee on Student Activities yesterday. Thirteen hundred votes were cast in the election.

Rizzo, who received the highest number of votes, 849, and Sadownick, who drew 729, will serve on the Committee for one year. Adler, who received 631 votes, will hold his position for one semester only.

The three victorious candidates join Barton Cohen '58, Student Government president and Joe De Maio '58 as the representative of the student body.

Light Vote Recorded

The defeated candidates are Ralph Dannheisser '58, Harold Klein '58, Henry Gassner '58, and Harold Gotthelf '58. Dannheisser was fourth with 542 votes.

Voting was lighter than that of a year ago when over two thousand students voted in the first school-

Dr. Marvin Magalaner (left) and Prof. Edward Hoffman serve on the Student Faculty Committee on Student Activities. The Committee is made up of five faculty members and five elected students.

wide election of students to SFCSA. Ballots were distributed and counted yesterday by Alpha Phi Omega, the College's service fraternity, which regularly works for the SG Elections Agency. They were distributed in most 11 o'clock classes.

A lack of man-power curtailed the distribution, according to the service fraternity. Some classes in Shepard, Harris, and the Tech Build-

ing did not receive ballots. Booths were opened in the Finley Center between 12 and 2 and also in Shepard Hall opposite Knittle Lounge.

Fifth Member to Be Named

The faculty members of SFCSA are Prof. Edward Hoffman, (Romance Languages), Prof. Marvin Magalaner (English), Prof. Lawrence Podell (Sociology), and Prof. Herbert Taub (Electrical Engineering). A fifth member of the faculty has not yet been appointed. Dean James S. Peace (Student Life) is the non-voting chairman.

SFCSA's first meeting should be held next week, according to Cohen. The agenda, however, has not yet been decided.

SFCSA serves as an appeal group for students in cases involving student activities, charters student organizations and assists in establishing regulations for all student organizations.

The committee was organized in 1945 by the General Faculty Committee on Student Activities in order to give students a greater role in running their activities.

Rosen Pleased By China Trip

Jacob Rosen '59, a leader of the American delegation which defied the State Department ban on travel to Communist China, told a United States consular official Saturday that he was glad he made the trip and would do so again regardless of the consequences.

Acting as spokesman for the fourteen American youths who arrived in Moscow Saturday on their return junket from China, Rosen said that he was delighted with what he saw in that country.

Gathered around a table in the tourist lounge of Moscow Airport, the Americans were told by consular officer Edward Killham that they must report immediately to an American Embassy in a non-Communist country and have their passports validated for direct return to the United States.

[The State Department had previously announced that the passports of the 41 Americans who traveled in China will be seized when they return to this country.]

Rosen was reported to be one of the eight travelers who refused to permit Killham to inspect their passports.

In a letter received last week by Eli Sadownick '58, Associate Editor of *The Campus*, Rosen indicated that he would send to *The Campus* this month articles based on his travels.

Lists Circumvented By Only 2 Groups

Only two organizations have thus far taken advantage of the Student Government plan designed to evade the compulsory membership list ruling.

They are: the Marxist Discussion Club and the Mathematics Society. Under the plan, eight student leaders will sign the membership list of any organization that wishes to circumvent the list ruling.

According to Mr. Stamos Zades (Student Life), more than seventy organizations have already officially registered with the Division of Student Activities.

The deadline for filing membership lists was last Friday. Mr. Zades said that organizations that do not file a membership list will be denied use of the College's facilities.

DR. GEORGE SHUSTER

According to the *New York Post*, the number of candidates for the vacancy on the BHE created by the death of Dr. Joseph B. Cavallaro, has been narrowed down to two.

Victor F. Candello and Edward Re, both Brooklyn lawyers, were named as the contenders for the position on the 21-member board. Board member Gustav Rosenberg was recently elected chairman of the BHE.

Job Orientation

A senior orientation program will be held today in the Townsend Harris auditorium between 12-2.

Engineering and science students who missed the first program should attend. They will be briefed on interview procedure and on the services provided by the Placement Office.

Editorial Policy Determined by Majority Vote of Managing Board

Now to Work

We would like first to congratulate the winners of yesterday's SFCSA election, Michael Rizzo, Eli Sadownick, and Marvin Adler. They are now our representatives on the most influential student faculty committee at the College. The job is not an easy one, and their performance on the Committee will be closely watched by both students and faculty.

While the election was being postponed on two separate occasions this semester, the work of the Committee piled up. At present, there are several organizations which have waited patiently since the beginning of the semester to have their charters approved by SFCSA. This is the first job the Committee should consider.

After its backlog of work is cleared up, the Committee should do itself and the College a service by defining its functions clearly and specifically. Beyond chartering organizations and acting as an appeals body in cases involving student organizations, the jurisdiction of the Committee has never been made clear.

Part of the blame for yesterday's small vote must be attributed to the fact that many of the eleven o'clock classes on the North Campus were not canvassed by the vote gatherers. Since the College authorities had nearly four weeks to prepare for the election, such an oversight seems inexcusable.

The Real Purpose

In Tuesday's issue of Observation Post, Student Council representative Marvin Adler advanced his opinion of the role of the eight student leaders who volunteered to sign membership lists. He contended that the students' most vital function "is to enable those organizations who would have to leave campus because of insufficient membership to remain on campus."

If this were true, it would mean that the eight-man committee serves only to legalize the existence of clubs which cannot muster a bare minimum of student support; it would mean that the committee's main function is to allow such "organizations" to be eligible for College funds.

The necessity for imposing minimum membership requirements on organizations is obvious. Without such a ruling, four or five students could form a "club" and demand the same privileges granted to duly accredited organizations. Moreover, this "club's" share of student fees would decrease the amount available for groups with wide student backing.

The purpose of the eight-man committee is not to pad the membership of campus groups; it is to demonstrate student antipathy toward the list ruling.

But the necessity for determining the number of members in an organization does not make the argument for membership lists any more valid, since the College could require each group to submit the number of its members, without listing their names.

Songs and records in 350 Finley from 12-2. Refreshments served.

Christian Association
Will have membership meeting in 424 Finley.

Debating Society
Will meet in 121 Finley. New members welcome.

Propose Expansion Of SG Functions

Three proposals for extending Student Government responsibilities were outlined Tuesday by Barton Cohen '58, SG President. He spoke at the SG inaugural dinner.

The plan was part of Cohen's inaugural address. It called for granting SG the ultimate decision on fee allocations and the power to legislate all rules guiding the conduct of students on the campus.

The final point called for the coordination of all school affairs by SG. Each of the proposals provided for a student-faculty committee to act as an appeals body.

Rudner Nominated For City Council

Purchasing Agent For the College Active Liberal

By Don Langer

Eleven years of work for the Liberal Party has earned for Mr. Howard Rudner, the College's purchasing agent, a nomination for the office of City Councilman.

This is Mr. Rudner's first candidacy for public office. He is running in the eighth Queens district.

As purchasing agent, Mr. Rudner is responsible for handling almost one and a half million dollars every school year. Virtually every item used by the College, whether for athletics, academics or maintenance, is purchased by his office.

"The only business which I probably do not transact is the buying of paper clips and pencils for departmental offices. These are usually handled by the individual departments using petty cash funds," Mr. Rudner explained.

He expects tough opposition from both the Democratic and Republican candidates. He noted that although the Liberal party does not have the financial resources of the major parties, his platform of his party will reach a majority of the public.

Mr. Rudner's opponent from the Democratic party is the present incumbent, James F. Dulligan. Thomas T. McVann is the nominee of the Republican party. Mr. Dulligan is filling the term left vacant when Hugh Quinn resigned in the wake of a scandal.

If elected, he will be forced to withdraw from his present job since the city law forbids the holding of two municipal positions simultaneously.

Mr. Rudner is 46 years old, and graying along the temples. He is

HOWARD RUDNER

an alumnus of the College and graduated in 1932.

After serving in the army he joined the Liberal Party in 1946. "The prospect of forming a third major political party in the country has always appealed to me," he said. He hopes that this party could eventually achieve a national status.

During the next eleven years Mr. Rudner became increasingly active in the party. At present he is the chairman of two Liberal Party Clubs, and a member of the Queens County Executive Committee and the National Legislative Committee.

Mr. Rudner regards his current position as valuable preparation for a prospective City Councilman. He noted that it "adds immeasurably to one's knowledge of city government, and municipal financing."

Coaches Cancel Soccer Playoff

The College's hopes for national recognition in soccer through post-season play have been shattered by the Intercollegiate Soccer Coaches Association. In a poll of more than three-hundred members taken by mail last month, the group voted not to stage championship playoffs this year.

The results of the poll, which was revealed Monday, nullifies a previous decision to hold annual playoffs, made last fall at a meeting of approximately sixty coaches.

Although specific reasons for the change were not divulged, two factors probably accounted for most of the negative votes. One is the ban on post-season play that exists at some schools, notably in the Ivy League. The other is a monetary problem.

Squad Disappointed

Under last year's playoff system, participating college's had to pay whatever team expenses were not covered by gate receipts. Many small schools apparently objected to this requirement, and advocated cancellation of the playoffs until the national body accumulates enough money to support the program.

The College participated in the initial post-season program last year, representing New York State. The booters were defeated by Springfield, 3-2, in the opening round.

Small Schools Object

Coach Harry Karlin and his strong squad, which had been aiming for national recognition through the intersectional playoffs, naturally were disappointed with the cancellation of the program. But Karlin regards the move as a year's delay rather than a permanent veto.

"Playoffs are a coming thing," the coach said. "Once the details are taken care of I'm sure they'll be established on a permanent basis."

For this year at least, however, the playoffs are out, and the Lander booters will have to merit national ranking solely on their regular-season performance.

Swimming Star Teaches Here

Schloemer Teaches Engineering Now

By Don Langer

The man who swimming coach Jack Rider calls "the greatest freestyle swimmer in the College's history" is presently instructing the College's Tech students in mechanical engineering.

Mr. Howard Schloemer is in his second year as an instructor at the College. Three years ago he captained the swimming team to a Metropolitan Conference Championship. In four years of competition, he broke more than ten College, Met Conference and Eastern Collegiate records. He received the Ben Wallach Memorial Award as the outstanding athlete at the Col-

lege in the 1952-53 season. Four of his marks still stand. They are College records for the 220 and 440 yard freestyle and the 150 yard individual medley, and a Met Conference record for the 440 yard freestyle.

Mr. Schloemer graduated from the College in 1955. He returned "to see what teaching was like." After a year's experience he has concluded that being an instructor agrees with him. "I haven't decided whether to make teaching my career as of yet, but I expect to continue for at least a few more years," he said.

Since 1954 the quality of the College's swimming teams has been "below par," he observed. The mermen have not won a Met Conference title since that time. Last season NYU edged the Beavers by

Set Many Records As Club Captain

three points in winning the crown. More than half of the team in his day were engineering students, Mr. Schloemer recalled. Varsity Club statistics reveal that this is true today of virtually every squad at the College.

By way of explaining the athletic dominance of the Techmen Mr. Schloemer said: "Perhaps because engineers are professionally concerned with concrete, tangible forms their recreational pursuits also reflect this attitude. Sports are of this nature."

He no longer devotes a great deal of time to swimming because "I simply do not have the time."

FACTS YOU SHOULD KNOW ABOUT IBM

IBM is the consistent leader in perhaps the one "unlimited" field in electronics—digital computer development, manufacture and sales. This leadership is based on a 43-year record of steady achievement and growth.

A variety of challenging career opportunities exist and open up continually at IBM. Company policy and company growth assure that individual merit is quickly recognized, and then translated into positions of increased responsibility. Financial rewards are excellent.

Your progress is under constant review. The IBM "small-team" work system is one reason

why individual contributions to a project become known . . . and are rewarded.

Company-sponsored educational programs are among the most advanced in American business today. IBM needs well-qualified seniors and graduate students who will find their future practically "unlimited" in the development, manufacture and sales of electronic computers.

IBM laboratories and manufacturing facilities are located in Endicott, Kingston, Owego, Poughkeepsie, Yorktown, N. Y.; San Jose, Calif.; Lexington, Ky.; and Rochester, Minn. Sales and service offices in 198 cities throughout the U. S.
